## Business Glossary

The Business Glossary application is your go-to system to govern your business terms. It contains a configurable range of asset types, their attributes, taxonomy and relations, as well as the status of their adoption. It is fully integrated with the technological assets as well as supported by Collibra's core features: reporting, traceability, comments, workflows, and so on.

The screenshot displays the Business Glossary application interface. At the top, there is a navigation bar with 'Browse', 'Search', and 'Tasks 0'. Below this, a breadcrumb trail shows 'Business Assets', 'Metrics', and 'Glossaries'. A dropdown menu is set to 'Business Terms', and a view toggle is set to 'View for displaying all business terms'. On the left, a 'Filters' sidebar is visible, with 'Basic' selected and 'Asset type' set to 'Business Term'. The main area contains a table with columns for 'Name', 'Definition', 'Status', 'Domain', and 'Asset Type'. The table lists various sales and forecast terms, all with a status of 'Accepted' and a domain of 'SCPM Glossary'. A pagination bar at the bottom shows '1-50' and a total of '670' items.

<input type="checkbox"/>	Name ↑	Definition	Status	Domain	Asset Type
<input type="checkbox"/>	1 Month Actual Sales	Total Actual Sales of the past Month.	Accepted	SCPM Glossary	Business Term
<input type="checkbox"/>	3 Month Actual Sales	Total Actual Sales of the past 3 months (past quarter).	Accepted	SCPM Glossary	Business Term
<input type="checkbox"/>	3 Month Forecast	Forecasted Total Sales (Revenue) for the next 3 Months (one quarter).	Accepted	SCPM Glossary	Business Term
<input type="checkbox"/>	3 Month Forecast Price	Forecasted Unit Price 3 month...	Accepted	SCPM Glossary	Business Term
<input type="checkbox"/>	6 Month Actual Sales	Total Actual Sales of the past 6 months (past 2 quarters).	Accepted	SCPM Glossary	Business Term
<input type="checkbox"/>	6 Month Forecast	Forecasted Total Sales for the next 6 months (2 quarters).	Accepted	SCPM Glossary	Business Term
<input type="checkbox"/>	9 Month Actual Sales	Total Actual Sales of the past 9 months (3 quarters).	Accepted	SCPM Glossary	Business Term
<input type="checkbox"/>	9 Month Forecast	Forecasted Total Sales (Revenue) for the next 9 months.	Accepted	SCPM Glossary	Business Term

The Business Glossary is key for decision makers to understand their digital assets from a business perspective.

## Business Glossary submenu pages

Page	Description
Business Assets	Contains a table with all the business assets in Collibra.
<a href="#">Metrics</a>	Contains a variety of statistics related to how the assets of the Business Glossary are used.
Glossaries	Contains a table with all the existing glossaries (domain type) in Collibra

## Packaged metamodel for the Business Glossary

The Business Glossary has specific asset types and domain types.

### Asset types

The table below contains the packaged [asset types](#) that are relevant for the Business Glossary.

### Domain types

The table below contains the packaged [domain types](#) that are relevant for the Business Glossary.

### Workflows

The table below contains the packaged workflows that are relevant for the Business Glossary.

Name	Description
Approval Process	The Approval Process workflow allows you to approve an asset in Collibra Data Intelligence Cloud. This is a more powerful version of the Simple Approval Process.

Name	Description
Assessments	This process notifies the Business Steward (by default) that an Assessment Review asset is ready for review and prompts the Business Steward to approve or reject the asset.
Cancel Process	This process notifies the concerned users of a workflow cancellation.
Escalation Process	This process is the default mechanism for the escalation of user tasks in workflows.
Propose New Business Asset	This process facilitates the creation of new Business Assets in the <b>Data Governance Council</b> community.
Propose New Business Term	This process facilitates the creation of new Business Term assets in the <b>Data Governance Council</b> community.
Simple Approval	The Simple Approval workflow is a single-step process that allows you to approve an asset in Collibra Data Intelligence Cloud.
Voting Sub-Process	<p>The Voting Sub-Process is a workflow that can be called by other workflows when users need to vote. It is used within other packaged workflows such as the <a href="#">Approval Process</a>, the <a href="#">Simple Approval</a> or the <a href="#">Issue Management</a> workflow.</p> <p>You can use this sub-process in new custom workflows. The result is a true or false boolean that is provided to the parent workflow.</p>

## Metrics pages

The Metrics pages contain a variety of statistics related to how an application is used. They pages consist of one or more graphs, their legends and some counters.

For each graph, you can edit the data set and the time range shown.

**Note** On the **Metrics** page, the lines that are shown on a given graph are called data sets. Do not confuse these with [data sets](#) in the true context of CollibraData Catalog. On this page, when you click **Add data set**, it simply means that you want to add another line to the graph.

# Components

The Metrics page consists of one or more graphs, their legend and some counters.

Number	Element	Description
1	Color-coded bars	<p>The color-coded bars give a quick overview of the graph.</p> <p>The vertical line leading from the color-coded bar indicates the difference between the minimum and maximum values.</p>
2	Data set details	<p>More details about the graph.</p> <p>Hover your pointer over the color-coded bars to the left of each line of graph to view them.</p>
	Number of elements	The amount of days in the time range.
	Minimum	The lowest count on any day in the data set.
	Q1	The first quartile, meaning the lowest 25% of the data set.
	Median	The median, meaning the middle value of the data set.
	Q3	The third quartile, meaning the lowest 75% of the data set.
	Maximum	The highest count on any day in the time range.

Number	Element	Description
3	Graph	<p>The actual graph. What it shows exactly, depends on the data set. For example, it can show the number of assets viewed over the last month, or the number of licenses used.</p> <p><b>Tip</b> You can <a href="#">edit</a> the time range of the graph.</p>
4	Counts by day	<p>The counts for a specific day for each data set, by moving your mouse over the graph. The vertical red line identifies the day. The exact count for that day for each data set, is shown above the graph.</p>
5	Legend	<p>The legend of the graph, which also allows you to <a href="#">add</a>, <a href="#">edit</a> and <a href="#">delete</a> the data sets.</p>

## Add a data set to a metrics graph

You can add a data set to a graph on the [Metrics pages](#), for example if you want to compare the amount of new assets of different types.

### Steps

1. Open the product for which you want to see the metrics, for example Business Glossary.
2. In the submenu, click **Metrics**.
  - » The [Metrics page](#) appears.
3. Under the relevant graph, to the right, click **Add data set**.

» The filter settings appear.

4. Enter the required information:

Filter setting	Description
Filter Type	<p>The type of data that will be counted.</p> <p>Depending on the filter type that you select, different fields become available.</p>
Active Users	<p>A daily count of the active users to have viewed the relevant assets.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Product:</b> Limit the results to active users within a specific Collibra Data Intelligence Cloud application.</li> <li>◦ <b>Role:</b> Limit the results to active users that have been assigned a specific role.</li> </ul>
Asset Count	<p>A daily count of the relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Status:</b> Limit the results to assets with a specific status.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>

Filter setting	Description
<p>Changed Task Count</p>	<p>A daily count of workflow tasks that have been changed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>
<p>Domain Count</p>	<p>A daily count of the domains with relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>
<p>License Available</p>	<p>A daily count of Collibra licenses that have been available to users.</p> <p>This is calculated by subtracting the licenses in use from the total licenses your organization has.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>

Filter setting	Description
License Usage	<p>A daily count of Collibra licenses in use by all users in your organization.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
Page Hits	<p>A daily count of Collibra asset page hits.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> </ul>
Task Count	<p>A daily count of workflow tasks carried out.</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>

Filter setting	Description
Task Duration	<p>A daily count of workflow task duration.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> </ul>

5. Click **Save data set**.

## Edit a data set of a metrics graph

You can edit the data set that is shown in a graph on the [Metrics pages](#).

### Steps

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The [Metrics page](#) appears.
3. In the legend under the relevant graph, click the data set you want to edit.

- » The filter configuration for the data set appears.
4. Enter the required information.

Filter setting	Description
Filter Type	<p>The type of data that will be counted.</p> <p>Depending on the filter type that you select, different fields become available.</p>

Filter setting	Description
Active Users	<p>A daily count of the active users to have viewed the relevant assets.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Product:</b> Limit the results to active users within a specific Collibra Data Intelligence Cloud application.</li> <li>◦ <b>Role:</b> Limit the results to active users that have been assigned a specific role.</li> </ul>
Asset Count	<p>A daily count of the relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Status:</b> Limit the results to assets with a specific status.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>
Changed Task Count	<p>A daily count of workflow tasks that have been changed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>

Filter setting	Description
Domain Count	<p>A daily count of the domains with relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>
License Available	<p>A daily count of Collibra licenses that have been available to users.</p> <p>This is calculated by subtracting the licenses in use from the total licenses your organization has.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
License Usage	<p>A daily count of Collibra licenses in use by all users in your organization.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
Page Hits	<p>A daily count of Collibra asset page hits.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> </ul>

Filter setting	Description
Task Count	<p>A daily count of workflow tasks carried out.</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>
Task Duration	<p>A daily count of workflow task duration.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> </ul>

5. Click **Save data set**.
  - » The updated data set is shown in the graph.

## Edit the time range of a metrics graph

By default, the graphs on the [Metrics pages](#) are shown in daily increments, over a time range of one month. However, you can edit the time range to suit your needs.

There are two ways to edit the time range:

- Click and drag in the graph.
- Select the dates for the graph.

## Click and drag in the graph

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The **Metrics** page appears.
3. Optionally, **Add a data set to a metrics graph** a data set to a graph.
4. In the relevant graph, click at (or near) the first date in your desired range, and drag to the right, toward the last date in your desired range.
  - » While you are dragging, the color changes in the graph, indicating the resulting time range.

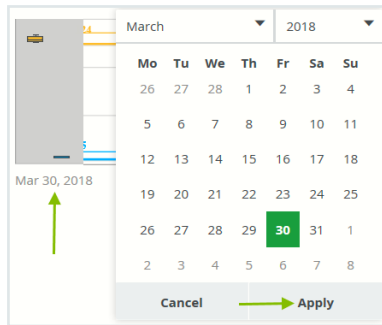

5. Release the mouse button.
  - » The graph is adjusted to the new time range.

## Select the dates for the graph

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The **Metrics** page appears.
3. Optionally, **Add a data set to a metrics graph** a data set to a graph.

4. On the left-hand side of the graph, click the date.  
» A date picker appears.

5. Click the first day of your desired time range, and then click **Apply**.  
» The graph is adjusted to the date you selected.
6. On the right-hand side of the graph, click on the date.  
» A date picker appears.
7. Click the last day of your desired time range, and then click **Apply**.  
» The graph is adjusted to the date you selected.

## Remove a data set from a metrics graph

You can remove a data set that is shown in a graph on the [Metrics pages](#) if you don't want to see, for example, if you think there is too much information in a graph.

**Note** Each graph will always show at least one data set. If it only contains one data set and you want to remove it, you first have to [Add a data set to a metrics graph](#) another data set. You can then remove the other one.

### Steps

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.  
» The [Metrics page](#) appears.
3. In the legend under the relevant graph, click on  next to the data set you want to delete.

1:	Asset Count (Type: Data Asset, Status: Accepted)	
2:	Page Hits	
3:	Task Count	

» The graph is updated.

# Policy Manager

The Policy Manager application provides the key functions to adopt, implement and monitor the digital policies for the enterprise.

The screenshot displays the 'Policy Manager' application interface. At the top, there are tabs for 'Governance Assets' and 'Metrics'. Below this, a dark header bar contains a dropdown menu labeled 'Policies & Standards' and several action icons (edit, save, share, delete). The main content area features a table with columns for 'Name', 'Status', 'Domain', and 'Asset Type'. The table lists several policies, all with a status of 'Accepted' and a domain of 'AWS Policies'. A pagination bar at the bottom indicates the current view is for items 1-50 out of a total of 125.

<input type="checkbox"/>	Name ↑	Status	Domain	Asset Type
<input type="checkbox"/>	collibra-demo-euwest2-refine...	Accepted	AWS Policies	Policy
<input type="checkbox"/>	collibra-demo-euwest2-refine...	Accepted	AWS Policies	Policy
<input type="checkbox"/>	collibra-dwh-config-dgc	Accepted	AWS Policies	Policy
<input type="checkbox"/>	collibra-dwh-config-dgc-2	Accepted	AWS Policies	Policy
<input type="checkbox"/>	collibra-dwh-config-mule	Accepted	AWS Policies	Policy
<input type="checkbox"/>	collibra-dwh-config-users-and...	Accepted	AWS Policies	Policy

With Policy Manager, Collibra Data Intelligence Cloud users can easily have:

- An overview of the enterprise's governance assets.
  - Standards, for example ISO-standards or other local standards.
  - External regulations, for example GDPR.
  - Entities, such as EBA, ISO, EC, FDA and so on.
  - Internal regulations, for example policies, goals, constraints and so on.
  - Controls, like a dissemination plan.

- Risks, evaluation and mitigation, for example privacy risk and market access risk.
- Accreditation and certificates, for example conformance certificates.
- An overview of the policy lifecycle:
  - Adoption: See the regulations and the respective regulations, paragraphs, sections, to check the adoption of the applicable regulations throughout the enterprise.
  - Compliance: Monitor how the enterprise's data governance program can be traced to the policies and if there are compliance gaps.
  - Risks: Define the risks and their mitigation rules, and trace them to the policies and data assets

## Policy Manager submenu pages

Page	Description
Governance Assets	Contains a table with Governance assets.
<a href="#">Metrics</a>	Contains a variety of statistics related to how the assets of the Policy Manager are used.

## Packaged metamodel for the Policy Manager

The Policy Manager has specific asset types and domain types.

### Asset types

The table below contains the packaged [asset types](#) that are relevant for the Policy Manager.

### Domain types

The table below contains the packaged [domain types](#) that are relevant for the Policy Manager.

## Workflows

The table below contains the packaged workflows that are relevant for the Policy Manager.

