Announcements

End of life for Business User Interface

Announced with release 2023.09

We are announcing the End of Life (EOL) of the Business User Interface in Collibra Data Privacy, effective **November, 2023**. This EOL announcement applies to all customers and all environments.

No immediate action is needed from you at this time. We do ask that you plan accordingly to remove usage of the Business User Interface within your organization before November, 2023. Please note that the majority of the Business User Interface capabilities are available within workflows in Collibra Data Intelligence Cloud.

Please reach out to your Customer Success Team if you have any questions.

End of support for Edge sites installed before 2022.08

We no longer provide support for Edge sites installed before **2022.08** with k3s 1.20. While these Edge sites may continue to work, compatibility may break at any time due to an upgrade. This is because Kubernetes ceased patching updates to k8s 1.20 (including the lighter k3s version Edge runs on) in 2022, which leaves any Edge site with this version of k3s open to vulnerabilities and bugs that Kubernetes will not fix. Therefore, Collibra will be unable to address any subsequent issues with Edge sites on this version, outside of reinstalling the site to the latest version.

If any of your Edge sites are impacted, you will be notified on the relevant Edge site pages. You will need to reinstall your Edge site to upgrade to the latest Edge site version which includes the latest Edge supported Kubernetes version.

End of life for Advanced Data Types, Cloud Classification, and Edge Classification

Announced July 13, 2023 with release 2023.07

Aligned with the Jobserver end of life, we are announcing the end of life of **Advanced Data Types** and **Cloud Classification** on **September 30, 2024**.

- Advanced Data Types (ADT) in Data Catalog are only supported for Jobserver, which will be end of life on September 30, 2024.
- Cloud Classification relies on data extracted via Jobserver, which will be end of life on September 30, 2024.

We are working on a **new classification system on Edge**, Unified Data Classification, that will replace the existing Jobserver Cloud Classification system and that will support custom data classes. The general availability roll-out is **estimated for 2024.02**.

Unified Data Classification will also replace the existing Edge classification system, because the existing system doesn't support custom data classes. The Edge classification system will be migrated to Unified Data Classification in 2024.02. That's why we're announcing the end of life of **Edge classification** on **February 29, 2024**.

A migration procedure, workflow, and support materials will be available when Unified Data Classification becomes generally available. The migration process will also allow you to convert your advanced data types to data classes in Unified Data Classification.

- If you are using Edge classification, we plan an automatic migration to Unified Data Classification as soon as the new system and all related support materials become generally available in 2024.02. More information will become available closer to this date.
- If you are using cloud classification or advanced data types, you will need to migrate to Unified Data Classification before September 30, 2024.

Please reach out to your Customer Success Team if you have any questions.

End of life for Collibra for Desktop and Collibra for Mobile

Announced with release 2023.05

We are announcing the End of Life (EOL) of Collibra for Desktop and Collibra for Mobile, effective **October 31, 2024**. This EOL announcement applies to all customers and all environments.

No immediate action is needed from you at this time. We do ask that you plan accordingly to remove usage of Collibra for Desktop and Collibra for Mobile within your organization before October 31, 2024. Please note that the majority of the Collibra for Desktop capabilities are available within Collibra Data Intelligence Cloud.

Please reach out to your Customer Success Team if you have any questions.

End of life for Jobserver

Announced with release 2023.03

The 2023.02 release brought with it the general availability of the Jobserver to Edge migration script for schemas (JDBC ingestions). Aligned with the migration script release, we are announcing the end of life of Jobserver and all related Jobserver integrations for **September 30, 2024**. This end of life applies to all Collibra environments with the **exception of Public Sector customers using GovCloud or on-prem environments**.

If you are using Jobserver and are not a Public Sector customer using a GovCloud or on-prem environment, you will need to migrate to Edge before September 30, 2024. Please reach out to your Customer Success Team if you have any questions.

Collibra email provider change for application emails

Announced with release 2023.01

Important This change does not affect GovCloud and on-premises environments.

In February 2023, Collibra switched email providers for our application emails to improve email security. Please note, this did not impact marketing or other Collibra emails.

This change only affects you minimally or not at all, unless your organization applies very strict security. If your organization does apply very strict security, we recommend you review the details below and assess their impact with your security team. If you have any questions, don't hesitate to contact your support team.

