Release Notes of FedRAMP-certified features

Collibra Data Intelligence Cloud - Release Notes of FedRAMP-certified features

Release date: January 8, 2023

Revision date: Fri Jan 27, 2023

You can find the most up-to-date technical documentation on our Documentation Center at

https://productresources.collibra.com/docs/collibra/latest/Content/ReleaseNotes/to_rn-landing-page.htm

Announcements

End of maintenance support on-premises environments for commercial enterprises

Collibra will end maintenance support for on-premises environments on January 30, 2023 for commercial customers. On January 30, 2023, we will release the last on-premises update that will include backport fixes for Collibra Data Governance Center 5.8 to maintain security and performance.

This does not apply to public sector agencies and organizations. See the following section for details on on-premises support for public sector agencies and organizations.

To discuss the next steps for your migration to cloud, please contact your Customer Success Manager.

Important: For public sector agencies and organizations

Please note that Collibra will continue to support on-premises environments for public sector.

- On-premises product support for public sector extends across Collibra Data Catalog, Data Governance, Data Lineage, Collibra Data Quality & Observability, Data Privacy and Core Services.
- Collibra is FedRAMP moderate certified.

Collibra is committed to serving public sector agencies and organizations and supporting them on their data modernization journey across on-premises, hybrid, and multi-cloud environments.

Please contact your Collibra Customer Success Manager and account executive should you require any assistance.

Collibra email provider change for application emails

Important This change does not affect GovCloud and on-premises environments.

In February 2023, Collibra will switch email providers for our application emails to improve email security. Please note, this does not impact marketing or other Collibra emails.

You will probably experience little or no impact. However if your organization applies very strict security, we recommend you review the details and assess their impact with your security team. If you have any questions, don't hesitate to contact your support team.

This change impacts:

- The `Mailfrom` address
- The `Return-Path` header
- The `collibra.com` SPF record
- The IP addresses of the sender

Tip

As of December 22, 2022, IP addresses are:

- 159.112.252.6/32
- 69.72.42.227/32

However, you can check the SPF record of `alerts.collibra.com` for the latest IP addresses. You can do this online or via DNS lookup:

```
dig @8.8.8.8 +short -t TXT alerts.collibra.com
```

Example

Below you can see an example of the future email headers. This information can help your IT administrators and security teams determine what changes they may need to make according to your organization's configurations and security policies regarding inbound email. Note that the sending IP addresses may change, so validate them via the SPF record as mentioned above.