Name	Description
Assessments	This process notifies the Business Steward (by default) that an Assessment Review asset is ready for review and prompts the Business Steward to approve or reject the asset.
Cancel Process	This process notifies the concerned users of a workflow cancellation.
Escalation Process	This process is the default mechanism for the escalation of user tasks in workflows.
Propose New Governance Asset	This process facilitates the creation of new Governance Assets in the <b>Data Governance Council</b> community.
Simple Approval	The Simple Approval workflow is a single-step process that allows you to approve an asset in Collibra Data Intelligence Cloud.
Voting Sub-Process	<p>The Voting Sub-Process is a workflow that can be called by other workflows when users need to vote. It is used within other packaged workflows such as the <a href="#">Approval Process</a>, the <a href="#">Simple Approval</a> or the <a href="#">Issue Management</a> workflow.</p> <p>You can use this sub-process in new custom workflows. The result is a true or false boolean that is provided to the parent workflow.</p>

## Metrics pages

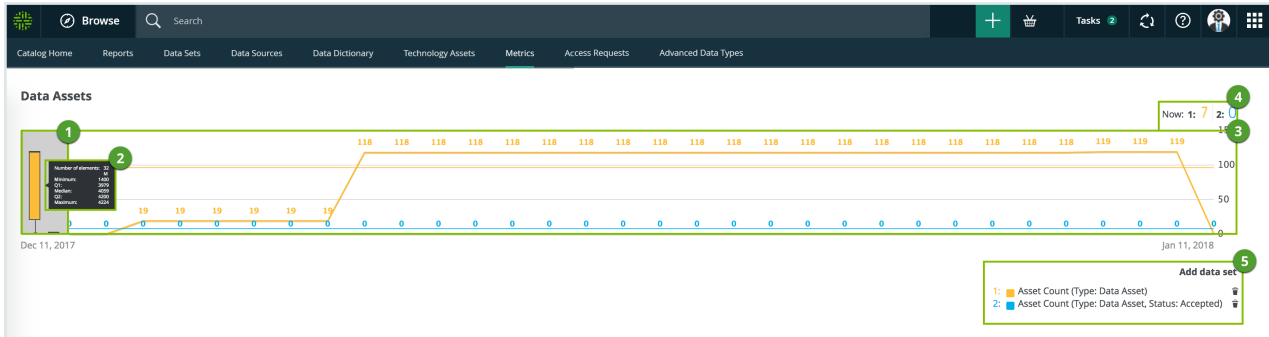

The Metrics pages contain a variety of statistics related to how an application is used. They pages consist of one or more graphs, their legends and some counters.

For each graph, you can edit the data set and the time range shown.

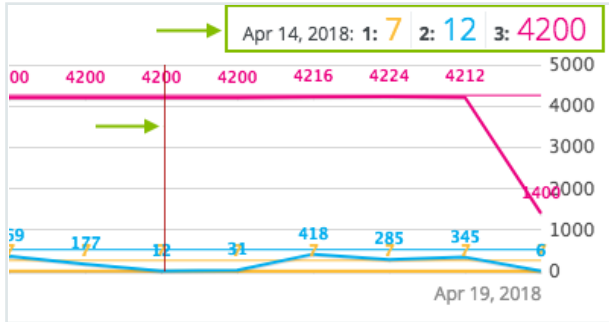

**Note** On the **Metrics** page, the lines that are shown on a given graph are called data sets. Do not confuse these with [data sets](#) in the true context of CollibraData Catalog. On this page, when you click **Add data set**, it simply means that you want to add another line to the graph.

# Components

The Metrics page consists of one or more graphs, their legend and some counters.

Number	Element	Description
1	Color-coded bars	The color-coded bars give a quick overview of the graph.  The vertical line leading from the color-coded bar indicates the difference between the minimum and maximum values.
2	Data set details	More details about the graph.  Hover your pointer over the color-coded bars to the left of each line of graph to view them.
	Number of elements	The amount of days in the time range.
	Minimum	The lowest count on any day in the data set.
	Q1	The first quartile, meaning the lowest 25% of the data set.
	Median	The median, meaning the middle value of the data set.
	Q3	The third quartile, meaning the lowest 75% of the data set.
	Maximum	The highest count on any day in the time range.

Number	Element	Description
3	Graph	<p>The actual graph. What it shows exactly, depends on the data set. For example, it can show the number of assets viewed over the last month, or the number of licenses used.</p> <p><b>Tip</b> You can <a href="#">edit</a> the time range of the graph.</p>
4	Counts by day	<p>The counts for a specific day for each data set, by moving your mouse over the graph. The vertical red line identifies the day. The exact count for that day for each data set, is shown above the graph.</p> 
5	Legend	<p>The legend of the graph, which also allows you to <a href="#">add</a>, <a href="#">edit</a> and <a href="#">delete</a> the data sets.</p>

## Add a data set to a metrics graph

You can add a data set to a graph on the [Metrics pages](#), for example if you want to compare the amount of new assets of different types.

### Steps

1. Open the product for which you want to see the metrics, for example Business Glossary.
2. In the submenu, click **Metrics**.
  - » The [Metrics page](#) appears.
3. Under the relevant graph, to the right, click **Add data set**.

» The filter settings appear.

4. Enter the required information:

Filter setting	Description
Filter Type	<p>The type of data that will be counted.</p> <p>Depending on the filter type that you select, different fields become available.</p>
Active Users	<p>A daily count of the active users to have viewed the relevant assets.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Product:</b> Limit the results to active users within a specific Collibra Data Intelligence Cloud application.</li> <li>◦ <b>Role:</b> Limit the results to active users that have been assigned a specific role.</li> </ul>
Asset Count	<p>A daily count of the relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Status:</b> Limit the results to assets with a specific status.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>

Filter setting	Description
<p>Changed Task Count</p>	<p>A daily count of workflow tasks that have been changed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>
<p>Domain Count</p>	<p>A daily count of the domains with relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>
<p>License Available</p>	<p>A daily count of Collibra licenses that have been available to users.</p> <p>This is calculated by subtracting the licenses in use from the total licenses your organization has.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>

Filter setting	Description
License Usage	<p>A daily count of Collibra licenses in use by all users in your organization.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
Page Hits	<p>A daily count of Collibra asset page hits.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> </ul>
Task Count	<p>A daily count of workflow tasks carried out.</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>

Filter setting	Description
Task Duration	<p>A daily count of workflow task duration.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> </ul>

5. Click **Save data set**.

## Edit a data set of a metrics graph

You can edit the data set that is shown in a graph on the [Metrics pages](#).

### Steps

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The [Metrics page](#) appears.
3. In the legend under the relevant graph, click the data set you want to edit.

- » The filter configuration for the data set appears.
4. Enter the required information.

Filter setting	Description
Filter Type	<p>The type of data that will be counted.</p> <p>Depending on the filter type that you select, different fields become available.</p>

Filter setting	Description
Active Users	<p>A daily count of the active users to have viewed the relevant assets.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Product:</b> Limit the results to active users within a specific Collibra Data Intelligence Cloud application.</li> <li>◦ <b>Role:</b> Limit the results to active users that have been assigned a specific role.</li> </ul>
Asset Count	<p>A daily count of the relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Status:</b> Limit the results to assets with a specific status.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>
Changed Task Count	<p>A daily count of workflow tasks that have been changed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>

Filter setting	Description
Domain Count	<p>A daily count of the domains with relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>
License Available	<p>A daily count of Collibra licenses that have been available to users.</p> <p>This is calculated by subtracting the licenses in use from the total licenses your organization has.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
License Usage	<p>A daily count of Collibra licenses in use by all users in your organization.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
Page Hits	<p>A daily count of Collibra asset page hits.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> </ul>

Filter setting	Description
Task Count	<p>A daily count of workflow tasks carried out.</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>
Task Duration	<p>A daily count of workflow task duration.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> </ul>

5. Click **Save data set**.
  - » The updated data set is shown in the graph.

## Edit the time range of a metrics graph

By default, the graphs on the [Metrics pages](#) are shown in daily increments, over a time range of one month. However, you can edit the time range to suit your needs.

There are two ways to edit the time range:

- Click and drag in the graph.
- Select the dates for the graph.

## Click and drag in the graph

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The **Metrics** page appears.
3. Optionally, **Add a data set to a metrics graph** a data set to a graph.
4. In the relevant graph, click at (or near) the first date in your desired range, and drag to the right, toward the last date in your desired range.
  - » While you are dragging, the color changes in the graph, indicating the resulting time range.

5. Release the mouse button.
  - » The graph is adjusted to the new time range.

## Select the dates for the graph

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The **Metrics** page appears.
3. Optionally, **Add a data set to a metrics graph** a data set to a graph.

4. On the left-hand side of the graph, click the date.
  - » A date picker appears.

5. Click the first day of your desired time range, and then click **Apply**.
  - » The graph is adjusted to the date you selected.
6. On the right-hand side of the graph, click on the date.
  - » A date picker appears.
7. Click the last day of your desired time range, and then click **Apply**.
  - » The graph is adjusted to the date you selected.

## Remove a data set from a metrics graph

You can remove a data set that is shown in a graph on the [Metrics pages](#) if you don't want to see, for example, if you think there is too much information in a graph.

**Note** Each graph will always show at least one data set. If it only contains one data set and you want to remove it, you first have to [Add a data set to a metrics graph](#) another data set. You can then remove the other one.

### Steps

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The [Metrics page](#) appears.
3. In the legend under the relevant graph, click on  next to the data set you want to delete.

1:	Asset Count (Type: Data Asset, Status: Accepted)	
2:	Page Hits	
3:	Task Count	

» The graph is updated.

# Reference data

Reference data is data used to classify or categorize other data. Typically, they are static or slowly changing over time. Examples of reference data include units of measurement and country codes.

## Reference Data application

The Collibra Reference Data application aims at a systematic approach to manage [reference data](#), including code sets and code values. For example, you can define relations between Code Set assets and Column assets for which they are the allowed values, or between Code Value assets and the Business Assets that they represent. Additionally, you can define complex mappings between them in order to enable crosswalks from one information system to another, taking into account differences in the code sets through time.

The screenshot shows the Collibra Reference Data application interface. At the top, there are tabs for 'Code Values/Sets', 'Metrics', and 'Hierarchies'. Below the tabs, there is a dropdown menu for 'Code Values' and a 'View for displaying all code values' label. The main content area displays a table with the following columns: Name, is code for, Status, Domain, and Asset Type. The table contains six rows of data, each representing a code value asset.

Name	is code for	Status	Domain	Asset Type
00-010	Cash	Candidate	3-Digit Chart of Accounts	Code Value
00-020	Petty cash	Candidate	3-Digit Chart of Accounts	Code Value
00-030	Accounts receivable	Candidate	3-Digit Chart of Accounts	Code Value
00-040	Reserve for bad debts	Candidate	3-Digit Chart of Accounts	Code Value
00-050	Marketable securities	Candidate	3-Digit Chart of Accounts	Code Value
00-060	Raw materials inventory	Candidate	3-Digit Chart of Accounts	Code Value

## Subpages

Reference Data has the following items on its submenu.

Reference data sub-page	Description
Code Value/Sets	Contains a table with all Code Value and Code Set assets in Collibra.
<a href="#">Metrics</a>	Contains a variety of statistics related to how the assets of the Reference Data application are used.
Hierarchies	Contains a table with all Hierarchies domains in Collibra

## Packaged metamodel for the Reference Data application

The Reference Data application has specific asset types and domain types.

### Asset types

The table below contains the packaged [asset types](#) that are relevant for the Reference Data application.

### Domain types

The table below contains the packaged [domain types](#) that are relevant for the Reference Data application.

### Workflows

The table below contains the packaged workflows that are relevant for the Reference Data application.

Name	Description
Assessments	This process notifies the Business Steward (by default) that an Assessment Review asset is ready for review and prompts the Business Steward to approve or reject the asset.

Name	Description
Cancel Process	This process notifies the concerned users of a workflow cancellation.
Escalation Process	This process is the default mechanism for the escalation of user tasks in workflows.
Propose New Code Value	This process facilitates the creation of new Code Value assets in the <b>Data Governance Council</b> community.
Propose New Data Asset	This process facilitates the creation of new Data Assets in the <b>Data Governance Council</b> community.
Propose New Governance Asset	This process facilitates the creation of new Governance Assets in the <b>Data Governance Council</b> community.
Simple Approval	The Simple Approval workflow is a single-step process that allows you to approve an asset in Collibra Data Intelligence Cloud.
Voting Sub-Process	<p>The Voting Sub-Process is a workflow that can be called by other workflows when users need to vote. It is used within other packaged workflows such as the <a href="#">Approval Process</a>, the <a href="#">Simple Approval</a> or the <a href="#">Issue Management</a> workflow.</p> <p>You can use this sub-process in new custom workflows. The result is a true or false boolean that is provided to the parent workflow.</p>

## Reference data

Reference data is data that is used to structure and constrain other data. It is typically stable information with a known code set, which consists of code values that rarely change. As the name suggests, reference data is designed to be referenced by a wide variety of other data. This is done in order to create a standard vocabulary and structure across diverse systems and data sources.

### Example

- country codes
- language codes
- product codes
- account identifiers
- ...

However, not all systems use the same versions of a code set for the same type of information. This leads to problems when these systems exchange information.

#### Example

The same organization could use the two-character country ISO codes for its Customer Relationship Management (CRM) system, but the three-character country ISO codes for its Enterprise Resource Planning (ERP) system.

Besides technical problems, business users may have the following questions:

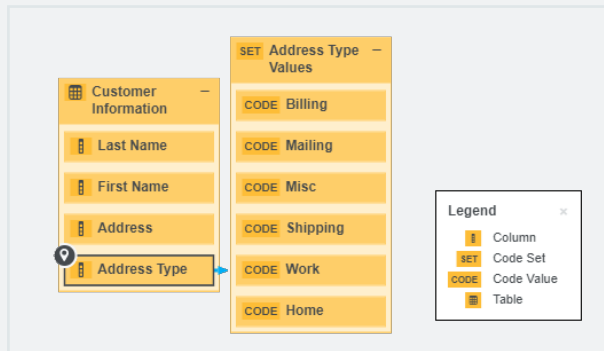

- What version of the ISO country codes is used in each database?
- What is the difference between the version of ISO country codes of last year as compared to the one currently operational internally?
- If I cannot find a code for a specific account or project, whom should I report it to?

## Reference Data in Collibra

The Collibra Reference Data application aims at a systematic approach to manage [reference data](#), including code sets and code values. For example, you can define relations between Code Set assets and Column assets for which they are the allowed values, or between Code Value assets and the Business Assets that they represent. Additionally, you can define complex mappings between them in order to enable crosswalks from one information system to another, taking into account differences in the code sets through time.

### Example

In the following diagram, you can see that the Customer Information table contains the Address Type column, which can only contain code values from the Address Type Values code set.

## Reference data lifecycle

**Reference data** is relatively easy to govern because it concerns predictable data. Often, the code sets are related to the assets in the [Business Glossary](#) application.

The process of managing reference data in Collibra Data Intelligence Cloud generally involves the following phases.