This change impacted:

- The `Mailfrom` address
- The `Return-Path` header
- The `collibra.com` SPF record
- The IP addresses of the sender

Tip

As of December 22, 2022, IP addresses are:

- 159.112.252.6/32
- 69.72.42.227/32

However, you can check the SPF record of `alerts.collibra.com` for the latest IP addresses. You can do this online or via DNS lookup:

```
dig @8.8.8.8 +short -t TXT alerts.collibra.com
```

Example

Below you can see an example of the future email headers. This information can help your IT administrators and security teams determine what changes they may need to make according to your organization's configurations and security policies regarding inbound email. Note that the sending IP addresses may change, so validate them via the SPF record as mentioned above.

End of life for Collibra Connect

Announced with release 2022.03

We have made the decision to transition away from Collibra Connect to provide customers a wider range of integration options.

Our native Collibra integrations (connectors) will be easier to implement and maintain, provide a better return on investment, and allow you to grow with and derive greater value from Collibra:

- Collibra integrations and Spring Boot based frameworks will replace Collibra Connect as options to build integrations going forward.
- You can choose any ESB or integration method for your use case.
- Our intention is to enable Collibra connectors to support ingestion as well as use cases for data profiling, data classification and other cloud functionalities.
- If you have an enterprise MuleSoft license, you can easily switch to it.

Rest assured Connect templates are and will remain compatible with our product, please contact us for any Connect-related question. Only support or any upgrades on these products will be discontinued.

Note As of September 2022, you will need a MuleSoft Community Edition license or your own proprietary paid license to run Connect templates.

RedHat Enterprise Linux 7 and CentOS 7 are no longer supported

Announced with release 2022.03

A new Edge site on K3S can no longer be installed on RedHat Enterprise Linux 7.x and CentOS 7.x. Upgrade your operating system for existing Edge sites before Collibra release **2022.06**.

Collibra Data Intelligence Cloud

The content of this section is only available for Collibra Data Intelligence Cloud.

Please read

Failure to upgrade to the most recent release of the Collibra Service and/or Software may adversely impact the security, reliability, availability, integrity, performance or support (including Collibra's ability to meet its service levels) of the Service and/or Software. Collibra hereby disclaims all liability, express or implied, for any reduction in the security, reliability, availability, integrity, performance or support of the Service and/or Software to the extent the foregoing would have been avoided had you allowed Collibra to implement the most current release of the Service and/or Software when scheduled by Collibra. Further, to the extent your failure to upgrade the Service and/or Software impacts the security, reliability, availability, integrity or performance of the Service and/or Software for other customers or users of the Service and/or Software, Collibra may suspend your access to the Service and/or Software until you have upgraded to the most recent release.

Note Some items included in this release may require an additional cost. Please contact your Collibra representative or Customer Success Manager with any questions.

Release 2024.01

Release information

- Publication dates:
 - Release notes: January 2, 2024
 - Documentation Center: January 2, 2024
- Release date of Collibra 2024.01.0: January 7, 2024
 - Upgrade non-production environments: January 7, 2024
 - Upgrade production environments: January 28, 2024

Enhancements

Collibra Console

- We improved the performance of the sign-in process for Collibra Console.

Fixes

Data Catalog

- The Catalog home page, the Table asset page, and the Data Set asset page now all load faster. (ticket #116267, 124702, 128372)

Data Lineage and BI integrations

- When Collibra is processing a batch of Looker metadata, an HTTP 400 error indicates a "bad request" with regard to a dashboard. The Collibra Data Lineage service instance now skips such dashboards and resumes processing the rest of the batch. HTTP 400 errors result in an MSG-LIN-8001 error in the lineage harvester logs. The MSG-LIN-8001 error message mentions the problem dashboard ID and

the error message from Looker, which might include suggestions for resolving the error.

- Implemented streaming by the lineage harvester when synchronizing Looker, to help reduce the chances of Out Of Memory (OOM) errors. (ticket # 126225, 128131)
- When integrating Looker, the lineage harvester now includes a retry mechanism, to reduce the chances of experiencing a GOAWAY error when trying to connect to Looker. (ticket #128131)
- When integrating Power BI or Azure Data Factory, if the root certificate of the server is not trusted, the issue is now accurately described in the lineage harvester log file. Previously, the issue was inaccurately described as a timeout error.
- The lineage harvester version 2024.01 now uses Transport Layer Security v1.3 encryption, for heightened security.