Example email header

```

Asset Grid View Removal

During our regular Collibra review cycle, we noticed that the Asset Grid View has very low adoption in production environments. Therefore, we will be removing this view from the platform in the 2023.02 (February 2023) release. Please inform your teams and update your internal documentation accordingly.

Thank you for your understanding and please reach out to your Customer Success Team if you have further questions.

End of life for Collibra Connect

We have made the decision to transition away from Collibra Connect to provide customers a wider range of integration options.

Our native Collibra integrations (connectors) will be easier to implement and maintain, provide a better return on investment, and allow you to grow with and derive greater value from Collibra:

- Collibra integrations and Spring Boot based frameworks will replace Collibra Connect as options to build integrations going forward.
- You can choose any ESB or integration method for your use case.
- Our intention is to enable Collibra connectors to support ingestion as well as use cases for data profiling, data classification and other cloud functionalities.
- If you have an enterprise MuleSoft license, you can easily switch to it. For details on how to switch from Connect licenses to MuleSoft licenses see this [Collibra Support article](#).

Rest assured Connect templates are and will remain compatible with our product, please [contact us](#) for any Connect-related question. Only support or any upgrades on these products will be discontinued.

Note As of September 2022, you will need a MuleSoft Community Edition license or your own proprietary paid license to run Connect templates.

Resources:

- [Spring Boot library](#).
- [Spring Boot templates](#).
- [Custom integrations](#).
- [Learn more](#) about different methods to build integrations.

RedHat Enterprise Linux 7 and CentOS 7 are no longer supported

A new Edge site on K3S can no longer be installed on RedHat Enterprise Linux 7.x and CentOS 7.x. Upgrade your operating system for existing Edge sites before Collibra release **2022.06**.

Collibra Data Intelligence Cloud

The content of this section is only available for Collibra Data Intelligence Cloud. For the release notes of on-premises Collibra Data Governance Center, see [Collibra Data Governance Center On-Premises](#).

Failure to upgrade to the most recent release of the Collibra Service and/or Software may adversely impact the security, reliability, availability, integrity, performance or support (including Collibra's ability to meet its service levels) of the Service and/or Software. Collibra hereby disclaims all liability, express or implied, for any reduction in the security, reliability, availability, integrity, performance or support of the Service and/or Software to the extent the foregoing would have been avoided had you allowed Collibra to implement the most current release of the Service and/or Software when scheduled by Collibra. Further, to the extent your failure to upgrade the Service and/or Software impacts the security, reliability, availability, integrity or performance of the Service and/or Software for other customers or users of the Service and/or Software, Collibra may suspend your access to the Service and/or Software until you have upgraded to the most recent release.

Note Some items included in this release may require an additional cost. Please contact your Collibra representative or Customer Success Manager with any questions.

Release 2023.01

This release is the Collibra Data Intelligence Cloud release.

- [Release information](#)
- [Highlights](#)
- [New features](#)
- [Enhancements](#)
- [Fixes](#)

Release information

- Release date of 2023.01.0: January 8, 2023
 - Upgrade non-production environments: January 8, 2023
 - Upgrade production environments: January 29, 2023

Highlights

- In Collibra Data Intelligence Cloud 2023.01, we have upgraded to PostgreSQL 11.17 to ensure that your Collibra can continue to receive PostgreSQL updates.
- You can now optionally upgrade your Jobserver running on Linux to use PostgreSQL 11. For more information, go to PostgreSQL 11 upgrade.

New features

Data Lineage and BI integrations

- Collibra Data Lineage now supports the Power Query M function Table.Combine. If Collibra Data Lineage can't determine the column names in multiple sources, a dummy column with the value "*" is now created in the sources and Power BI tables, which preserves the technical lineage at the table level. For complete details, see Supported Power Query M functions. If you use this function, Table.Combine function is used. You can now view a technical lineage at the table level, where previously analyze error "Cannot determine source table for column".

Miscellaneous

- In Collibra Data Intelligence Cloud 2023.01, we have upgraded to PostgreSQL 11.17 to ensure that your Collibra can continue to receive PostgreSQL updates.
- You can now optionally upgrade your Jobserver running on Linux to use PostgreSQL 11. For more information, to PostgreSQL 11 upgrade.