Phase	Description																				
1. Create	<p>Gather all existing reference data content, analyze it, and enter the relevant parts in Collibra Data Intelligence Cloud as Code Set and Code Value assets. We recommend that you use a specific Codelist domain for each code set.</p> <div style="border: 1px solid #ccc; background-color: #f9f9f9; padding: 10px; margin: 10px 0;"> <p><b>Tip</b> You can create the assets manually, but usually it is easier to use the <a href="#">import functionality</a> to enter thousands of assets at the same time.</p> </div> <p>To describe the code set completely, you can <a href="#">create relations</a> between the Code Set and Code Value assets, as well as other relevant assets.</p> <table border="1" data-bbox="429 719 1417 1451"> <thead> <tr> <th data-bbox="429 719 663 824">Relation type</th> <th data-bbox="663 719 802 824">Head assets</th> <th data-bbox="802 719 916 824">Tail assets</th> <th data-bbox="916 719 1417 824">Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="429 824 663 960">Code Value is part of / contains Code Set</td> <td data-bbox="663 824 802 960">Code Value assets</td> <td data-bbox="802 824 916 960">Code Set asset</td> <td data-bbox="916 824 1417 960">Relations of this type link the Code Value assets to the corresponding Code Set asset.</td> </tr> <tr> <td data-bbox="429 960 663 1137">Business Term has code / is code for Code Value</td> <td data-bbox="663 960 802 1137">Business Term asset</td> <td data-bbox="802 960 916 1137">Code Value asset</td> <td data-bbox="916 960 1417 1137">Relations of this type link Business Term assets to Code Value assets to provide more information about the meaning of the Code Value asset.</td> </tr> <tr> <td data-bbox="429 1137 663 1274">Data Element allowed value set / applies to Code Set</td> <td data-bbox="663 1137 802 1274">Column asset</td> <td data-bbox="802 1137 916 1274">Code Set asset</td> <td data-bbox="916 1137 1417 1274">Relations of this type describe which code set is used to restrict the possible values of a column.</td> </tr> <tr> <td data-bbox="429 1274 663 1451">Data Element allowed value / allowed value for Code Value</td> <td data-bbox="663 1274 802 1451">Column asset</td> <td data-bbox="802 1274 916 1451">Code Value asset</td> <td data-bbox="916 1274 1417 1451">Relations of this type describe the actual code values that are used in a column.</td> </tr> </tbody> </table> <p>The outcome consists of Code Set and Code Value assets, organized in different Codelist domains. The assets can have relations to other assets and still have the <b>Candidate</b> status.</p>	Relation type	Head assets	Tail assets	Description	Code Value is part of / contains Code Set	Code Value assets	Code Set asset	Relations of this type link the Code Value assets to the corresponding Code Set asset.	Business Term has code / is code for Code Value	Business Term asset	Code Value asset	Relations of this type link Business Term assets to Code Value assets to provide more information about the meaning of the Code Value asset.	Data Element allowed value set / applies to Code Set	Column asset	Code Set asset	Relations of this type describe which code set is used to restrict the possible values of a column.	Data Element allowed value / allowed value for Code Value	Column asset	Code Value asset	Relations of this type describe the actual code values that are used in a column.
Relation type	Head assets	Tail assets	Description																		
Code Value is part of / contains Code Set	Code Value assets	Code Set asset	Relations of this type link the Code Value assets to the corresponding Code Set asset.																		
Business Term has code / is code for Code Value	Business Term asset	Code Value asset	Relations of this type link Business Term assets to Code Value assets to provide more information about the meaning of the Code Value asset.																		
Data Element allowed value set / applies to Code Set	Column asset	Code Set asset	Relations of this type describe which code set is used to restrict the possible values of a column.																		
Data Element allowed value / allowed value for Code Value	Column asset	Code Value asset	Relations of this type describe the actual code values that are used in a column.																		

Phase	Description
2. Complete	<p>Create <a href="#">responsibilities</a> by assigning users or user groups to roles for the respective Codelist domains:</p> <ul style="list-style-type: none"> <li>• The DataStewards improve the bulk import and prepare it for review. They also hold the ultimate decision-making authority in the approval process.</li> <li>• Subject Matter Experts review the correctness of the assets.</li> <li>• The Stakeholders comment on the assets and validate the correctness.</li> </ul> <p>Use the <a href="#">Approval</a> and <a href="#">Simple Approval</a> workflows to update and approve the Code Set and Code Value assets.</p> <p>The outcome consists of Code Set and Code Value assets with the <b>Approved</b> status.</p>
3. Map	<p>The DataStewards <a href="#">map code values and crosswalks</a> between corresponding Code Value assets. A Crosswalk asset may have additional attributes to describe the transformation logic. Often, this transformation logic is hidden or implicit.</p> <p>The Crosswalk assets originally also have the <b>Candidate</b> status. Therefore, they should also be reviewed and approved via the <a href="#">Approval</a> and <a href="#">Simple Approval</a> workflows.</p>
4. Publish and trace	<p>After you have created the required assets and added the required relations, you can use <a href="#">diagrams</a> to trace the lineage.</p> <p>The approved code values can also be provided to the business users in different ways:</p> <ul style="list-style-type: none"> <li>• You can export them to an XLSX or CSV file using Collibra workflows. However, this file will be attached to a community or domain within Collibra.</li> <li>• You can use the Collibra APIs to pull information from Collibra via external orchestrators, ETL tools, or programming languages.</li> </ul> <p>To indicate that the code sets are published, you can <a href="#">create</a> a status, for example, <b>Published</b>.</p>
5. Use and maintain	<p>Finally, the business users use the published code sets in their own applications, for example, in reporting software.</p> <p>Typically, there will be inconsistencies or incompleteness in the code sets. These issues can be reported, which starts a workflow to fix the issue.</p>

# Approaches to reference data management

There are several general approaches to reference data management:

1. Represent the code values as attributes of a Business Asset.
2. Use relations between Code Value assets and Business Terms.

## Approach 1: Code values as attributes of Business Assets

### Prerequisites

- You have [created a new asset type](#) to use as the reference point for information about the code value. This is typically a child asset type of Business Asset or Business Term.
- You have [created](#) or [imported assets](#) of your new asset type for all code values.
- You have [created a custom attribute type](#) for each code set, for example ISO-2-digit, ISO-3-digit, and ISO Numeric.
- You have [assigned](#) the custom attribute types to the new asset type.

### Approach

For each of the assets that represent a code value, enter the code values in the relevant attribute.

Example

The screenshot displays a user interface for managing business terms. At the top, there is a navigation bar with a 'Browse' button, a search field, and a 'Tasks' indicator showing 1 task. The main header identifies the user as 'Business Steward John Fisher' and shows a '100%' completion status. Below this, the specific business term 'Andorra' is shown with a type of 'Business Term' and a status of 'Accepted'. Action buttons for 'Add comment without form', 'Edit', 'Move', and 'Delete' are visible. The main content area is divided into sections: 'Country code' with values 'CC-AD', 'AND', and 'AD'; 'Tags' with a note that no value has been given yet; and 'Comments' with a text input field and a note that there are no comments yet. A left-hand navigation menu includes options like 'Overview', 'Tags', 'Comments', 'Diagram', 'Pictures', 'Responsibilities', 'References', 'History', and 'Files'.

## Advantages

- This approach provides a simple overview of all code values on the asset page, which can suffice if the following conditions are met:
  - The code sets are very stable.
  - You will not add new code sets.
  - The code values do not need to be traced to other assets.
  - You don't want to reuse the codes for other assets.

## Disadvantages and limitations

- This approach does not allow for traceability:
  - You cannot see that the 2-digit country code is a value from a code set, or a column in a database.
  - You cannot easily see for which other assets each 2-digit country code is used.
  - You cannot link the 2-digit country codes to 3-digit country codes. As a consequence, you also cannot represent transformation logic.

- Each code set requires a different attribute type.
- The code sets are hard to maintain, especially if the code values are updated, for example an existing value is changed or a new code value is added,

## Approach 2: Code values as assets with a relation to Business Terms

### Prerequisites

- You have created Business Term assets for all code values.
- You have imported all Code Value assets, for example the ISO-2-digit, ISO-3-digit, and ISO Numeric data.
- You have created a Code Set asset for each code set.
- You have created relations of the type "Code Value is part of / contains Code Set" between the Code Value assets and the Code Set assets.

### Approach

For each of the Business Term assets, you can create a relation of the type "Business Term has code / is code for Code Value" to the equivalent Code Value assets.

## Example Asset Page:

The screenshot shows the 'Andorra' Business Term asset page. The top navigation bar includes 'Browse', 'Search', and user information for 'Business Steward John Fisher'. The asset details show 'Type: Business Term' and 'Status: Accepted'. A table lists code values:

Name	Domain	Definition
AD	Alpha-2 code	
AND	Alpha-3 code	
CC-AD	CRM country codes	

Below the table are sections for 'Tags' (with a note: 'No value has been given yet. Double click or use the edit button.') and 'Comments' (with a text input field and the message: 'There are no comments yet'). A sidebar on the left contains navigation options: Overview, Tags, Comments, Diagram, Pictures, Responsibilities, References, History, and Files.

## Traceability:

## Advantages

- You don't have to make any changes to the asset types or attribute types.
- Each code value is an asset in itself, so you can manage it accordingly. For example, you can assign **responsibilities** and approve the Code Value assets with workflows.
- You can link each Code Value asset to multiple Business Assets.
- You can create new Code Values assets when required, without having to create or edit attribute types.

- You can use traceability diagrams to visualize the links between the Business Assets and the Code Value assets.

## Disadvantages and limitations

- You need to create Business Assets for all code values.
- If you also need relations between the equivalent Code Value assets, you need a lot of relations.

## Map code values and crosswalks

Different systems may use different [reference data](#) for the same type of information. This leads to problems when these systems exchange information.

### Example

The same organization could use the two-character country ISO codes for its Customer Relationship Management (CRM) system, but the three-character country ISO codes for its Enterprise Resource Planning (ERP) system.

Besides technical problems, business users may have the following questions:

- What version of the ISO country codes is used in each database?
- What is the difference between the version of ISO country codes of last year as compared to the one currently operational internally?
- If I cannot find a code for a specific account or project, whom should I report it to?

To resolve this challenge, you can map equivalent code values by means of complex relations between the corresponding Code Value assets and a Crosswalk asset, which can represent the transformation logic between the code values.

This has the following advantages:

- You can document the crosswalk between the code sets to which the code values belong.
- You can document exceptions and transformation logic between code values.

### Example

A CRM system uses a modified version of the ISO 3-digit Code Set. In the CRM system, the developer added the prefix `CC-` to all the 3-digit ISO codes to show that they are country codes. For example, the code for Andorra is `CC-AND`. The mapping is always based on this Transformation Logic. This logic is important for users and should be described in Collibra Data Intelligence Cloud.

## Prerequisites

- You have imported all Code Value assets, for example the ISO-3-digit, and the CRM country codes.

## Steps

- Create a Crosswalk asset to represent the mapping between the Code Set assets.
- Create a relation of the type "Code Set source of / source Crosswalk" between the Code Set asset that contains the original code values and the Crosswalk asset.
- Create a relation of the type "Code Set target of / target Crosswalk" between the Code Set asset that contains the resulting code values and the Crosswalk asset.
- Create complex relations of the type "Code Mapping crosswalk" between all Code Value assets of the original code set and the corresponding Code Value assets of the resulting code set.
  - In the tab pane, click **Add Characteristic**.
  - Click **Code Mapping crosswalk**.

- c. Enter the required information.

Field	Description
source	The original Code Value asset.
target	The resulting Code Value asset.
crosswalk	The Crosswalk asset that represent the transformation.

- d. Click **Next**.
- e. If required, click **Add Characteristic > Transformation Logic** to describe the transformation.
- f. Click **Finish**.

## Metrics pages

The Metrics pages contain a variety of statistics related to how an application is used. They pages consist of one or more graphs, their legends and some counters.

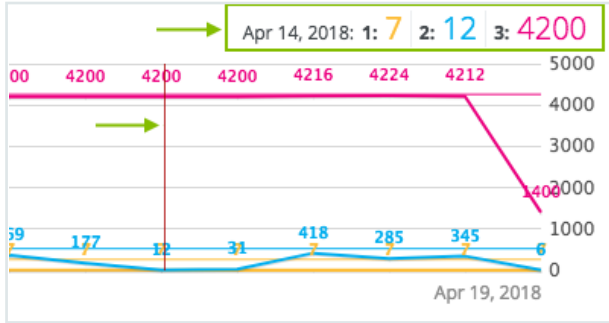

For each graph, you can edit the data set and the time range shown.

**Note** On the **Metrics** page, the lines that are shown on a given graph are called data sets. Do not confuse these with **data sets** in the true context of CollibraData Catalog. On this page, when you click **Add data set**, it simply means that you want to add another line to the graph.

## Components

The Metrics page consists of one or more graphs, their legend and some counters.

Number	Element	Description
1	Color-coded bars	<p>The color-coded bars give a quick overview of the graph.</p> <p>The vertical line leading from the color-coded bar indicates the difference between the minimum and maximum values.</p>
2	Data set details	<p>More details about the graph.</p> <p>Hover your pointer over the color-coded bars to the left of each line of graph to view them.</p>
	Number of elements	The amount of days in the time range.
	Minimum	The lowest count on any day in the data set.
	Q1	The first quartile, meaning the lowest 25% of the data set.
	Median	The median, meaning the middle value of the data set.
	Q3	The third quartile, meaning the lowest 75% of the data set.
	Maximum	The highest count on any day in the time range.
3	Graph	<p>The actual graph. What it shows exactly, depends on the data set. For example, it can show the number of assets viewed over the last month, or the number of licenses used.</p> <div style="border: 1px solid #ccc; background-color: #f0f0f0; padding: 5px; margin-top: 10px;"> <p><b>Tip</b> You can <a href="#">edit</a> the time range of the graph.</p> </div>
4	Counts by day	<p>The counts for a specific day for each data set, by moving your mouse over the graph. The vertical red line identifies the day. The exact count for that day for each data set, is shown above the graph.</p> 

Number	Element	Description
5	Legend	The legend of the graph, which also allows you to <a href="#">add</a> , <a href="#">edit</a> and <a href="#">delete</a> the data sets.

## Add a data set to a metrics graph

You can add a data set to a graph on the [Metrics pages](#), for example if you want to compare the amount of new assets of different types.

### Steps

1. Open the product for which you want to see the metrics, for example Business Glossary.
2. In the submenu, click **Metrics**.
  - » The [Metrics page](#) appears.
3. Under the relevant graph, to the right, click **Add data set**.
  - » The filter settings appear.
4. Enter the required information:

Filter setting	Description
Filter Type	The type of data that will be counted. Depending on the filter type that you select, different fields become available.
Active Users	A daily count of the active users to have viewed the relevant assets. You can restrict the count results via the following additional filters: <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Product:</b> Limit the results to active users within a specific Collibra Data Intelligence Cloud application.</li> <li>◦ <b>Role:</b> Limit the results to active users that have been assigned a specific role.</li> </ul>

Filter setting	Description
Asset Count	<p>A daily count of the relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Status:</b> Limit the results to assets with a specific status.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>
Changed Task Count	<p>A daily count of workflow tasks that have been changed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>
Domain Count	<p>A daily count of the domains with relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>

Filter setting	Description
License Available	<p>A daily count of Collibra licenses that have been available to users.</p> <p>This is calculated by subtracting the licenses in use from the total licenses your organization has.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
License Usage	<p>A daily count of Collibra licenses in use by all users in your organization.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
Page Hits	<p>A daily count of Collibra asset page hits.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> </ul>
Task Count	<p>A daily count of workflow tasks carried out.</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>

Filter setting	Description
Task Duration	<p>A daily count of workflow task duration.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> </ul>

5. Click **Save data set**.

## Edit a data set of a metrics graph

You can edit the data set that is shown in a graph on the [Metrics pages](#).