Collibra Console

- The error message in Collibra Console for a password reset link that has expired now reflects the cause of the error. (ticket #125401)

Miscellaneous

- We have improved the security of Jobserver.

Component versions

Component	Product	Version
Virtual Machine (jreVersion)	Azul Zulu JRE	Azul Zulu 17.0.8.1
Repository (postgresVersion)	PostgreSQL	14.7.1
Jobserver (sparkVersion)	Spark	2.4.8-collibra-48
Search	Elasticsearch	8.9.2

Collibra supported versions policy

Collibra is committed to providing a reliable and exceptional experience. As part of Collibra's dedication to ensuring customer satisfaction and maximizing the value of its product, Collibra continuously releases new versions that upgrade the platform. Simultaneously, Collibra deprecates older versions that are no longer supported.

Important

- The content on this page only applies to commercial Collibra Data Intelligence Cloud customers. It does not apply to GovCloud and on-premises environments.
- Any commercial Collibra Data Intelligence Cloud product not mentioned in this policy is considered unsupported and may not receive any updates (including security patches or bug fixes) at Collibra's discretion.

Supported versions

Collibra supports the three most recent versions of the platform as further outlined below. Older versions are considered unsupported. Peripheral products may deviate slightly from that rule.

Using a supported Collibra version means customers receive ongoing generally released security updates, patches and bug fixes and maintenance, as well as assistance from Collibra's Support teams in accordance with Collibra's [Support Policy](#) to help with troubleshooting and reporting potential bugs. Unsupported versions may not receive critical security updates and other bug fixes as described in Collibra's Support Policy. In other words, using an unsupported version may adversely impact security, reliability, availability, integrity, performance or support.

These are the currently supported versions of Collibra's products:

Product	Supported versions
Collibra Data Intelligence Cloud	<ul style="list-style-type: none"> • 2024.01 • 2023.11 • 2023.10

Product	Supported versions
Edge	<ul style="list-style-type: none"> • 2023.11
Data Lineage	<ul style="list-style-type: none"> • 2024.01
Collibra Data Quality & Observability	<ul style="list-style-type: none"> • 2024.01 • 2023.11 • 2023.10
Jobserver	<ul style="list-style-type: none"> • 2023.11 <div style="border-left: 2px solid red; padding-left: 10px; margin-top: 10px;"> <p>Warning Jobserver and all related Jobserver integrations are end of life on September 30, 2024. This end of life applies to all Collibra environments with the exception of Public Sector customers using GovCloud or on-premises environments. Learn more.</p> </div>

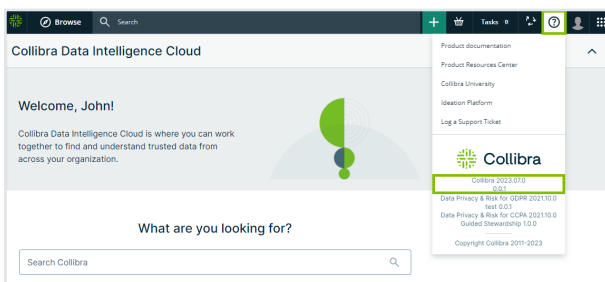

Frequently asked questions

What are the differences between the supported and unsupported versions?

Supported versions of Collibra's products are up to date with security, bug fixes and new features and enhancements. Unsupported versions generally do not receive the latest security updates, bug fixes or new features and enhancements.

How can I see which version of Collibra I currently have?

You can see the version of Collibra and other installed products in the  menu of the top navigation bar:

Where can I see the compatibility of Collibra Data Intelligence Cloud with other Collibra products?

For more information about the interoperability of Collibra Data Intelligence Cloud with other Collibra products, take a look at the [Compatibility](#) section.

Whom can I contact for more information?

Please contact your Customer Success Manager with any questions.

Collibra Data Governance Center On-Premises

The content of this section is only available for Collibra Data Governance Center on-premises environments. For the release notes of Collibra Data Intelligence Cloud, see [Collibra Data Intelligence Cloud](#).