Enhancements

Data Catalog

- You can now configure the database registration via Edge with the Catalog Experience setting disabled.

Data Lineage and BI integrations

- Improved error message formatting when viewing source code in the Transformations table of the technical lineage Sources tab page.
- If a Tableau worksheet is hidden in Tableau, the “Visible on server” attribute of the Tableau Worksheet asset in Collibra now has the value false. If it is not hidden, the attribute has the value true.
- When you integrate Power BI, the technical lineage now correctly shows a yellow background when columns and tables are stitched.
- When you ingest SQL Server Reporting Services (SSRS) and set the “useCollibraSystemName” property to “true”, SSRS now has its own node in the navigation tree of the Technical lineage Browse tab pane.
- Collibra Data Lineage service now supports the Power Query M function Value.NativeQuery. (ticket #98255)

Note Query parameters are supported, but core parameters are not.

- When you ingest Oracle data sources using the DatabaseOracle source type, passwords are now stored per URL, user name and database instead of just URL and user name. With this enhancement, you can connect to Oracle Pluggable Databases, for

which a single user can have the same username and different passwords for each of their pluggable databases.

- For Informatica PowerCenter technical lineage, when a PowerCenter maplet had an associated shortcut, technical lineage in Collibra would be broken up. Now, there is end-to-end lineage within PowerCenter even when a maplet has an associated shortcut.

Data Marketplace

- From this version onwards, you can only create custom relation indexes for relation-based search and filters from the UI. You can no longer use the API. For a video on how to create a custom relation-based filter in Data Marketplace, go to [Example: Create a new relation index for a custom filter](#).
- Data Marketplace is now available in the supported languages. Note: Some terms may not yet have a translation. This will be fixed in a future release.

Fixes

Data Catalog

- Database registration via Edge now replaces the UTF-8 NULL character with an empty character unless it appears in the name of the asset. In that case, the database registration will report an error. (ticket #98765)
- The Technical Data Type is now visible on the Details tab of the Tableau Data Attribute asset. (ticket #96703)
- The Catalog JDBC Profiling capability has been updated. Columns with unsupported data types are now excluded from profiling queries. The exclusion applies to columns mapped to following java.sql.Types: ARRAY, BINARY, BLOB, CLOB, DATALINK, DISTINCT, JAVA_OBJECT, LONGVARBINARY, NCLOB, NULL, OTHER, REF, REF_CURSOR, ROWID, SQLXML, STRUCT, VARBINARY. (ticket #100005)

Data Lineage and BI integrations

- Fixed a ValidationError related to the unsupported Exasol dialect. The Postgres dialect is now used in place of Exasol dialect. (ticket #98493)

- The data type for Measures is now Number. Previously, it was Unknown. (ticket #98395)
- When you integrate Tableau:
 - Metadata batches no longer fail if CREATE TECHLIN VIEW statements fail due to analysis errors. (ticket #97831)
 - Collibra Data Lineage service benefits from improved parsing of BigQuery quoted identifiers, for example `a.b`.`c`. (ticket #97831)
 - If you don't have permissions to access a parent project, but the lineage harvester identifies published data sources that belong to the project, the lineage harvester creates an 'Unknown project' that has the UUID of the inaccessible parent project. To avoid an error, the lineage harvester can now correctly link the published data sources to the unknown project.
- When you integrate Power BI or Azure Data Factory (currently in public beta), the lineage harvester now connects to the Microsoft cloud instance, instead of the login.-microsoftonline.com host.
- When you integrate Power BI and use a <source ID> configuration file, you no longer have to include the filters section.
- Tableau filtering now works as intended. Previously, filtering didn't work if you moved an older Tableau project under a newer project. (ticket #101594)
- Fixed the ordering of columns for Tableau technical lineage custom queries. (ticket #99890)
- The "Document size" attribute type and value is now shown for Tableau Workbook assets. (ticket #101703)
- Tableau Data Attributes are no longer shown twice — once with the UUID in the name and once without — in the technical lineage Browse tab pane. (ticket #102865)

Data Governance

- The table is now automatically updated when an attachment is uploaded in the Files tab of a community or domain page. (ticket #102240)
- You now correctly see the 10 latest results for each tab when using Global Create for the homepage, Data Marketplace and Usage Analytics.
- When trying to import an update to an existing asset, domain or community using the new import wizard, the import no longer fails if the asset or domain type is not mapped.
- An error message no longer appears if you delete a dashboard immediately after creating it. (ticket #92785, 97186)