### Steps

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The [Metrics page](#) appears.
3. In the legend under the relevant graph, click the data set you want to edit.

- » The filter configuration for the data set appears.
4. Enter the required information.

Filter setting	Description
Filter Type	<p>The type of data that will be counted.</p> <p>Depending on the filter type that you select, different fields become available.</p>

Filter setting	Description
Active Users	<p>A daily count of the active users to have viewed the relevant assets.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Product:</b> Limit the results to active users within a specific Collibra Data Intelligence Cloud application.</li> <li>◦ <b>Role:</b> Limit the results to active users that have been assigned a specific role.</li> </ul>
Asset Count	<p>A daily count of the relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Status:</b> Limit the results to assets with a specific status.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>
Changed Task Count	<p>A daily count of workflow tasks that have been changed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>

Filter setting	Description
Domain Count	<p>A daily count of the domains with relevant assets (either data or technology assets) that have been viewed.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Type:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> </ul>
License Available	<p>A daily count of Collibra licenses that have been available to users.</p> <p>This is calculated by subtracting the licenses in use from the total licenses your organization has.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to a specific type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
License Usage	<p>A daily count of Collibra licenses in use by all users in your organization.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>License:</b> Limit the results to active users with a specific license type.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> </ul>
Page Hits	<p>A daily count of Collibra asset page hits.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Domain:</b> Limit the results to assets from a specific domain.</li> </ul>

Filter setting	Description
Task Count	<p>A daily count of workflow tasks carried out.</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task Status:</b> Limit the results to tasks that have a specific status (<b>Completed, Deleted or Unfinished</b>).</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> </ul>
Task Duration	<p>A daily count of workflow task duration.</p> <p>You can restrict the count results via the following additional filters:</p> <ul style="list-style-type: none"> <li>◦ <b>Workflow:</b> Limit the results to a task in a specific workflow.</li> <li>◦ <b>Task Type:</b> Limit the results to tasks of a specific type.</li> <li>◦ <b>User:</b> Limit the results to a specific user.</li> <li>◦ <b>Count Operation:</b> Select the operation by which the results are shown in the template. For example, the sum of all values, the highest value or the lowest value each day over the last month.</li> <li>◦ <b>Community:</b> Limit the results to a specific community.</li> <li>◦ <b>Task:</b> Limit the results to a specific task.</li> </ul>

5. Click **Save data set**.
  - » The updated data set is shown in the graph.

## Edit the time range of a metrics graph

By default, the graphs on the [Metrics pages](#) are shown in daily increments, over a time range of one month. However, you can edit the time range to suit your needs.

There are two ways to edit the time range:

- Click and drag in the graph.
- Select the dates for the graph.

## Click and drag in the graph

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The **Metrics** page appears.
3. Optionally, **Add a data set to a metrics graph** a data set to a graph.
4. In the relevant graph, click at (or near) the first date in your desired range, and drag to the right, toward the last date in your desired range.
  - » While you are dragging, the color changes in the graph, indicating the resulting time range.

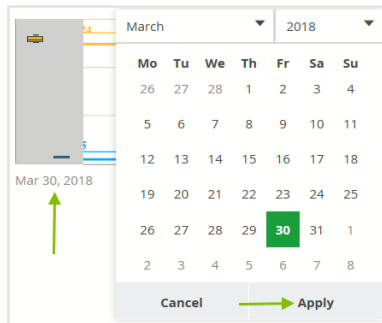

5. Release the mouse button.
  - » The graph is adjusted to the new time range.

## Select the dates for the graph

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The **Metrics** page appears.
3. Optionally, **Add a data set to a metrics graph** a data set to a graph.

4. On the left-hand side of the graph, click the date.
  - » A date picker appears.

5. Click the first day of your desired time range, and then click **Apply**.
  - » The graph is adjusted to the date you selected.
6. On the right-hand side of the graph, click on the date.
  - » A date picker appears.
7. Click the last day of your desired time range, and then click **Apply**.
  - » The graph is adjusted to the date you selected.

## Remove a data set from a metrics graph

You can remove a data set that is shown in a graph on the [Metrics pages](#) if you don't want to see, for example, if you think there is too much information in a graph.

**Note** Each graph will always show at least one data set. If it only contains one data set and you want to remove it, you first have to [Add a data set to a metrics graph](#) another data set. You can then remove the other one.

### Steps

1. Open the product for which you want to create an asset, for example **Business Glossary**.
2. In the submenu, click **Metrics**.
  - » The [Metrics page](#) appears.
3. In the legend under the relevant graph, click on  next to the data set you want to delete.

» The graph is updated.

# Collibra Assessments

Assessments help you to validate the risks related to the personal data of your data subjects as a result of your business processes. They form an integral part of every privacy program.

Collibra Assessments enables you to create [assessment templates](#) and use these templates to [conduct](#) assessments.

## Enable or disable Collibra Assessments

Collibra Assessments is packaged with Collibra Data Intelligence Cloud and is enabled by default.

If you are using an on-premises version of Collibra, you can disable and enable Collibra Assessments on your own. If, however, you are using a cloud version of Collibra, you need to open a ticket with your Collibra representative.

**Note** If you disable Collibra Assessments, the [packaged resources](#) remain in your Collibra environment. We recommend that you do not delete these resources if you intend to re-enable Collibra Assessments at a later date.

## Steps

1. Open Collibra Console.
  - » Collibra Console opens with the **Infrastructure** page.
2. In the tab pane, expand an environment to show its services.
3. In the tab pane, click the Data Governance Center service of that environment.
4. Click **Infrastructure configuration**.
5. Click **Edit configuration**.
6. In the tab pane, click **JVM configuration**.

7. Scroll to the bottom, and in the empty field, enter one of the following:
  - `-Dfeature.assessments=false`: Disables Collibra Assessments.
  - `-Dfeature.assessments=true`: Enables Collibra Assessments.
8. Click **Save all**.
9. Restart your Collibra environment.

## Open Collibra Assessments

### Requirements and permissions

You have a [global role](#) that has the [Assessments global permission](#).

### Steps

On the main menu, click , and then click **Assessments**.

» The **Assessments** landing page opens. The table that is shown on this page contains public assessments; the assessments that you created; and the assessments that you are [permitted](#) to view.

Assessment	Assessment Template	Status	Owner	Assignees	Last updated on
The form Layout	Full form test (v1)	Submitted	 Admin Istrator		05-Jan-2023
Business Process represents Data Set 1	DPIA Threshold (v2)	Draft	 Admin Istrator		03-Jan-2023

### Assessments landing page

The following table describes the columns that are shown in the table on the **Assessments** landing page.

Column	Description
Assessment	The name of the assessment.
Assessment Template	The template that was used to conduct the assessment.
Status	The status of the assessment.
Owner	The name of the user who owns the assessment.
Assignees	The names of the users who are <a href="#">assigned</a> to the assessment.
Last Updated On	The date when the assessment was last updated.

## What's next?

[Create a template](#) or [Conduct an assessment](#).

# Data Privacy assessments

While you can use [Collibra Assessments](#) to create your own templates for assessing assets, Collibra Assessments is packaged with templates that address data privacy. The following table describes the types of the Privacy assessment templates that are shown in the [template gallery](#) of Collibra Assessments.

Type	Assessment template	Description
Privacy Impact Assessment	<ul style="list-style-type: none"><li>• DPIA</li><li>• PIA</li></ul>	Templates for Data Protection Impact Assessment (DPIA) and Privacy Impact Assessment (PIA).
Validation Test Assessment	<ul style="list-style-type: none"><li>• DPIA Threshold</li><li>• PIA Threshold</li></ul>	Templates for threshold assessments to determine the need for DPIA and PIA.
Balancing Test Assessment	LIA	Template to determine the legitimate interests of a business process.

## Packaged resources for Assessments

Collibra Data Intelligence Cloud is packaged with the following three resources, which are related to Collibra Assessments.

## New Assessments domain

The **New Assessments** domain:

- Is in the Data Governance Council community.
- Is of the Assessment Review Register domain type.

- Can be selected as the domain for a new Assessment Review asset when [submitting](#) an assessment for review.

**Tip** Ensure that the [required responsibilities](#) exist for the **New Assessments** domain.

## Assessment Review asset type

If the **Governance** checkbox is selected in the template that is used in an assessment, when you submit the assessment for review, an Assessment Review asset is created in the domain of your choice.

## Relation type

Head	Role	Co-role	Tail
Asset	is assessed by	assesses	Assessment Review

## Required license, permissions, and responsibilities

To [submit](#) an assessment, you need the following:

- The **Standard** license.
- A resource role that has the following resource permissions for the domain that you select when submitting an assessment:
  - **Asset > Add**
  - **Attribute > Add**

**Tip** The necessary [resource permissions](#) are preconfigured for certain packaged [resource roles](#) such as Business User and Business Steward.

- A [responsibility](#) to act on the resource permissions that are conveyed to you via the resource role.

**Warning** If the **Governance** checkbox is selected in the template that is used in an assessment, when you submit the assessment for review, an Assessment Review asset is created in your Collibra environment. For the **Assessments Approval workflow** to work, a Business Steward (by default) must be **assigned** to the domain selected when submitting an assessment. If the workflow was configured for a different resource role, the domain must have a responsibility **created** for that resource role.

## Assessment templates

An assessment template is a set of questions designed to elicit information during an assessment. When **conducting** an assessment, you can provide information via the **questions** added to the template used in the assessment.

An assessment template can serve as an approved assessment from which to conduct an assessment, or a starting point from which to design customized templates. You can **publish** your customized templates to make them available for use throughout your organization.

Data Privacy is packaged with assessment templates that you can use as they are, or that you can **copy** and then **edit** to suit your needs. All versions of the templates are stored in the Collibra repository.

## Template gallery

**Template gallery** is a page in Collibra Assessments that contains both packaged assessment templates and customized assessment templates.

This topic describes how to open the **Template gallery** page and what is shown on the page.

## Open the Template gallery page

### Steps

1. [Open Collibra Assessments](#) Collibra Assessments.
2. Click **Template gallery**.
  - » The **Template gallery** page opens.

## Template gallery page

The **Template gallery** page contains the following sections:

- **Privacy assessment templates:** Shows packaged assessment templates related to Data Privacy.
- **Custom templates:** Shows assessment templates that you have [created](#), including copies of packaged Privacy assessment templates.

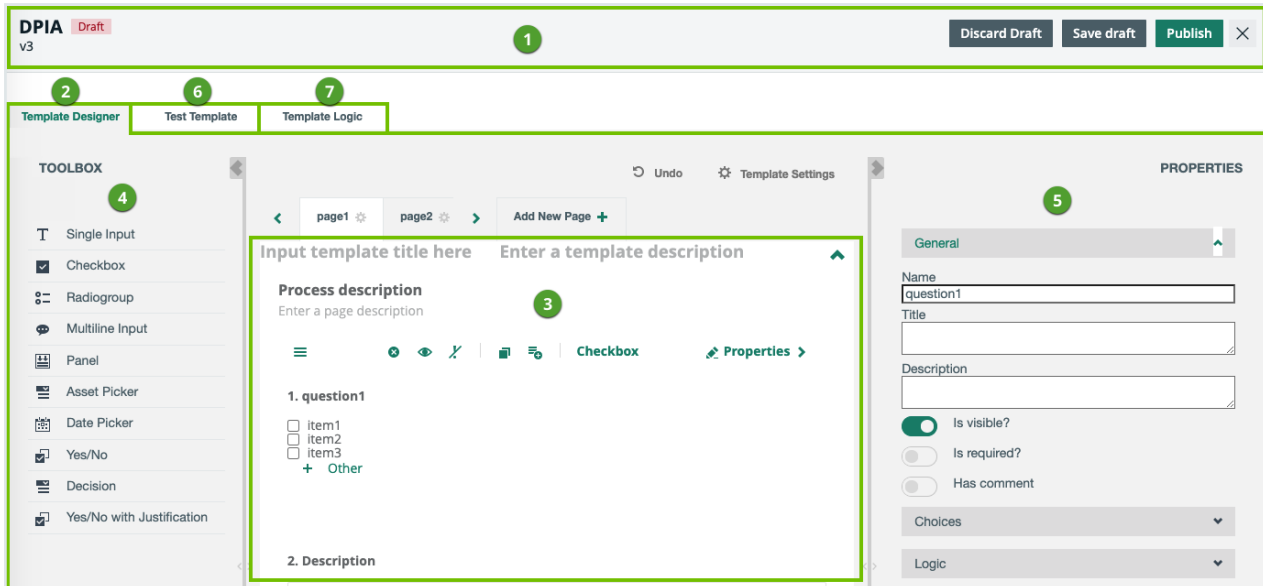

Each assessment template is shown as a tile containing the following details:

- The title of the template
- The status of the template (**Draft** or **Published**)
- A description of the template (if available)
- The version of the template (for example, **v1** or **v2**)

Note You can [copy](#) packaged templates. You cannot, however, edit or delete packaged templates. The status of packaged templates is **Published**. The version of packaged templates is controlled by Collibra.

## Template editor

The template editor enables you to [copy](#) packaged [Privacy assessment templates](#) or [create](#) your own assessment templates.

The following table describes the sections and the tabs shown on the template editor.

No.	Section/Tab	Description
1	Action bar	<ul style="list-style-type: none"> <li>• Template title, status, and version number.</li> <li>• Buttons to copy the template, discard or save a draft of the template, and publish the template.</li> </ul> <p>Note The availability of the buttons depends on the type of the template (packaged or customized) and the status of the template.</p>
2	Template Designer	<ul style="list-style-type: none"> <li>• Tabs for the various pages in the template.</li> <li>• The <b>Undo</b> button to revert the last edit you made to the template.</li> <li>• The <b>Template Settings</b> button to view the basic properties of the template, such as the title, the description, and the target asset type to be assessed.</li> </ul>
3	Canvas	The body of the <b>Template Designer</b> tab where you can add questions and <a href="#">work</a> with them.
4	Toolbox	Types of question, such as checkbox, comment, and date picker.
5	Properties	Context-specific settings, based on the active page or question in the building area.

No.	Section/Tab	Description
6	Test Template	A preview of the result of your work on the <b>Template Designer</b> tab. On the <b>Test Template</b> tab, you can respond to your questions to test, for example, how the configured <b>logic</b> will work when conducting an assessment.
7	Template Logic	Logic conditions configured in the template. On the <b>Template Logic</b> tab, you can <b>add</b> , <b>edit</b> , and <b>delete</b> logic conditions.

## Create a template

This topic describes how to create an assessment **template** using a basic flow.

### Requirements and permissions

You have a **global role** that has the **Assessments global permission**.

### Steps

1. Open the **Template gallery** page.
2. Click **Create new template**.
  - » The **Template editor** page opens.
3. Enter the required information.