Please read

Failure to upgrade to the most recent release of the Collibra Service and/or Software may adversely impact the security, reliability, availability, integrity, performance or support (including Collibra's ability to meet its service levels) of the Service and/or Software. Collibra hereby disclaims all liability, express or implied, for any reduction in the security, reliability, availability, integrity, performance or support of the Service and/or Software to the extent the foregoing would have been avoided had you allowed Collibra to implement the most current release of the Service and/or Software when scheduled by Collibra. Further, to the extent your failure to upgrade the Service and/or Software impacts the security, reliability, availability, integrity or performance of the Service and/or Software for other customers or users of the Service and/or Software, Collibra may suspend your access to the Service and/or Software until you have upgraded to the most recent release.

Important To continue to focus on the world-class cloud experience you deserve, Collibra will end maintenance support for on-premises environments on **December 31, 2022**. To discuss the next steps for your migration to cloud, please contact your customer success manager. Please note that this notification is not applicable for our Federal customers at this point in time.

Note Please note, some items included in this release may require an additional cost. Please contact your Collibra representative or Customer Success Manager with any questions.

Release 5.9.1

Release information

- Release date of 5.9.1: June 22, 2023

Security

- We now use scram-sha-256 to store PostgreSQL users' passwords in a cryptographically hashed form. The passwords are now better protected against brute-force attacks.

Data Governance

- When visiting a view, if you switch to another view via the view selector, the new view now loads. (ticket #89152, 98681, 108048)
- The **Created on** and **Last modified on** column filters again return only the data that match the dates used in the filters. (ticket #100954)
- Fixed an issue that caused asset asset pages with many complex relations and view permission restrictions on their parent domains to load slowly.
- After you apply a new filter, the asset counter in the lower-right corner of a filtered view with more than 10,000 assets now shows the correct number of assets in the table when clicked. (ticket #88791, 89367)

Miscellaneous

- Your Collibra session now closes correctly when the session times out. (ticket #65867, 83973, 87289).
- Environments with FIPS enabled no longer fail to start after resetting them to factory defaults.

Upgrading to Collibra DGC 5.9.1

You can upgrade to Collibra Data Governance Center 5.9.1 from Collibra DGC versions:

- 5.6.5
- 5.7.x
- 5.8.x

For more information, see [Installation and upgrade](#).

Tip

- If we upgrade your Collibra Data Intelligence Cloud environment and you have an on-premises Jobserver installation, you need to upgrade your on-premises installation if possible.

If your Collibra environment does not have a corresponding on-premises installer, ensure that your on-premises Jobserver and Collibra Console are installed with the latest available installer. To know which installer you need to use, go to the [compatibility list](#).

- When you upgrade to 5.7 or newer, [characteristics of some Catalog-related assets](#) are converted from rich-text format to plain-text format.

Component versions

Component	Product	Version
Virtual Machine (jreVersion)	Azul Zulu JRE	Azul Zulu 17.0.8.1
Repository (postgresVersion)	PostgreSQL	14.7.1
Jobserver (sparkVersion)	Spark	2.4.8-collibra-48
Search	Elasticsearch	8.9.2 7.16.3

Collibra Data Governance Center On-Premises

The content of this section is only available for Collibra Data Governance Center on-premises environments. For the release notes of Collibra Data Intelligence Cloud, see [Collibra Data Intelligence Cloud](#).

Please read

Compatibility

For more information on the system requirements for on-premises installations, see [System requirements](#).

You can download all the necessary files for this release on the [Collibra Downloads page](#).

Supported web browsers

Browser	Version
Mozilla Firefox	All supported versions by Mozilla, however older Firefox versions may be compatible to run our software.
Google Chrome	All supported versions by Google, however older Chrome versions may be compatible to run our software.
Microsoft Edge	All supported versions by Microsoft, however older Edge versions may be compatible to run our software.

Compatibility between Jobserver and Collibra

The following table shows which Jobserver version you have to use for each Collibra Data Intelligence Cloud version.