- The Counters widget now correctly counts the Tableau assets. (ticket #94063)
- If no dashboards are available to you, a meaningful error message is now shown, with a button to create a dashboard, depending on your permissions.

Note To create a dashboard, you must have one of the following global permissions:

- Manage shared Views, Dashboard and Search Filter
- Manage your own Views, Dashboards, Search filters

(ticket #87671)

- The Refresh icon in a table with hierarchy enabled now correctly reloads the data in the table. (ticket #93767)
- If automatic hyperlinking is enabled and the processing of hyperlinks fails, Collibra no longer infinitely reattempts the processing, to prevent spamming the error log. (ticket #93889)
- If you open a different view in a new tab or window from the views page, the correct view now opens instead of the current view.
- If you load an asset page that contains a relation table with sorting on a column that represents another relation type, and if that relation type is deleted, an error message no longer appears. (ticket #95918)
- The Dashboards card in the homepage now truncates dashboard names with long strings.
- The Organization tab in the Browse pane of the homepage, Data Marketplace, and Usage Analytics now shows all the top-level communities instead of only the first 100.

Diagrams

- After opening a picture, if you navigate away from the Pictures tab and then go back to the Pictures tab, the picture that you last opened no longer appears. Instead, the list of pictures appears. (ticket #96923)

Component versions

Component	Product	Version
Virtual Machine (jreVersion)	Azul Zulu JRE	Azul Zulu 11.0.16.1
Repository (postgresVersion)	PostgreSQL	11.17.1
Jobserver (sparkVersion)	Spark	2.4.8-collibra-26
Search	Elasticsearch	7.17.6

Compatibility

For more information on the system requirements for on-premises installations, see [System requirements](#).

You can download all the necessary files for this release on the [Collibra Downloads page](#).

Supported web browsers

Browser	Version
Mozilla Firefox	52.4.1 or newer
Google Chrome	31 or newer
Microsoft Edge	All versions

Compatibility between Jobserver and Collibra

The following table shows which Jobserver version you have to use for each Collibra Data Intelligence Cloud version.

Collibra Data Intelligence Cloud version	Jobserver version
<ul style="list-style-type: none">• 2023.01• 2022.11	<ul style="list-style-type: none">• 2023.01.0-63 (uses PostgreSQL 11)• 2022.11.0-52 (uses PostgreSQL 10)
<ul style="list-style-type: none">• 2022.10• 2022.09• 2022.08	2022.08.1-56
<ul style="list-style-type: none">• 2022.07• 2022.06• 2022.05	2022.05.1-67
<ul style="list-style-type: none">• 2022.04• 2022.03• 2022.02	2022.2.3-58
<ul style="list-style-type: none">• 2022.01• 2021.11	2021.11.3-77
<ul style="list-style-type: none">• 2021.10• 2021.09	2021.09.0-51

Collibra Data Intelligence Cloud version	Jobserver version
<ul style="list-style-type: none"> • 2021.07 • 2021.06 • 2021.05 	2021.05.0-13
<ul style="list-style-type: none"> • 2021.04 • 2021.03 	2021.03.0-38
<ul style="list-style-type: none"> • 2021.01 • 2020.12 • 2020.11 	2020.11.2-42
<ul style="list-style-type: none"> • 2020.10 	NA

Compatibility between cloud and on-premises versions

We are releasing Collibra Data Intelligence Cloud environments on a monthly basis and Collibra Data Governance Center environments (on-premises) on a quarterly basis.

A quarterly on-premises release includes all fixes and features, unless it is a cloud-only feature, of the previous monthly cloud releases. For example, on-premises version 5.7.7 includes all fixes and features of 2020.09 to 2020.11.

The following table shows the compatibility between the cloud and on-premises versions:

Collibra Data Governance Center version...	contains the content of Collibra Data Intelligence Cloud versions...
5.7.7 (released with 2020.11)	2020.09, 2020.10, 2020.11
5.7.8 (released with 2021.03)	2020.12, 2021.01, 2021.03
5.7.9 (released with 2021.05)	2021.04, 2021.05
5.7.10 (released with 2021.09)	2021.06, 2021.07, 2021.09
5.7.11 (released with 2021.11)	2021.10, 2021.11

Collibra Data Governance Center version...	contains the content of Collibra Data Intelligence Cloud versions...
5.7.12 (released with 2022.02)	2022.01, 2022.02
5.7.13 (released with 2022.05)	2022.03, 2022.04, 2022.05
5.8.0	2022.03, 2022.04, 2022.05 but using PostgreSQL 11

Backups

You can also restore backups from a cloud environment on an on-premises environment as long as the cloud version is not newer than the on-premises environment. The following table shows which cloud backups you can restore on which on-premises version.

If you are running Collibra Data Governance Center version...	you can restore backups from Collibra Data Intelligence Cloud version...
5.7.7 (released with 2020.11)	2020.11 and older
5.7.8 (released with 2021.03)	2021.03
5.7.9 (released with 2021.05)	2021.05 and older
5.7.10 (released with 2021.09)	2021.09 and older
5.7.11 (released with 2021.11)	2021.11 and older
5.7.12 (released with 2022.02)	2022.02 and older