#### Details

Section/Tab	Field	Description
Properties	Title	Enter a title for the template.
	Description (optional)	Enter a description for the template.
	Asset type (optional)	Select the <a href="#">target asset type</a> to be assessed.
	Governance (optional)	If you want an asset to be created and the Assessments Approval workflow to be triggered when an assessment is conducted using this template, select the <b>Governance</b> checkbox. For more information, go to <a href="#">Governance for assessments</a> .
Canvas > Page	Input page title here	Enter a title for the page.
	Enter a page description	Enter a description for the page.
Toolbox		Drag the required question type to the required location on the canvas.

4. [Configure](#) the settings for the questions.
5. [Configure](#) the logic conditions for the questions.
6. Add more pages and more questions, as needed.

**Note** Each page of a template appears as a separate section in the assessment.

7. Click **Save draft**.
  - » The template is created with the version as **v1** and the status as **Draft**.

**Tip** The new template is shown in the **Custom templates** section on the [template gallery](#).

## What's next?

- [Publish](#) the template.
- [Export](#) the template.

## Action bar

The [action bar](#) of an assessment template shows the name, status (**Draft** or **Published**), and version of the template (for example, **v1** or **v2**). In addition, the action bar allows you to control the status of the template and publish the template for use throughout your organization. The following table describes the buttons shown on the action bar.

Button	Description
Copy template	<p>This button is shown only on a packaged template. The button enables you to make a copy of the packaged template.</p> <p><b>Note</b> The new template (copy) is added to the <b>Custom templates</b> section of the <a href="#">template gallery</a>, with the version as <b>v1</b> and the status as <b>Draft</b>.</p>
Discard draft	<p>This button is shown only on a customized template that is in the <b>Draft</b> status. The button enables you to <a href="#">revert</a> to the previous version of the template, regardless of the status of the template and whether or not you edited the template.</p> <p><b>Note</b></p> <ul style="list-style-type: none"> <li>• If you revert to a previous version of a v1 template, the template is permanently deleted from the template gallery. All published versions, however, remain archived in the Collibra repository.</li> <li>• You can <a href="#">copy</a> packaged templates. You cannot, however, edit or delete packaged templates. The status of packaged templates is <b>Published</b>. The version of packaged templates is controlled by Collibra.</li> </ul>

Button	Description
Save draft	<p>This button is shown only on a customized template that is in the <b>Draft</b> or <b>Published</b> status, and this button is enabled only when you edit the template. The button enables you to save the changes that you have made to the template.</p> <div data-bbox="368 468 1418 741" style="background-color: #f0f0f0; padding: 10px;"> <p>Note</p> <ul style="list-style-type: none"> <li>• If the status of the template is <b>Draft</b> and you click <b>Save draft</b>, the status remains <b>Draft</b> and the version does not change.</li> <li>• If the status of the template is <b>Published</b> and you click <b>Save draft</b>, the status becomes <b>Draft</b> and the version increases incrementally, even if you did not edit the template.</li> </ul> </div>
Publish	<p>This button is shown only on a customized template that is in the <b>Draft</b> or <b>Published</b> status, and this button is enabled only when you edit the template. The button enables you to publish the template, which changes the status of the template to <b>Published</b>.</p> <div data-bbox="368 969 1418 1243" style="background-color: #f0f0f0; padding: 10px;"> <p>Note</p> <ul style="list-style-type: none"> <li>• If the status of the template is <b>Draft</b> and you click <b>Publish</b>, the status becomes <b>Published</b> and the version does not change.</li> <li>• If the status of the template is <b>Published</b> and you click <b>Publish</b>, the status remains <b>Published</b> and the version increases incrementally, even if you did not edit the template.</li> </ul> </div>
✕	<p>This button closes the template without saving your changes.</p> <div data-bbox="368 1339 1418 1435" style="background-color: #f0f0f0; padding: 10px;"> <p>Note If you click the button, the status and version of the template do not change.</p> </div>

## Toolbox

The **toolbox** on the **Template Designer** tab of an assessment template contains various types of questions, such as checkboxes, text boxes, and date pickers. You can use these question types to add questions and statements to the canvas to elicit input from the user conducting an assessment.

## Tip

- Click a question type to add it to the current page or click and drag to a specific location on the page.
- You can also [add](#) a question to the toolbox.

Question type	Allows you to...
Single Input	Enter a single line of text.
Checkbox	Select one or more of the predefined values.
Radiogroup	Select only one of the predefined values.
Multiline Input	Enter multiple lines of text.
Panel	<p>Frame two or more questions, typically in reference to another question.</p> <div style="border: 1px solid #ccc; padding: 10px; margin-top: 10px;"> <p>Tip Let's imagine you have a Radiogroup question that asks if the organization has identified all Controllers. The possible responses are "Yes" and "No". You could then:</p> <ul style="list-style-type: none"> <li>• Follow this question with a Panel that contains three additional Controller-specific questions.</li> <li>• <a href="#">Configure</a> a logic condition so that the Panel and the three questions it frames appear if the response to the Radiogroup question is "No".</li> </ul> </div>
Asset Picker	Select one or more assets of a predefined asset type.
Date Picker	Enter a date.
Yes/No	Select "Yes" or "No".
Decision	<p>Return the value "Yes" or "No", based on the scoring of Yes/No questions and a scoring threshold.</p> <p>For more information, see <a href="#">Working with scores and decisions</a>.</p>
Yes/No with Justification	Select "Yes" or "No" and enter a free-text justification.

## Asset type in a template

When [creating](#), [copying](#), or [editing](#) a template, you can select an asset type in the template. This allows users to select from a list of assets of the selected asset type when conducting assessments using that template.

### Note

- If a template does not have an asset type, when users conduct an assessment using the template, they cannot select an asset to assess. They can, however, enter a description of what they want to assess.
- Even if a template has an asset type, when users conduct an assessment using the template, they can choose not to select an asset.
- When an assessment without an asset is submitted for review, the Assessment Review asset that is subsequently created in Collibra does not have a relation to an underlying asset.

## Working with questions

The [toolbox](#) on the **Template Designer** tab of an assessment template contains various types of questions, such as checkboxes, text boxes, and date pickers. You can use these question types to add questions and statements to the canvas to elicit input from the user conducting an assessment.

Click a question on the canvas to view the available settings.

Icon	Description
	<p>Edit the title.</p> <p>The edit icon appears when you hover over the question title. Alternatively, you can provide a title in the <a href="#">Properties</a>.</p>

Icon	Description
	<p>Click and drag the question to a different location on the page.</p> <p><b>Tip</b> To move a question to another page, you can:</p> <ol style="list-style-type: none"> <li>1. Click  to add the question to the toolbox.</li> <li>2. Go to the page on which you want to add the question.</li> <li>3. Drag the question from the toolbox to the page.</li> </ol>
	<p>Delete the question from the building area.</p> <p><b>Tip</b> If you think you might want to use the question at a later time, or add it to another page, you can click , to <b>add</b> the question to the toolbox. Deleting a question from the building area does not delete it from the toolbox.</p>
	<p>Specify whether or not the question title is visible.</p>
 	<p>Specify whether a response to the question is optional or mandatory.</p> <p>Click to toggle between the two conditions.</p> <p> : Optional (default)</p> <p> : Mandatory</p>
	<p>Copy the question. The copy appears directly below the active question.</p>
	<p>Add the question to the toolbox.</p> <p><b>Note</b> You can add up to three questions, for a total of 13 question types in the toolbox. If you have 13 questions types and you add another one, the last question type in the toolbox is overwritten.</p>

Icon	Description
Question type label, for example 	The question type.  For some question types, you can click this button to toggle between two similar question types. Specifically: <ul style="list-style-type: none"> <li>• If the question type is Single input, you can click this button to change it to a Comment, and vice versa.</li> <li>• If the question type is Checkbox, you can click this button to change it to a Radiogroup, and vice versa.</li> </ul>
	Click to show the question properties in the <b>Properties</b> .
	Click to add another choice to radiogroup or checkbox question.

## Add a question to the toolbox

The **toolbox** includes a set of question types. You can customize the toolbox by adding up to three questions from the building area. These question can then be reused throughout your template.

**Tip** This is helpful if, for example, you **configure** a checkbox question with the following values:

- Successfully implemented
- Partially implemented or planned
- Not yet implemented or planned
- Not applicable

If you then add the question to the toolbox, you can reuse the question throughout your template, without having to configure the values each time.

**Note** Any questions you add are not saved in the toolbox when you close the template, even if you save the changes you made in the template.

## Prerequisites

You have a **global role** that has the **Assessments global permission**.

## Steps

1. Open the [Template gallery](#) page and open a template, or [create](#) a new template.
  2. Click on a question in the building area or add one to the building area.
  3. Configure the question to suit your needs.
  4. Click .
- » The question is added to the toolbox, as an additional question type.

**Note** You can add up to three questions, for a total of 13 question types in the toolbox. If you have 13 questions types and you add another one, the last question type in the toolbox is overwritten.

## Configure values for checkbox a radiogroup questions

You can configure the values for checkbox and radiogroup [questions](#).

### Prerequisites

You have a [global role](#) that has the **Assessments global permission**.

## Steps

1. Open the [Template gallery](#) page and open a template, or [create](#) a new template.
2. Click the relevant question or add a new question to the building area.
3. Do any the following:
  - Click  next to a value, to edit the label.
  - Click  next to a value and drag to reorder it among the other values.
  - Click  next to a value, to delete it.
  - Click  to add another value.
  - In **Properties**, expand the **Choices** section and select **Has other item**, to allow users to select the value "Other" and add free-text clarification.

## Yes/No question scores and decisions

You can configure a series of Yes/No questions, followed by a Decision question, so that when an assessment is conducted, the responses to the Yes/No questions determine the value shown in the Decision question.

You can [assign](#) weighted values, or scores, to Yes/No questions in your template. Then, if the response to a question is "Yes", the specified score is added to a total score. If the response is "No", the specified score is not added to the total score.

If the total score reaches a specified scoring threshold:

- Your Decision question returns the value "Yes", as the final decision.

- When the assessment is submitted for review, the assessment details page includes a button by which you can launch the resulting assessment, as specified when configuring the Decision question.

For more information on question types, see [The toolbox](#).

### Example

In this example, you design a template with the following:

- Yes/No questions and properties:

Question type	Title	Score property
Yes/No	Does the processing activity present a high level of risk for the rights and freedoms of the concerned data subjects?	2
Yes/No	Does the processing activity make innovative use of new technological or organizational solutions?	1
Yes/No	Does the processing activity match or combine data sets?	1

- Decision question and properties:

Question type	Title	Score threshold property	Assessment template property
Decision	Is a DPIA required for the Business Process asset?	2	DPIA

## Result

During an assessment, the scores are added for each question to which the response is "Yes". If the total is less than 2, the decision for the question "Is a DPIA required for this asset?", is "No". If the sum is equal or greater than 2, the decision is "Yes".

### Configure Yes/No question scores and decisions

You can assign weighted scores to [Yes/No questions](#) in your template. The scores are used to determine the decision shown to the user in your Decision question.

For more information on question types, see [The toolbox](#).

## Prerequisites

You have a [global role](#) that has the **Assessments global permission**.

## Steps

1. Open the [Template gallery](#) page and open a template, or [create](#) a new template.
2. Add Yes/No questions to the template, or work with the existing Yes/No questions. You can also use Yes/No with Justification questions.

3. For the relevant Yes/No questions, specify the following properties:

Property	Description
Title	<p>The question or statement.</p> <p><b>Example</b> "Does the processing activity present a high level of risk for the rights and freedoms of the concerned data subjects?"</p>
Score	<p>The score for the question or statement.</p> <p><b>Note</b> The score is added to the total if the user responds "Yes" to the question. If the user responds "No", the score is ignored.</p>

4. In a Decision question, specify in the following properties:

Property	Description
Title	<p>The question that appears in the final decision. Consider the fact that the decision value shown in the final decision will be "Yes" or "No".</p> <p>This should be in the form of a question. If the score threshold is met, the value returned is "Yes". If not, the value returned is "No".</p> <p><b>Example</b> "Is a DPIA required for the Business Process asset?"</p>
Score threshold	<p>The limit at, or beyond, which the Decision question returns the value "Yes".</p>
Assessment template	<p>The assessment that should be conducted if the scoring threshold is met.</p> <p><b>Note</b> When the assessment is submitted for review, the <a href="#">assessment details page</a> includes a button to launch the assessment you specify here.</p>

## Properties

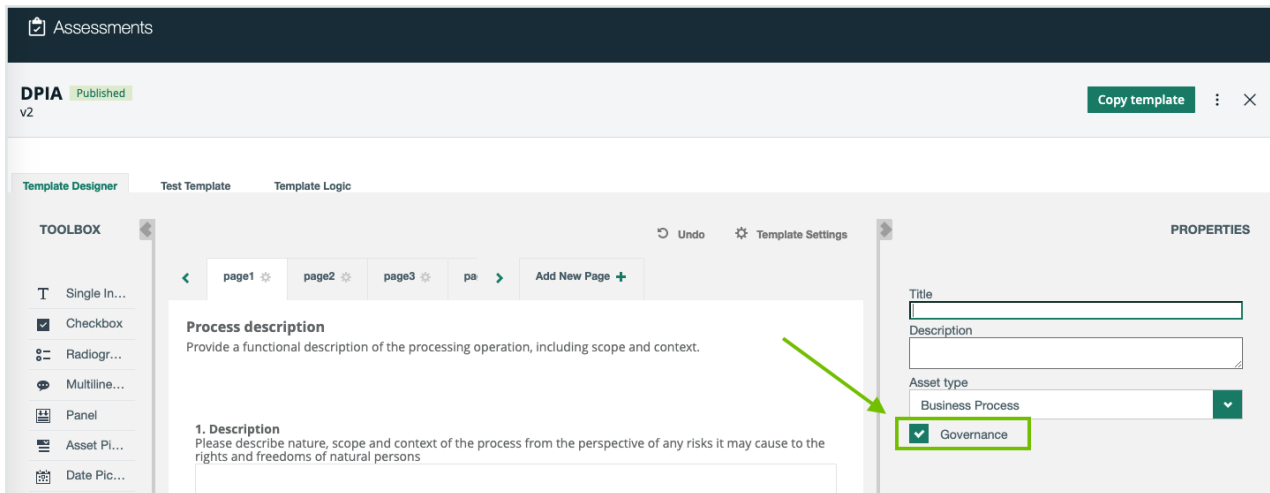

The **Properties** section on the [Template Designer tab](#) contains context-specific settings, based on the active page or question in the questions building area.