Collibra Data Intelligence Cloud version	Jobserver version
<ul style="list-style-type: none"> • 2024.01 • 2023.11 	2023.11.0-49
<ul style="list-style-type: none"> • 2023.10 • 2023.09 • 2023.08 	2023.08.0-28
<ul style="list-style-type: none"> • 2023.07 • 2023.06 • 2023.05 	2023.05.0-55 (Jobserver uses PostgreSQL 14)
<ul style="list-style-type: none"> • 2023.04 	<ul style="list-style-type: none"> • 2023.04.0-32 (Jobserver uses PostgreSQL 14) • 2023.02.0.39 (Jobserver uses PostgreSQL 11)
<ul style="list-style-type: none"> • 2023.03 • 2023.02 	2023.02.0-39 (Jobserver uses PostgreSQL 11)
<ul style="list-style-type: none"> • 2023.01 • 2022.11 	<ul style="list-style-type: none"> • 2023.01.0-63 (Jobserver uses PostgreSQL 11) • 2022.11.0-52 (Jobserver uses PostgreSQL 10)
<ul style="list-style-type: none"> • 2022.10 • 2022.09 • 2022.08 	2022.08.1-56
<ul style="list-style-type: none"> • 2022.07 • 2022.06 • 2022.05 	2022.05.1-67

Compatibility between Edge sites and Collibra Data Intelligence Cloud

The following table shows which Edge site version is supported for each Collibra Data Intelligence Cloud version, and which k3s and EKS versions are supported for each Edge site version.

Note Keep in mind which upgrade mode you have turned on for your Edge site.

- Automatic mode upgrades your Edge site whenever any type of upgrade is available.
- Manual mode alerts you when an upgrade is available, and whether it is optional or mandatory. Each Edge site version supports 2 quarterly versions, as well as any weekly upgrade that are released in between those quarterly versions. Upgrades become mandatory within 3 months of a Collibra Data Intelligence Cloud quarterly release.

Example If the latest quarterly release is 2023.08, then you must at least be on the latest Edge site version of 2023.05.x, such as 2023.05.4.

K3s

Note If a new version of Edge no longer supports a k3s version, you need to reinstall the Edge site when the new Edge site version is available. This is because the Edge installer comes with the supported version of k3s.

Collibra Data Intelligence Cloud version	Edge site version	Supported k3s versions	Actions for Automatic upgrades	Actions for Manual upgrades
2023.11	2023.11 and any weekly upgrades	<ul style="list-style-type: none"> 1.27 1.26 1.25 1.24 1.22 	<ul style="list-style-type: none"> You must reinstall your Edge site before the 2024.02 major release to upgrade to k3s 1.27. <p>Note Support will be limited for troubleshooting Kubernetes versions that are older than k3s 1.27.</p>	<ul style="list-style-type: none"> You must reinstall your Edge site before the 2024.02 major release to upgrade to k3s 1.27. <p>Note Support will be limited for troubleshooting Kubernetes versions that are older than k3s 1.27.</p>
2023.10	2023.08 and any weekly upgrades.	<ul style="list-style-type: none"> 1.24 1.22 	<ul style="list-style-type: none"> No action is required. 	<ul style="list-style-type: none"> You must upgrade your Edge site if you are not at least on Edge site version 2023.05.
2023.09				
2023.08				
2023.07	2023.05 and any weekly upgrades.	<ul style="list-style-type: none"> 1.24 1.22 	<ul style="list-style-type: none"> No action is required. 	<ul style="list-style-type: none"> You must upgrade your Edge site if you are not at least on Edge site version 2023.02.

2023.05				

Compatibility between cloud and on-premises versions

The following table shows the compatibility between cloud and on-premises versions.

Collibra Data Governance Center version...	contains the content of Collibra Data Intelligence Cloud versions...
5.7.7 (released with 2020.11)	2020.09, 2020.10, 2020.11
5.7.8 (released with 2021.03)	2020.12, 2021.01, 2021.03
5.7.9 (released with 2021.05)	2021.04, 2021.05
5.7.10 (released with 2021.09)	2021.06, 2021.07, 2021.09
5.7.11 (released with 2021.11)	2021.10, 2021.11
5.7.12 (released with 2022.02)	2022.01, 2022.02
5.7.13 (released with 2022.05)	2022.03, 2022.04, 2022.05
5.8.x	2022.03, 2022.04, 2022.05 but using PostgreSQL 11
5.9.x	2022.03, 2022.04, 2022.05 but using PostgreSQL 14.9

Backups

You can also restore backups from Collibra Data Intelligence Cloud on the on-premises Collibra Data Governance Center. The following table shows which cloud backups you can restore on which on-premises version.