5.7.13 (released with 2022.05)	2022.05 and older
5.8.0	2022.05 and older. Backups of newer cloud versions can never be restored on on-premises environments.

If you are running Collibra Data Intelligence Cloud version...	you can restore backups from Collibra Data Governance Center version...
2020.09, 2020.10, 2020.11	5.7.7 and older

If you are running Collibra Data Intelligence Cloud version...	you can restore backups from Collibra Data Governance Center version...
2020.12, 2021.01, 2021.03	5.7.8 and older
2021.04, 2021.05	5.7.9 and older
2021.06, 2021.07, 2021.09	5.7.10 and older
2021.10, 2021.11	5.7.11 and older
2022.01, 2022.02	5.7.12 and older
2022.03, 2022.04, 2022.05	5.7.13 and older (to be released with the 2022.05 release)
2023.01 and newer	5.8.0 and older, even backups from PostgreSQL 10

Feature availability

Not all features are enabled by default. Some features can be enabled by the customer, others only by Collibra. The following table gives you an overview of features that are not enabled by default. If **Enable by customer** is active, you can enable the feature in Collibra Console, if not, you have to submit a support ticket to enable the feature.

Feature	Must be enabled by Collibra	Must be enabled by customer	Planned version to become enabled by default
Assessments	No	Yes	Is enabled by default.
Edge usage	No	Yes	2021.09
Enable the Data Quality extraction tab on a database asset	No	Yes	Not yet defined
Enable responsibility inheritance from higher levels in Table asset views	No	Yes	Not yet defined
New settings landing page in Collibra	No	Yes	2021.10

Feature	Must be enabled by Collibra	Must be enabled by customer	Planned version to become enabled by default
Refreshed navigation	No	Yes	2021.11
Register data source via Edge	No	Yes	Not yet defined
Disable custom validation functions to reduce security risks.	Yes	No	2021.11
Enable the Lineage tab on a database asset	Yes	No	Not yet defined
Filter rules on a database asset	Yes	No	Not yet defined
Locally managed groups	Yes	No	Not yet defined
Custom asset pages of deprecated Privacy assessment asset types	No	Yes	Not yet defined

Enable Data Classification	No	Yes	No
Data Marketplace	No	Yes	2022.11 (for new environments)
Relation-based search	No	Yes	Not yet defined
Allow access to the Workflow Designer	No	Yes	Not yet defined

Overview build numbers

For 5.7 versions older than 5.7.7, there is a difference between the build number that is shown in Collibra Data Governance Center and in Collibra Console. For those versions, the installation files have the build number that is shown in Collibra Console. The installer contains among other files, the Collibra package, which has a different build number. This is the build number that is shown in Collibra.

These are the build numbers of all 5.7 releases prior to 5.7.7:

Installer build number	Collibra build number
5.7.0-60	5.7.0-59
5.7.1-19	5.7.1-20
5.7.1-23	5.7.1-22
5.7.2-4	5.7.2-3
5.7.2-9	5.7.2-8
5.7.2-13	5.7.2-12
5.7.2-14	5.7.2-12
5.7.2-16	5.7.2-14

Installer build number	Collibra build number
5.7.3-25	5.7.3-19
5.7.4-14	5.7.4-10
5.7.4-20	5.7.4-18
5.7.4-22	5.7.4-20
5.7.4-26	5.7.4-22
5.7.4-29	5.7.4-26
5.7.4-39	5.7.4-40
5.7.4-42	5.7.4-43
5.7.5-44	5.7.5-46
5.7.5-49	5.7.5-54
5.7.5-50	5.7.5-55
5.7.5-53	5.7.5-58
5.7.5-65	5.7.5-71
5.7.5-77	5.7.5-90
5.7.6-103	5.7.6-125

API updates

- [DGC API compatibility report](#)

Deprecated API v1

In an earlier version of Collibra Data Intelligence Cloud, we introduced [Core API v2](#) next to Core API v1. From version 5.5.0 onwards, we have marked some API v1 interfaces, classes, methods, fields and enumerations as deprecated. You can open an overview of all Core API v1 deprecated content by following the **DEPRECATED** link of the Core API v1 documentation.

All Classes

Packages

- com.collibra.dgc.core.component
- com.collibra.dgc.core.component.activity
- com.collibra.dgc.core.component.articulation
- com.collibra.dgc.core.component.assignment
- com.collibra.dgc.core.component.attachment
- com.collibra.dgc.core.component.attribute
- com.collibra.dgc.core.component.bootstrap
- com.collibra.dgc.core.component.comment
- com.collibra.dgc.core.component.community
- com.collibra.dgc.core.component.file
- com.collibra.dgc.core.component.hyperlink
- com.collibra.dgc.core.component.i18n
- com.collibra.dgc.core.component.impact

com.collibra.dgc.core.component.attribute

Interfaces

- Deprecated Methods
- Deprecated Enum Constants

Deprecated Interfaces

Interface and Description

- com.collibra.dgc.core.component.activity.ActivityStreamComponent
- com.collibra.dgc.core.component.bootstrap.BootstrapComponent
- com.collibra.dgc.core.component.CompareComponent
- com.collibra.dgc.core.component.ConfigurationComponent

Deprecated means that you can still use the content in this version, but we recommend to migrate to Core API v2. If the deprecated content has an alternative in Core API v2, it will be clearly indicated in the documentation as shown in the following example:

com.collibra.dgc.core.component.activity

Interface ActivityStreamComponent

Deprecated.

@Deprecated