Property	Description
General	
Name	The ID of a question. Applies only to questions, not pages.
Score	The score allows you to give weighted importance to questions. This property is used in conjunction with the "Score threshold" and "Assessment template" properties described in this table. For more information, see <a href="#">Working with scores and decisions</a> .
Title	The title of the template, page or question. The title of a question is the actual question or statement put forth in the assessment, for example "Have you identified all Controllers?"
Description	A description of the template, page or question.
Governance	The <b>Governance</b> option of an assessment template determines whether or not an assessment conducted from the template will create an asset in your Collibra environment and trigger the Assessments Approval workflow. For more information, go to <a href="#">Governance for assessments</a> .
Auto number questions	Determines whether or not the questions in your template are automatically numbered in the order they are arranged in the building area.
Is visible?	Determines whether or not the question is visible during an assessment.
Is required?	Determines whether the question is optional or mandatory, when conducting an assessment.
Input placeholder	Allows you to enter text that appears in a text field. The text is overwritten when the user enters text in the field.
Has comment	Determines whether or not a free-text field is available, allowing users to enter a comment pertaining to the question.
Comment text	Text that accompanies a free-text field that is available to users if you enable the "Has comment" property.

Property	Description
Score threshold	<p>The value at, or above which, the accompanying Decision question returns a "Yes" value.</p> <p>This is property is used in conjunction with the "Score" and "Assessment template" properties described in this table.</p> <p>For more information, see <a href="#">Working with scores and decisions</a>.</p>
Assessment template	<p>The template to use for the assessment that should be conducted if the value in the "Score threshold" property is reached.</p> <p>This is property is used in conjunction with the "Score" and "Score threshold" properties described in this table.</p> <p>For more information, see <a href="#">Working with scores and decisions</a>.</p>
Choice	
Has other Item	Allows you to select the value "Other" and add free-text clarification.
Logic	<p>Allows you to define the logic for the selected question.</p> <p>See:</p> <ul style="list-style-type: none"> <li>• <a href="#">Logic settings in the Template Designer tab</a></li> <li>• <a href="#">Logic settings in the Template Logic tab</a></li> </ul>

## Governance for assessments

The **Governance** option is available in the **PROPERTIES** section on the **Template Designer** tab. The **Governance** option of an assessment template determines whether or not an assessment conducted from the template will create an asset in your Collibra environment and trigger the Assessments Approval workflow.

The **Governance** option enables the automatic creation of an asset in Collibra to represent an assessment in Collibra Assessments when the assessment is submitted. The assessment asset created in Collibra can be linked to other assets, for example, Business Process or Data Category.

### What happens if the Governance option is selected or cleared?

The following table describes the outcome of selecting and clearing the **Governance** option on an assessment template.

Status	Description
Selected	<p>When you conduct an assessment that uses the template, the <b>Submit</b> button is available.</p> <p>When you click <b>Submit</b>:</p> <ul style="list-style-type: none"> <li>• The status of the assessment changes from <b>Draft</b> to <b>Submitted</b>.</li> <li>• An Assessment Review asset in the <b>Under Review</b> status is created in your Collibra environment in the domain that you selected when submitting the assessment.</li> <li>• The <a href="#">Assessments Approval</a> workflow is triggered and a task is assigned to the Business Steward.</li> </ul> <p><b>Tip</b> You can <a href="#">configure</a> the Assessments Approval workflow so that the task is assigned to a different resource role.</p>

Status	Description
Cleared	<p>When you conduct an assessment that uses the template, the <b>Complete</b> button is available.</p> <p>When you click <b>Complete</b>:</p> <ul style="list-style-type: none"> <li>• The status of the assessment changes from <b>Draft</b> to <b>Completed</b>.</li> <li>• No asset is created in your Collibra environment.</li> <li>• The Assessments Approval workflow is not triggered.</li> </ul>

## Configuring logic for questions and pages in a template

For each question or page in a [template](#), you can configure logic, whereby if certain conditions are met, a specified action occurs.

You can [create](#), [edit](#) and [delete](#) logic conditions using:

- The [logic settings in the Template Designer tab](#).
- The [logic settings in the Template Logic tab](#).

### Note

- Any logic that you configure for a given question overrides the **Is visible?** and **Is required?** settings that you may have set in the **General** section in **Properties**.
- Any logic that you configure via the Template Designer tab appears in the Template Logic tab, and vice versa, with the exception of page-related logic conditions, which can only be configured via the Template Designer tab and do not appear in the Template Logic tab.

## Example

Question 6 in your template, a checkbox question type, asks if your organization has reviewed how they ask for and record consent.

Question 7, a date picker question type, asks by when the task will be complete. If the response to Question 6 is "Successfully implemented" or "Not applicable", there is no need to show Question 7.

Therefore, you configure the logic for Question 7, as follows:

- **Visible if:** If the user responds to Question 6 with "Partially implemented or planned" or "Net yet implemented or planned", Question 7 is shown.
- **Required if:** Furthermore, if either of those values are selected for Question 6, Question 7 is a required question.

## Create a logic condition for a question or page

There are two ways to create [logic conditions](#) in your template.

- [Via the Template Designer tab](#)
- [Via the Template Logic tab](#)

**Note** Any logic that you configure via the Template Designer tab appears in the Template Logic tab, and vice versa, with the exception of page-related logic conditions, which can only be configured via the Template Designer tab and do not appear in the Template Logic tab.

## Prerequisites

You have a [global role](#) that has the **Assessments** [global permission](#).

## Via the Template Designer tab

1. Open the [Template gallery](#) page and open a template.
2. Click the question or page tab for which you want to create a logic condition.
3. In the **Properties**, expand the **Logic** settings.
4. Expand the settings for the relevant logic option:
  - a. Visible if
  - b. Enable if
  - c. Required if
5. In the **Select question...** field, select the question to which the user's response can trigger the action.

**Note** The questions are ordered alphabetically, not in the order of which they appear in the template.

6. Click **equals**, and then select a logical operator.

**Note** Not all logical operators are applicable to all question types.

7. Enter or select a value.

## Via the Template Logic tab

**Note** You can only create page-related logic conditions via the Template Design tab.

1. Open the [Template gallery](#) page and open a template.
2. Click the **Template Logic** tab.
  - » A list of all logic conditions configured for the template is shown.
3. Specify the conditions:
  - a. Click **Add New**.
  - b. In the **Select question...** field, select the question to which the user's response can trigger the action.

**Note** The questions are ordered alphabetically, not in the order of which they appear in the template.

- c. Click **equals**, and then select a logical operator.

**Note** Not all logical operators are applicable to all question types.

- d. Enter or select a value.

4. Specify the action that occurs if the conditions are met:

- a. In the **Select an action to add...** drop-down list, select an action type.
- b. In the **Select question...** drop-down list, select the question that will be affected if the conditions are met.

5. Perform one of the following steps:

- Click **Save and return**, to save the configurations and return to the list of logic conditions.
- Click **Save**, to save your configurations.
- Click **Return without saving**, to discard your configurations and return to the list of logic conditions.

## Edit a logic condition for a specific question

There are two ways to edit the [logic conditions](#) in your template.

- [Via the Template Designer tab](#)
- [Via the Template Logic tab](#)

**Note** Any logic that you configure via the Template Designer tab appears in the Template Logic tab, and vice versa, with the exception of page-related logic conditions, which can only be configured via the Template Designer tab and do not appear in the Template Logic tab.

## Prerequisites

You have a [global role](#) that has the **Assessments global permission**.

## Via the Template Designer tab

1. Open the [Template gallery](#) page and open a template.
2. Click the question for which you want to edit the logic.
3. In the **Properties**, expand the **Logic** settings.
4. Expand the settings of the condition you want to edit.
5. Edit the condition to suit your needs.

See [Logic settings in the Template Designer tab](#).

## Via the Template Logic tab

**Note** You can only edit page-related logic conditions via the Template Design tab.

1. Open the [Template gallery](#) page and open a template.
2. Click the **Template Logic** tab.
  - » A list of all conditions configured for the template is shown.
3. Click  next to the condition you want to edit.
4. Edit the condition to suit your needs.

See [Logic settings in the Template Logic tab](#).
5. Perform one of the following steps:
  - Click **Save and return**, to save the configurations and return to the list of logic conditions.
  - Click **Save**, to save your configurations.
  - Click **Return without saving**, to discard your configurations and return to the list of logic conditions.

## Delete a logic condition for a specific question

There are two ways to delete the [logic conditions](#) in your template.

- [Via the Template Designer tab](#)
- [Via the Template Logic tab](#)

**Note** Any logic that you configure via the Template Designer tab appears in the Template Logic tab, and vice versa, with the exception of page-related logic conditions, which can only be configured via the Template Designer tab and do not appear in the Template Logic tab.

## Prerequisites

You have a [global role](#) that has the **Assessments global permission**.

### Via the Template Designer tab

1. Open the [Template gallery](#) page and open a template.
2. Click the question for which you want to configure logic.
3. In the **Properties** section, expand the **Logic** settings.
4. Expand the settings for the condition you want to delete.
5. Click **Remove**.

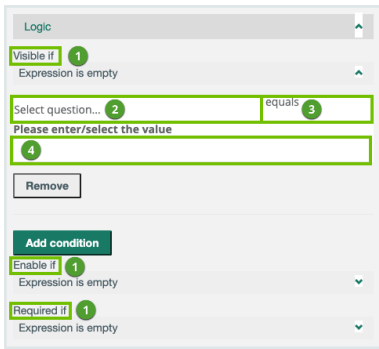

### Via the Template Logic tab

**Note** You can only delete page-related logic conditions via the Template Design tab.

1. Open the [Template gallery](#) page and open a template.
2. Click the **Template Logic** tab.
  - » A list of all conditions configured for the template is shown.
3. Click  at the end of the row of the condition you want to delete.

## Logic settings in the Template Designer tab

The following image shows the logic settings in the **Template Designer** tab.

Number	Setting	Description
1	Visible if	<ul style="list-style-type: none"> <li>• If the conditions are met, the question is shown in the assessment and you can respond to it.</li> <li>• If the conditions are not met, the question is not shown in the assessment.</li> </ul> <p>Note This logic condition overrides the <b>Is visible?</b> setting in the <b>General</b> section in <b>Properties</b>.</p>
	Enable if	<ul style="list-style-type: none"> <li>• If the conditions are met, the question is enables, meaning you can respond to it.</li> <li>• If the conditions are not met, the question is disabled, meaning you cannot respond to it.</li> </ul>
	Required if	<ul style="list-style-type: none"> <li>• If the conditions are met, the question is mandatory and is identified by an asterisk (*). You must respond to mandatory questions before you can submit the assessment for review.</li> <li>• If the conditions are not met, the question is optional. You can submit the assessment for review without having responded to optional questions.</li> </ul> <p>Note This logic condition overrides the <b>Is required?</b> setting in the <b>General</b> section in <b>Properties</b>.</p>
2	Select ques- tion...	The question that determines whether or not the action will happen.

Number	Setting	Description
3	Logical operator	All or some of the following, based on the question type of the selected question. <ul style="list-style-type: none"> <li>• is empty</li> <li>• is not empty</li> <li>• equals (default)</li> <li>• not equals</li> <li>• any of</li> <li>• all of</li> </ul>
4	Value	The response to the question that determines whether or not the action will happen.

## Logic settings in the Template Logic tab

The following image shows the logic settings in the **Template Logic** tab.

Number	Field	Description
1	Select question...	The question that determines whether or not the action will occur. <div style="border: 1px solid #ccc; padding: 10px; margin-top: 10px;"> <p><b>Note</b> In the previous example image, the "End date" question has been selected in order to show the <b>Please enter/select the value</b> field, which only appears once a question is selected.</p> </div>

Number	Field	Description
2	Logical operator	All or some of the following, based on the question type of the selected question. <ul style="list-style-type: none"> <li>• is empty</li> <li>• is not empty</li> <li>• equals (default)</li> <li>• not equals</li> <li>• any of</li> <li>• all of</li> </ul>
3	Please enter/select the value	The response to the question that determines whether or not the action will occur.
4	Select an action to add...	The action that occurs if the conditions are met. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p>Note In the previous example image, the "Question visibility" action has been selected in order to show the <b>Select question...</b> field, which only appears once an action is selected.</p> </div>
5	Select question...	The question that is subject to the action.

## Copy a packaged template

You can copy any of the packaged [templates](#).

### Prerequisites

You have a [global role](#) that has the **Assessments global permission**.

### Steps

1. Open the [Template gallery](#) page and open the packaged template that you want to copy.
2. In the **PROPERTIES** section, in the **Title** field, enter a title to identify the template.
3. Optionally, in the **Properties**: Add a description for your new template. [Specify](#) a target asset type to be assessed. Select or clear the **Governance** checkbox, to enable

or disable [governance](#) for any assessments that will be conducted from this template.

4. Click **Copy template**.

» The new template opens automatically. The template is also added in the **Custom templates** section of the template gallery, as a version 1, with the Draft status.

## What's next?

- [Edit](#) the template.
- [Publish](#) the template.
- [Export](#) the template.

## Edit a template

You can edit any of your custom [templates](#).

**Tip** You cannot edit the packaged templates, but you can [copy](#) them and edit the new templates.

## Prerequisites

You have a [global role](#) that has the **Assessments global permission**.

## Steps

1. Open the [Template gallery](#) page and open one of your customized templates.
2. Edit the template to suit your needs.
3. Click **Save draft**.
  - » If the template you edited:
    - Had the Draft status, the status remains Draft and the version number remains the same.
    - Had the Published status, the status becomes Draft and the version number increases incrementally.

## Discard a draft version of a template

If one of your custom templates is in the Draft status, you can revert the template to its last published version.

### Note

- If your template is in the Published status, you can [delete](#) it, but you cannot revert it to its last version.
- All versions of a template are archived in the DGC database, including the versions that have been deleted from the template gallery.

## Requirements and permissions

You have a [global role](#) that has the **Assessments** [global permission](#).

## Steps

**Note** If you perform the following steps on a template that is in the Draft status and is on v1, the template is instead deleted because a previous version of the template does not exist.

1. Open the [Template gallery](#) page, and then open a template that is in the Draft status.
2. Click **Discard Draft**.
  - » The draft version of the template is deleted and the last published version of the template becomes available.

## Delete a template

You can delete any of your custom [templates](#). You cannot, however, delete the packaged templates.

**Note** An assessment that is in the Draft status and was started using a deleted template is not affected. You can complete the assessment and submit it when you want. You cannot, however:

- Conduct new assessments using a deleted template.
- Copy an assessment that used a deleted template.

## Requirements and permissions

You have a [global role](#) that has the **Assessments** [global permission](#).

## Steps

1. Open the [Template gallery](#) page and open the custom template that you want to delete.
2. In the upper-right corner of the page, click , and then click **Delete**.
  - » The **Confirm delete** dialog box appears.
3. Click **Delete**.

## Publish a template

Although it is more likely that you will publish [templates](#) that have the Draft status, you can also publish templates that have the Published status.

If you publish:

- A template that has the Draft status, the version number is unchanged, but the status becomes Published.
- A template that has the Published status, the status remains Published, but the version number is incrementally updated.

**Note** When [conducting](#) an assessment, in the drop-down list of available assessment types, only the latest versions of published templates are available. If a user starts conducting an assessment with version 1 of a specific template, the template remains unchanged throughout the assessment, even if newer versions of the template have since been published.

## Prerequisites

You have a [global role](#) that has the **Assessments global permission**.