If you are running Collibra Data Governance Center version...	you can restore backups from Collibra Data Intelligence Cloud version...
5.7.7 (released with 2020.11)	2020.11 and older

If you are running Collibra Data Governance Center version...	you can restore backups from Collibra Data Intelligence Cloud version...
5.7.8 (released with 2021.03)	2021.03
5.7.9 (released with 2021.05)	2021.05 and older
5.7.10 (released with 2021.09)	2021.09 and older
5.7.11 (released with 2021.11)	2021.11 and older
5.7.12 (released with 2022.02)	2022.02 and older
5.7.13 (released with 2022.05)	2022.05 and older
5.8.x and 5.9.x	2022.05 and older Backups of newer cloud versions can never be restored on on-premises environments.

If you are running Collibra Data Intelligence Cloud version...	you can restore backups from Collibra Data Governance Center version...
2020.11 and newer	5.7.7 and older
2021.03 and newer	5.7.8 and older
2021.05 and newer	5.7.9 and older
2021.09 and newer	5.7.10 and older
2021.11 and newer	5.7.11 and older
2022.02 and newer	5.7.12 and older
2022.05 and newer	5.7.13 and older We recommend that you first upgrade your on-premises environment to 5.7.13, and use the 5.7.13 backup to restore on 2022.05 or newer.
2023.01 and newer	5.8.1 and older, even backups from PostgreSQL 10

If you are running Collibra Data Intelligence Cloud version...	you can restore backups from Collibra Data Governance Center version...
2023.04 and newer	5.9.1 and older, even backups from PostgreSQL 10 and 11.

Feature availability

Not all features in Collibra are enabled by default. You can enable some of these features via Collibra Console, while others can be enabled only by Collibra via a support ticket. The following table contains the features that are not enabled by default.

Tip In the table, for a feature:

- If the value in the **Enabled by** column is **Customer**, you can enable the feature via Collibra Console yourself.
- If the value in the **Enabled by** column is **Collibra** and you want to have the feature enabled, submit a support ticket.

Feature	Enabled by	Version in which the feature will be enabled by default
Enable the Data Quality extraction tab on a database asset	Customer	Not yet defined
Enable responsibility inheritance from higher levels in Table asset views	Customer	Not yet defined
Register data source via Edge	Customer	Not yet defined
Enable the Lineage tab on a database asset	Collibra	Not yet defined
Filter rules on a database asset	Collibra	Not yet defined
Locally managed groups	Collibra	Not yet defined
Diagrams Business Qualifier Filter	Customer	No

Feature	Enabled by	Version in which the feature will be enabled by default
Tableau Metadata API enabled	Customer	Not yet defined
Collibra system name flag	Customer	Not yet defined
Database registration via Edge	Customer	Not yet defined
Source Tags Synchronization via Edge	Customer	Not yet defined
Database profiling via Edge	Customer	No
Enable Edge jobs feature (beta)	Customer	Not yet defined
Enable Edge classification	Collibra	No
Enable automatic classification acceptance and rejection	Customer	No
Amazon S3 synchronization via Edge	Customer	No
JDBC Lineage on Edge	Collibra	Not yet defined
Google Cloud Storage synchronization via Edge	Customer	No
Enable Data Classification	Customer	No
Relation-based search	Customer	Not yet defined
Allow access to the Workflow Designer	Customer	Not yet defined
Unified Classification enabled	Customer	Not yet defined
Calculate Data Similarity (Beta)	Customer	Not yet defined

Overview build numbers

For 5.7 versions older than 5.7.7, there is a difference between the build number that is shown in Collibra Data Governance Center and in Collibra Console. For those versions, the installation files have the build number that is shown in Collibra Console. The installer contains among other files, the Collibra package, which has a different build number. This is the build number that is shown in Collibra.

These are the build numbers of all 5.7 releases prior to 5.7.7:

Installer build number	Collibra build number
5.7.0-60	5.7.0-59
5.7.1-19	5.7.1-20
5.7.1-23	5.7.1-22
5.7.2-4	5.7.2-3
5.7.2-9	5.7.2-8
5.7.2-13	5.7.2-12
5.7.2-14	5.7.2-12
5.7.2-16	5.7.2-14
5.7.3-25	5.7.3-19
5.7.4-14	5.7.4-10
5.7.4-20	5.7.4-18
5.7.4-22	5.7.4-20
5.7.4-26	5.7.4-22
5.7.4-29	5.7.4-26
5.7.4-39	5.7.4-40