```
public interface ActivityStreamComponent
```

Method Summary

All Methods Instance Methods Abstract Methods **Deprecated Methods**

Modifier and Type	Method and Description
java.util.List<com.collibra.dgc.core.model.activity.Activity>	getActivities(com.collibra.dgc.core.dto.activity.ActivityParameters activityParameters)
	Deprecated.
	Use com.collibra.dgc.core.api.component.activitystream.ActivityStreamApi#getActivities(FindActivitiesRequest)

If there is no alternative available in API v2, we recommend to file a [support ticket](#) or a feature request on the [Collibra Ideation platform](#).

Known issues

The following is a non-exhaustive list of issues that we have encountered in this release. We intend to fix these issues as quickly as possible.

Ticket	Issue	Found in	Fixed in
Not applicable	In Data Marketplace, it is possible that fewer or more search results appear in the All filter tab compared to other filter tabs. This is because the out-of-the-box filter tabs, Tables, Data Sets and Reports, are not impacted by the Data Marketplace scope configuration. Administrators can configure the available filter tabs .	2022.11	To be defined
101776, 102145	To fix the Data Marketplace issue "Request failed with status code 503", Data Marketplace no longer shows user avatars in the Responsibilities tab in asset previews.	2022.11	To be defined
Not applicable	The new licensing terms, Standard and Read-only are being overwritten by the old terms, Author and Consumer in some instance. This happens when language customizations have been made to the interface text. You can see how to reset the interface text in our documentation.	2022.11	Not applicable

Ticket	Issue	Found in	Fixed in
Not applicable	<p>From version 2022.11 onwards, Collibra takes the default language of your browser into account to select the interface text language of some sections. Collibra now also has translations of some interface text available out of the box. Consequently, you can no longer edit that interface text, nor translate it into unsupported languages. This includes the interface text of Usage Analytics, Data Marketplace and the [[[Undefined variable CollibraProducts.HomepageLowercase]]]. This means that the language of some user interface text may not always match the language settings in your user profile.</p>	2022.11	Not applicable
Not applicable	<p>Within 24 hours after Usage Analytics is enabled, if you do not sign in to Collibra Data Intelligence Cloud or visit an asset, empty cards are shown on the Usage Analytics dashboard.</p>	2022.11	Not applicable
Not applicable	<p>Collibra doesn't work in Safari, and Collibra Everywhere doesn't work on devices running on iOS.</p>	2022.09	2022.09.1
87158	<p>If a network issue occurs while registering a JDBC data source via Job-server, Collibra again retries repeatable network requests.</p>	2022.09	2022.09.1
	<p>If you are using the Databricks connection driver version 2.6.25, you cannot use partial scan when profiling via Edge.</p>	2022.05	2022.08

Ticket	Issue	Found in	Fixed in
	<p>If you do not fill in the optional fields, Access Key ID and Secret Access Key, in the S3 File System Connection Details page, an incorrect error message appears: "Jobserver no longer available. Select another Jobserver." To prevent this error, fill in the Access Key ID and Secret Access Key fields.</p>	2022.05	2022.06.1
<p>81272, 81501, 81592, 81612, 81727, 81794, 82017, 82327, 82418, 82630, 83593, 83601, 83922, 83970, 84768, 84828, 85060, 85470, 85572</p>	<p>You cannot move assets between domains in different subcommunities that have the same parent community if the permission is only set on the parent community. As a workaround, ensure that you also have the necessary permission on the subcommunity level.</p>	<p>2022.01, 2022.02, 2022.03</p>	2022.04
79928	<p>Normally, you only see relations if you have view permissions for the head and the tail asset of the relation. If you do not have view permissions for an asset, you don't see the relations to that asset, for example in views or on the asset page of the related assets.</p> <p>However, the History tab page of asset pages mentions all relations, even if you don't have view permissions for the related asset.</p>	2022.02	Won't be fixed
	<p>Time-based review rules that were configured to trigger Time based asset review workflows on an annual basis, did not start at the beginning of the calendar year 2022. We strongly recommend that you review any Time-based Review Rule assets you have configured, to see if there are target assets that should be reviewed. Read more.</p>	2022.01	planned for 2022.03 but subject to changes

Ticket	Issue	Found in	Fixed in
30943, 36378	A data source ingestion fails if a foreign key has the same name as a table.	5.5	Won't be fixed

Common issues

- The Collibra Data Intelligence Cloud 5.7.2-13 release fixed performance issues with the Escalation Process workflow.

To take advantage of the improvements, you must deploy the [new version](#) of the Escalation Process workflow in your Collibra 5.7.2-13 or newer.

Note If you are using a modified Escalation Process workflow, you must port your changes to the new workflow.

Warning The new Escalation Process workflow is only valid for Collibra 5.7.2-13 or newer.

- Workflows with different values for the `processRef` attribute of the `participant` tag and the `id` attribute of the `process` tag are not working in Collibra 5.6.0 or newer, despite having worked in older versions. These workflows have invalid BPMN files that cause a `java.lang.NullPointerException` error, visible in the Collibra Console logs. For more details, see the [troubleshooting section](#).