## Steps

1. Open the [Template gallery](#) page and open a template.
2. Optionally, edit the template to suit your needs.
3. Click **Publish**.
  - » The status of the template is Published and it is made available throughout your organization.

## Export a template

If you want to use a published custom assessment template in another Collibra environment, you can export the template and then [import](#) it to the other Collibra environment. You can use this feature when you want to import a custom template from your testing environment to your production environment.

### Note

- You can export only those custom templates whose status is **Published**.
- While you cannot export a packaged assessment template, you can [copy](#) it and then export the copy.

## Requirements and permissions

You have a [global role](#) that has the **Assessments global permission**.

## Steps

1. Open the [Template gallery](#) page.
2. In the **Custom templates** section, click the custom template that you want to export.
3. In the upper-right corner of the page, click , and then click **Export**.
  - » The template is exported to your computer as a JSON file.

## What's next?

[Import](#) the template to another Collibra environment.

## Import a template

You can import the custom template that was [exported](#). You can use this feature when you want to import a custom template from your testing environment to your production environment.

## Requirements and permissions

You have a [global role](#) that has the **Assessments global permission**.

## Before you begin

[Export](#) the custom template that you want to import.

## Steps

1. Open the [Template gallery](#) page.
2. In the **Custom templates** section, click  , and then click **Import template**.
  - » The **Import template** dialog box appears.
3. Click **Upload template**, and then select the template that you want to import.

**Tip** If a template of the same name already exists in your environment, you are prompted to enter a new name for the template that you are importing.

4. Click **Import**.
  - » A message stating that the template is imported appears. The template is added to the **Custom templates**.

**Note**

- The status of an imported template is **Published**.
- The version of an imported template is **v1**, regardless of the version of the template that was exported for the import.

## Assessments

Assessments help you to validate the risks related to the personal data of your data subjects as a result of your business processes. You can [conduct](#) an assessment of an asset via Collibra Assessments. After you conduct an assessment, depending on the governance requirements of the template used to conduct the assessment, you can either [complete](#) the assessment or [submit](#) the assessment to the Business Steward for review.

## Conduct an assessment

You can conduct [assessments](#) on the assets within your Collibra Data Intelligence Cloud environment. Typically, you would onboard an asset and then conduct an assessment on the asset. However, you can also conduct an assessment before onboarding an asset. This can be useful in guiding the onboarding process.

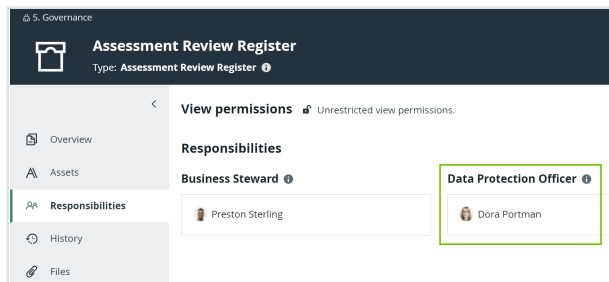

This topic describes how to conduct an assessment both with and without a specific asset.

**Important**

- The **Governance** checkbox in the [template](#) that is used in an assessment determines which button (**Complete** or **Submit**) is shown when conducting an assessment.
  - The **Complete** button is shown if the **Governance** checkbox is not selected in the template that is used in the assessment.
  - The **Submit** button is shown if the **Governance** checkbox is selected in the template that is used in the assessment.
- The **Governance** checkbox also determines whether or not an Assessment Review asset is created in your Collibra environment.

## Requirements and permissions

- You have a [global role](#) that has the **Assessments global permission**.
- For submitting an assessment for review: You have a [global role](#) that has the **Policy Manager global permission**, because an Assessment Review asset is created when you submit an assessment. The **Business Steward** role is [assigned](#) to the domain that you will select when submitting the assessment. You are assigned a [responsibility](#) with the resource role that has the **Asset > Add and Attribute > Add resource permissions** on the domain or its community. **Data Protection Officer** is the resource role that has the required resource permissions. **Dora Portman** is the user who will submit the assessment. **Assessment Review Register** is the domain that she will

select when submitting the assessment.

## Steps

1. [Open Assessments](#).
2. Enter the required information.

Field	Description
Select Template	Select the template that you want to use for your assessment.  <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p>Tip This field contains a list of published templates.</p> </div>
To conduct an assessment with a specific asset:	
Select <asset type>	Select the asset that you want to assess.  <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p>Tip This field contains assets of a <a href="#">specified</a> asset type. If an asset type has not been specified for the selected template, this field is empty.</p> </div>

Field	Description
To conduct an assessment without a specific asset:	
<asset type> not yet available	Select this checkbox.
Describe what you want to assess	Enter a description of what you want to assess.

3. Click **Start**.
4. Respond to the assessment questions.
5. On the **Properties** tab, set the [assessment permissions](#):
  - a. In the **View Permissions** subsection, select one of the following options:
    - **Everyone**: The assessment will be visible to everyone.
    - **Only Owner and Assignees**: The assessment will be visible to only you and the assignees that you select in the **Assignees** field.
  - b. In the **Edit Permissions** subsection, in the **Assignees** field, select the names of the users to whom you want to provide the ability to view or [edit](#) the assessment.

**Tip** For more information about the permissions that the assignees have, go to [Assessment permission details](#).

6. Perform one of the following steps:
  - Click **Save draft**.
  - Click **Complete**, and then, in the **Complete assessment** dialog box, click **Confirm**.
    - » The status of the assessment shows **Completed**.
  - Click **Submit**.  
Then, in the **Submit assessment** dialog box, select the domain in which you want the Assessment Review asset to be created, and then click **Submit**.

**Tip** In the **Domain** field on the **Submit assessment** dialog box, only the domains of the **Assessment Review Register** domain type are shown.

» The status of the assessment shows **Submitted**, and the **View submission** button is shown to enable you to view the Assessment Review asset.

## What's next?

- [Edit an assessment.](#)
- [Complete or submit an assessment.](#)

## Assessment permissions

You can protect the sensitive information in your [assessments](#) by giving specific permissions to individuals. This includes choosing whether the assessment is private or public and assigning people to the assessment. These [permissions](#) limit who can view and edit the assessment and thus prevent unauthorized access.

### Note

- By default, the assessments that were created in Collibra 2023.02 or newer are private and are visible to only the owners and assignees of those assessments.
- By default, the assessments that were created in Collibra 2023.01 or older are public and visible to everyone. If such an assessment contains sensitive information and is in the **Draft** status, we recommend that you [change](#) the permissions of that assessment so that it is visible only to you and the assignees that you select.

Watch a video

## Change assessment permissions

[Assessment permissions](#) control who can view or edit an assessment. You can change the view permissions and the assignment of an assessment, regardless of its status.

### Note

- If you have the **Sysadmin** global role, you can also change the ownership of an assessment, regardless of its status.
- When you change the permissions of a submitted assessment, a comment showing the new permissions is automatically added to the **History** tab of the linked asset.

## Steps

1. [Open Assessments](#).
1. Click the assessment for which you want to change the permissions.
2. In the upper-right corner of the page, click , and then click **Edit Permissions**.
3. In the **View Permissions** subsection, select one of the following options:
  - **Everyone**: The assessment will be visible to everyone.
  - **Only Owner and Assignees**: The assessment will be visible to only you and the assignees that you select in the **Assignees** field.
4. In the **Edit Permissions** subsection, in the **Assignees** field, select the names of the users to whom you want to provide the ability to view or [edit](#) the assessment.

**Tip** For more information about the permissions that the assignees have, go to [Assessment permission details](#).

### Note

- If you are an administrator and want to change the ownership of the assessment, in the **Owner** field, select the name of the new owner.
- For more information about assessment permissions, go to [Assessment permission details](#).

5. Click **Save**.

## Assessment permission details

The following table shows the [permissions](#) granted to the assignee and owner of an assessment and those granted to an administrator.

### Note

- The owner of an assessment refers to the user whose name is shown in the **Owner** field in the **Properties** section of the assessment.
- The assignees of an assessment refer to the users whose names are shown in the **Assignees** field in the **Properties** section of the assessment.
- The administrator refers to a user who has the **Sysadmin** global role.

Permission	Assignee	Owner	Administrator
View the assessment.	Yes	Yes	Yes
Edit the assessment.	Yes	Yes	Yes
Complete or submit the assessment.	Yes	Yes	No
Copy the assessment.	Yes	Yes	Yes
Download a PDF of the assessment.	Yes	Yes	Yes
Delete the assessment.	No	Yes	Yes
Change the permissions of the assessment.	No	Yes	Yes
Change the ownership of the assessment.	No	No	Yes

## Edit an assessment

You can edit an [assessment](#) that is in the **Draft** status.

### Requirements and permissions

You have a [global role](#) that has the **Assessments global permission**.

### Steps

1. [Open Assessments](#).
2. Click the assessment that you want to edit.
  - » The [assessment page](#) opens.
3. Click **Edit Draft**.
4. Edit the responses to the assessment questions.

**Tip** You can also edit the name of the assessment if the assessment was created without an asset.

5. Perform one of the following steps:
  - Click **Save draft**.
  - [Complete or submit](#) the assessment.

## What's next?

[What happens when you save, complete or submit an assessment?](#)

## Copy an assessment

You can copy an [assessment](#) only if the template that is used in the assessment is not deleted and is the latest version. You cannot copy an assessment that uses a previous version of a template, regardless of the status of the assessment.

When you copy an assessment, the new assessment will include all the responses and the view permissions from the assessment that you are copying, with the exception of the assignees of the assessment.

## Requirements and permissions

You have a [global role](#) that has the **Assessments** [global permission](#).

## Steps

1. [Open Assessments](#).
2. Click the assessment that you want to copy.
  - » The [assessment page](#) opens.
3. In the upper-right corner of the page, click , and then click **Copy**.
  - » A message stating that the assessment is copied appears, and the new assessment immediately opens in the **Draft** status. In the **Properties** section, the **Created on** field shows the current date and time and the **Owner** field shows your name.

**Note** The **Owner** field of the new assessment (the copy) shows the name of the user who copied the assessment instead of the name of the user who created the original assessment.

## What's next?

You can [edit](#), [submit](#), or [delete](#) the assessment.

## Complete or submit an assessment

You can complete an [assessment](#) or submit it for review if the assessment is in the **Draft** status.

This topic describes how to complete an assessment that is already [created](#), or submit it for review.

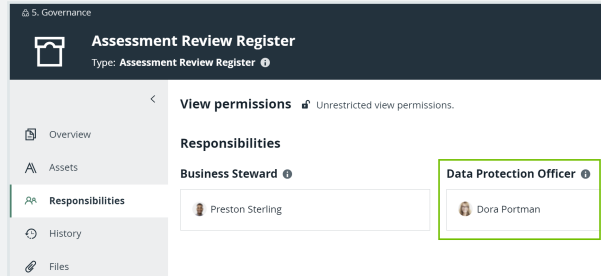

### Important

- The **Governance** checkbox in the [template](#) that is used in an assessment determines which button (**Complete** or **Submit**) is shown when conducting an assessment.
  - The **Complete** button is shown if the **Governance** checkbox is not selected in the template that is used in the assessment.
  - The **Submit** button is shown if the **Governance** checkbox is selected in the template that is used in the assessment.
- The **Governance** checkbox also determines whether or not an Assessment Review asset is created in your Collibra environment.

## Requirements and permissions

- You have a [global role](#) that has the **Assessments global permission**.
- For submitting an assessment for review:
  - You have a [global role](#) that has the **Policy Manager global permission**, because an Assessment Review asset is created when you submit an assessment.
  - The **Business Steward** role is [assigned](#) to the domain that you will select when submitting the assessment.
  - You are assigned a [responsibility](#) with the resource role that has the **Asset > Add and Attribute > Add resource permissions** on the domain or its community.

**Example** **Data Protection Officer** is the resource role that has the required resource permissions. **Dora Portman** is the user who will submit the assessment. **Assessment Review Register** is the domain that she will select when submitting the assessment.

- You are the **owner** or the **assignee** of the assessment that you want to complete or submit for review.

## Steps

1. **Open Assessments.**
2. Click the assessment that you want to complete or submit for review.
  - » The **assessment page** opens.
3. Click **Edit Draft**.
4. Optional: Edit the responses to the assessment questions.
5. Perform one of the following steps:
  - Click **Complete**, and then, in the **Complete assessment** dialog box, click **Confirm**.
    - » The status of the assessment shows **Completed**.
  - Click **Submit**.

Then, in the **Submit assessment** dialog box, select the domain in which you want the Assessment Review asset to be created, and then click **Submit**.

**Tip** In the **Domain** field on the **Submit assessment** dialog box, only the domains of the **Assessment Review Register** domain type are shown.

- » The status of the assessment shows **Submitted**, and the **View submission** button is shown to enable you to view the Assessment Review asset.

**Note** For information about the interaction between Collibra Assessments and Collibra Data Intelligence Cloud when you submit an assessment, go to [What happens when you save, complete, or submit an assessment](#).

## Delete an assessment

You can delete an [assessment](#), regardless of its status, if you are the [owner](#) of the assessment or an [administrator](#).

**Note** If you delete a submitted assessment, the linked Assessment Review asset will not be automatically deleted. You need to manually [delete](#) it in your Collibra environment.

## Requirements and permissions

You have a [global role](#) that has the **Assessments global permission**.

## Steps

1. [Open Assessments](#).
2. Click the assessment that you want to delete.
  - » The [assessment page](#) opens.
3. In the upper-right corner of the page, click , and then click **Delete assessment**.
  - » The **Delete assessment** dialog box appears.

**Tip** If you are deleting a submitted assessment, you can click the link in the dialog box to open the linked Assessment Review asset to delete the asset.

4. Click **Delete**.
  - » The assessment is deleted and is no longer shown in the table on the **Assessments** landing page.

## Mark an assessment as obsolete

You can mark an [assessment](#) that is in the **Completed** or **Submitted** status as obsolete. If you mark an assessment as obsolete, the status of the Assessment Review asset that was created in your Collibra environment also becomes **Obsolete**.

Note Obsolete assessments remain in the table on the **Assessments** landing page.

## Requirements and permissions

You have a [global role](#) that has the **Assessments global permission**.

## Steps

1. [Open Assessments](#).
2. Click the assessment that you want to mark as obsolete.
  - » The [assessment page](#) opens.
3. In the upper-right corner of the page, click , and then click **Mark as obsolete**.
  - » The **Mark as obsolete** dialog box appears.
4. Click **Mark**.
  - » The status of the assessment becomes **Obsolete**.

## What happens when you save, complete, or submit an assessment

The following table describes the outcome of saving a draft of an assessment, completing an assessment, and submitting an assessment for review.

### Important

- The **Governance** checkbox in the [template](#) that is used in an assessment determines which button (**Complete** or **Submit**) is shown when conducting an assessment.
  - The **Complete** button is shown if the **Governance** checkbox is not selected in the template that is used in the assessment.

- The **Submit** button is shown if the **Governance** checkbox is selected in the template that is used in the assessment.
- The **Governance** checkbox also determines whether or not an Assessment Review asset is created in your Collibra environment.

Action	Outcome		
	Status	Can you edit the assessment?	Is the Collibra environment affected?
Clicking <b>Save draft</b>	Draft	Yes	No
Clicking <b>Complete</b>	Completed	No	No
Clicking <b>Submit</b>	Submitted	No	Yes

**Note** When you complete an assessment or submit an assessment for review, the assessment is stored in the Collibra repository with details such as the date when the assessment was created and the name of the user who submitted the assessment.

## What happens when you submit an assessment

When you submit an assessment, the Collibra Data Intelligence Cloud environment is affected as follows:

- In your Collibra environment, an Assessment Review asset in the **Under Review** status is created in the domain that you selected when submitting the assessment.

**Tip** To open the Assessment Review asset page in your Collibra environment, on the assessment page, click **View submission**.

- All responses to the assessment questions are recorded as attributes of the Assessment Review asset.
- If the assessment was conducted on an existing asset: The Assessment Review asset is related to the asset via the following relation type: *[Asset] is assessed by / assesses [Assessment Review]*

- The [Assessments Approval workflow](#) is triggered. This workflow notifies, by default, the Business Steward that an assessment is ready for review.

## Assessment details page

When you [conduct](#) an assessment and click **Save draft** or **Submit for review**, the assessment is shown on the **Assessments** landing page. You can click the assessment to view its details.

The assessment details page:

- Shows the responses to all answered questions.
- Identifies the date and time on which the assessment was started.
- Identifies the date and time on which the last changes were made to the assessment.

**Note** You cannot edit an assessment that is in the Submitted or Completed status.

- Includes the **Edit draft** button for assessments in the Draft status.
- Includes the following for assessments in the Published status:
  - A button to launch a follow-up assessment, if the template that was used included a [Yes/No and Decision questions](#) and the score threshold was reached.
  - The **View submission** button, to access the Assessment Review asset page in your Collibra Data Intelligence Cloud environment.

**Note** If the Assessment Review asset was deleted from your Collibra environment:

- The status of the assessment remains Submitted.
- Clicking the **View submission** button shows the following message: Entity not found.

The following example shows the assessment details page of a published assessment in which it was determined, by the responses to the Yes/No questions, that a DPIA assessment should be conducted for the underlying asset.

Assessments

**DPIA Threshold** Submitted

Let's see how this works

View assessment asset page ×

<p>Is your processing activity necessary for compliance with a legal obligation, or for the performance of a public interest task, and can be linked to a prior general impact assessment of that activity in the context of the adoption of its legal basis?</p> <p>✓ Yes</p>	<p>Is the processing activity very similar to another one with similar high risks, for which a DPIA has already been performed?</p> <p>Not specified</p>	<p><b>Created on</b> 05-Feb-2021 10:32</p> <p><b>Last updated on</b> 05-Feb-2021 10:32</p>
<p>Is the processing activity included in the list published by the regulator that exempts the process from a DPIA?</p> <p>Not specified</p>	<p>Does the processing have a legal basis in the European Union, and was a DPIA performed in the context of this legal basis?</p> <p>Not specified</p>	

**Final Decision**

Is a DPIA required for the Business Process asset?

Yes Conduct DPIA assessment

## Download a PDF of an assessment

You can download a PDF of any [assessment](#), regardless of its status. The PDF captures all of the information shown on the [assessment details page](#).

## Requirements and permissions

You have a [global role](#) that has the [Assessments global permission](#).

## Steps

1. [Open Assessments](#).
2. Click the assessment for which you want to download a PDF.
  - » The assessment details page opens.
3. In the upper-right corner of the page, click , and then click **Download PDF**.
  - » The PDF is downloaded to your hard drive.

## Approve or reject an assessment

When you submit an [assessment](#) for review, an Assessment Review asset is created in the domain of your choice, in your Collibra Data Intelligence Cloud environment.

The Business Steward (by default) for the domain is notified that there is an assessment to review and a workflow task prompts the review and approval or rejection of the Assessment Review asset.

**Important** This does not apply to assessments for which the [Governance option](#) was cleared in the template used for the assessment. In that case, no asset is created in your Collibra environment and no workflow is triggered.

**Tip** You can [configure](#) the Assessments Approval workflow so that the task is assigned to a different resource role.

**Note** Neither the Assessment Review asset nor the submitted assessment can be edited.

## Prerequisites

You have a [global role](#) that has the [Assessments global permission](#).

## Steps

1. In your Collibra environment, go to **My Tasks** and click the relevant task.

» The task is shown in the sidebar.

2. Review the assessment details, as necessary.

**Tip** To review the assessment details, you can:

- In the sidebar, click the Assessment Review asset name to go to the asset page.
- Click **View details in assessment app** to review the details in Collibra Assessments.

3. In the sidebar, click **Approve** or **Reject**.

## Result

- The status of the Assessment Review asset becomes Approved or Rejected, accordingly.
- The status of the assessment in Collibra Assessments remains Submitted, regardless of whether the assessment is approved or rejected.

## The Assessments Approval workflow

This process notifies the Business Steward (by default) that an Assessment Review asset is ready for review and prompts the Business Steward to approve or reject the asset. You can [configure](#) the workflow to work with a resource role other than the Business Steward.

**Warning** For the Assessments Approval workflow to work, a Business Steward (by default) must be [assigned](#) to the domain selected when submitting an assessment. If the workflow was configured for a different resource role, the domain must have a responsibility [created](#) for that resource role.

**Important** The Assessments Approval workflow is relevant and triggered only if the [Governance option](#) is selected in the template that was used for your assessment.

## Assessments workflow description

When you submit an assessment for review:

- In your Collibra environment, an Assessment Review asset in the **Under Review** status is created in the domain that you selected when submitting the assessment.
- The Assessments Approval workflow is triggered. This workflow notifies, by default, the Business Steward that an assessment is ready for review.

**Note** Neither the Assessment Review asset nor the submitted assessment can be edited.

**Important** The Assessments Approval workflow is not relevant and not triggered if the [Governance option](#) is cleared in the template that was used for your assessment.

## Relevant resource roles

The following table shows the relevant resource role and the workflow tasks they can carry out.

Resource role	Task	Required
Business Steward (by default)	<ul style="list-style-type: none"> <li>Review assessment</li> <li>Approve or reject assessment</li> </ul>	Yes

## Workflow initiator

The workflow starts when you submit an assessment for review.

## Status progression of the Assessment Review asset in your Collibra environment

Status	Description
Under Review	The initial status of the Assessment Review asset.
Approved	The assessment is approved.
Rejected	The assessment is rejected.

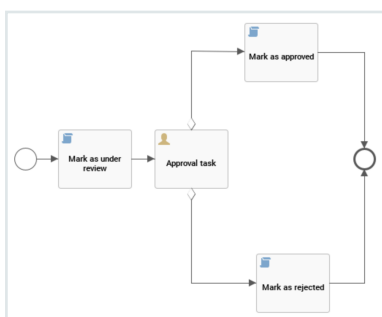

**Note** Once the Assessment Review asset is approved or rejected, it cannot be edited.

## Status progression of the assessment in Collibra Assessments

Condition	Status
Any user starts an assessment.	Draft
Any user submits an assessment for review.  <div style="border: 1px solid #ccc; padding: 5px; background-color: #f9f9f9;"> <p>Note The <b>Submit</b> button is available if the Governance option is selected in the template used for the assessment.</p> </div>	Submitted
Any user completes an assessment.  <div style="border: 1px solid #ccc; padding: 5px; background-color: #f9f9f9;"> <p>Note The <b>Complete</b> button is available if the Governance option is cleared in the template used for the assessment.</p> </div>	Completed
The Assessment Review asset in your Collibra environment is approved.	Submitted
The Assessment Review asset in your Collibra environment is rejected.	Obsolete

## Assessments workflow walk-through

### Diagram

## Start the workflow

When you [submit](#) an assessment for review in Collibra Assessments:

- In your Collibra environment, an Assessment Review asset in the **Under Review** status is created in the domain that you selected when submitting the assessment.
- The Assessments Approval workflow is triggered.

In Collibra Assessments, click **View submission**, to open the Assessment Review asset page in your Collibra environment.

## Review the assessment

Any user can:

- Review the Assessment Review asset and its attributes, in your Collibra environment.
- Click the **view details in assessment app** link on the Assessment Review asset page, to view the assessment details in Collibra Assessments.

## Approve or reject the assessment

As the Business Steward (by default), when you open the Assessment Review asset page, a workflow task prompts you to approve the assessment.

Approval task

View task More ▾

Click **View task**.

**Tip** You can also access the task via the My Tasks page. In the side pane, click **More**, and then click **View task**.

The **Approval task** dialog box prompts the Business Steward (by default) to approve or reject the assessment.

If the assessment is approved, the status of the Assessment Review asset becomes Approved.

If the assessment is rejected, the status of the Assessment Review asset becomes Rejected.

## Assessments Approval workflow configuration

Access the workflow configuration via **Settings** → **Workflows** → **Definitions** → **Assessments Approval**.

### Description

Notifies the Business Steward that an Assessment Review asset is ready for review, and prompts the Business Steward to approve or reject the asset. Edit

### Applies To

Asset Add Rules Edit

Any signed in user can start the workflow.  
Any signed in user can start a workflow, independent of the role that user has.

Perform candidate user check on workflow start.  
Workflow will fail to initialize if it contains a task without any candidate user.

This workflow can only run once at the same time on a specific resource.

Lock resource  
This workflow cannot run with other workflows on the same resource simultaneously.

Show in global create.

## Applies to

This workflow applies to the following asset types:

Asset type	Restriction	Remark
Assessment Review	None	None

**Note** When you select a parent asset type, it includes all of its children. For example, if you select **Business Asset**, the workflow also applies to **Business Term** because it is a type of **Business Asset**.

## Configuration variables

You can edit the configuration variables directly from the workflow definition page by clicking  in the upper-right corner of the variables table.

Variable	Description	Default value
assessmentAssignee	<p>The resource role to which the task is assigned when the workflow is triggered.</p> <div style="border-left: 2px solid red; padding-left: 10px; margin-top: 10px;"> <p><b>Warning</b> For the workflow to work, the resource role specified here must be present as a responsibility in the domain specified when submitting an assessment.</p> </div>	role(Business Steward)
statusId_underReview	The UUID of the status that indicates the assessment needs to be reviewed before approval.	00000000-0000-0000-0000-00000005020
statusId_approved	The UUID of the status that indicates the asset has been approved.	00000000-0000-0000-0000-00000005025
statusId_rejected	The UUID of the status that indicates the asset has been rejected.	00000000-0000-0000-0000-00000005010

Variable	Description	Default value
attrTypeId_approvalDate	The UUID of the attribute type that indicates when an assessment review was approved.	00000000-0000-0000-0000-00000000272
approvalTaskDueDate	The due date expressed in duration for task 'approvalTask'.	B1M
approvalTaskTaskNotificationEnabled	Send notification emails for task 'approvalTask'.	True
approvalTaskEscalationDuration	The escalation time duration for task 'approvalTask'.	B1M
approvalTaskEscalationType	The escalation type for task 'approvalTask'.	Mail

## Start label

The start label is the name of the workflow when it is visible as a button on a resource page or in the drop-down list when you add it as a button on a dashboard. You can find the **Start Label** section in the upper-right corner of the workflow definition page.

Default value: Assessments Approval

Click **Edit** to edit the label.

## Start Event

A start event is an event that triggers the workflow, for example starting the workflow when an asset is created.

By default, this workflow is configured to start when an asset is added. Specifically, the workflow starts when an assessment is submitted and the Assessment Review asset is created in your Collibra environment.

## Roles

The roles define the permissions to manage the workflow. For example, if a certain tasks must be urgently executed but the responsible person is on sick leave, a user with the defined role can reassign that task to somebody else.

Action	Roles
Start workflow <sup>1</sup>	There are no roles selected.
Stop workflow <sup>2</sup>	There are no roles selected.
Reassign tasks <sup>3</sup>	There are no roles selected.

## Other

The settings in this section define global restrictions that apply to the workflow such as:

- Accessibility to guest or logged in users.
- Checking that the roles required by the workflow are not empty.
- Preventing the same workflow or other workflows from running on the same resource.
- Making the workflow available to be added to a dashboard.

Setting	Enabled
Any guest user can start the workflow.	No
Any signed in user can start the workflow.	No
Perform candidate user check on workflow start.	Yes
This workflow can only run once at the same time on a specific resource.	Yes
Lock resource.	No
Show in global create.	No

---

<sup>1</sup>The button with the start label is available to users with these roles.

<sup>2</sup>The option to cancel the workflow is available to users with these roles.

<sup>3</sup>The option to reassign the task is available to users with these roles.

## Configure the resource role for the Assessments Approval workflow

By default, the [Assessments Approval workflow](#) is configured to work with the Business Steward resource role. You can configure it to work with any resource role.

**Warning** For the Assessments Approval workflow to work, the resource role that you configure here must be assigned to the domain you specify when submitting an assessment.

### Steps

1. On the main menu, click , and then click  **Settings**.
  - » The [Collibra settings page](#) opens.
2. Click **Workflows**.
  - » The [Workflows](#) settings page appears on the **Definitions** tab page.
3. Click the Assessments Approval workflow.
4. In the **Variables** section, click **Edit**.
  - » The **Variables** dialog box appears.
5. In the variable **Assessment Assignee** field, enter the resource role to which the review task should be assigned, for example: *role(Privacy Steward)*.
6. Scroll to the bottom of the **Variables** dialog box, and then click **Submit**.

## Customize the Assessments Approval workflow

You can customize the Assessments Approval workflow. Follow this procedure to ensure that your customizations are not overridden if we need to update the packaged workflows.

### Steps

1. On the main menu, click , and then click  **Settings**.
  - » The [Collibra settings page](#) opens.
2. Click **Workflows**.
  - » The [Workflows](#) settings page appears on the **Definitions** tab page.
3. Click **Assessments Approval**.

4. In the top-right corner of the page, click **II**, to disable the workflow.
5. In the tab pane, click **Flow**.
6. Copy all of the code of the workflow definition.
7. Paste the code into the text editor of your choice, and then edit the code to suit your needs.

**Warning** You must edit the process id and the process name. They must both be unique.

```
<?xml version="1.0" encoding="UTF-8"?>
<definitions xmlns="http://www.omg.org/spec/BPMN/20100524/MODEL" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"

```

8. Save your text file with the file extension BPMN.
9. Go back to the Workflows settings page and the **Definitions** tab, which shows the full list of workflows in your Collibra environment.
10. Near the top of the page, click **Upload a file**, to search for your workflow BPMN file, or drag and drop your file into the upload box.
  - » Your workflow is uploaded to the Workflows settings page.
11. In the table row with your uploaded workflow, click **▶**, to enable the workflow.

**Tip** After you've uploaded your customized workflow, you can edit the start event, the resource roles associated with the workflow and configure other settings to suit your needs.