Installer build number	Collibra build number
5.7.4-42	5.7.4-43
5.7.5-44	5.7.5-46
5.7.5-49	5.7.5-54
5.7.5-50	5.7.5-55
5.7.5-53	5.7.5-58
5.7.5-65	5.7.5-71
5.7.5-77	5.7.5-90
5.7.6-103	5.7.6-125

API updates

- [Deprecated API v1](#)
- [DGC Core compatibility report](#)
- [DGC API compatibility report](#)

Deprecated API v1

In an earlier version of Collibra Data Intelligence Cloud, we introduced [Core API v2](#) next to Core API v1. From version 5.5.0 onwards, we have marked some API v1 interfaces, classes, methods, fields and enumerations as deprecated. You can open an overview of all Core API v1 deprecated content by following the **DEPRECATED** link of the Core API v1 documentation.

All Classes

Packages

- com.collibra.dgc.core.component
- com.collibra.dgc.core.component.activity
- com.collibra.dgc.core.component.articulation
- com.collibra.dgc.core.component.assignment
- com.collibra.dgc.core.component.attachment
- com.collibra.dgc.core.component.attribute
- com.collibra.dgc.core.component.bootstrap
- com.collibra.dgc.core.component.comment
- com.collibra.dgc.core.component.community
- com.collibra.dgc.core.component.file
- com.collibra.dgc.core.component.hyperlink
- com.collibra.dgc.core.component.i18n
- com.collibra.dgc.core.component.impact

com.collibra.dgc.core.component.attribute

Interfaces

- AttributeComponent*
- AttributeTypeComponent*

Deprecated API

Contents

- Deprecated Interfaces
- Deprecated Classes
- Deprecated Fields
- Deprecated Methods
- Deprecated Enum Constants

Deprecated Interfaces

Interface and Description

- com.collibra.dgc.core.component.activity.ActivityStreamComponent
- com.collibra.dgc.core.component.bootstrap.BootstrapComponent
- com.collibra.dgc.core.component.CompareComponent
- com.collibra.dgc.core.component.ConfigurationComponent

Deprecated means that you can still use the content in this version, but we recommend to migrate to Core API v2. If the deprecated content has an alternative in Core API v2, it will be clearly indicated in the documentation as shown in the following example:

```
com.collibra.dgc.core.component.activity
Interface ActivityStreamComponent

Deprecated.

@Deprecated
public interface ActivityStreamComponent
```

Method Summary

All Methods	Instance Methods	Abstract Methods	Deprecated Methods

Modifier and Type	Method and Description
java.util.List<com.collibra.dgc.core.model.activity.Activity>	getActivities(com.collibra.dgc.core.dto.activity.ActivityParameters activityParameters)

Deprecated.

Use
com.collibra.dgc.core.api.component.activitystream.ActivityStreamApi#getActivities(FindActivitiesRequest)

If there is no alternative available in API v2, we recommend to file a [support ticket](#) or a feature request on the [Collibra Ideation platform](#).

Known issues

The following table contains a non-exhaustive list of known issues.

Ticket	Known issue	Found in	Fixed in
Not applicable	The Knowledge Graph API response body contains an additional "extensions" field.	2023.11	2024.01
116059	To collect sample data via Edge, you need View permission on the Database asset linked to the asset for which you want to collect the sample data.	2023.05	2023.11
Not applicable	When you integrate Databricks Unity Catalog, the maximum size per table is 256K. If you try to synchronize such a big table, the integration won't work. If Databricks Unity Catalog contains tables larger than 256K, exclude these tables by using the Filters and domain mapping field in the Databricks synchronization capability or by revoking the permissions to read those tables in Databricks itself.	2023.05	Under review
Not applicable	Chrome or any Chromium-based browser such as Opera can have an impact on your Edge connections and synchronization capabilities. If you saved your user name and password when signing in to Collibra and you later change the Edge AWS connection, then Chrome will automatically add your user name and password to the AWS connection parameter fields. Chrome will do the same for the IAM role field in the S3 synchronization capability and for similar password-based fields in other Edge connections and capabilities such as ADLS. Make sure to manually verify and, if needed, update the fields when you save a connection or capability.	2023.05	Not planned

Ticket	Known issue	Found in	Fixed in
Not applicable	If an asset name contains a space and the allowedCharacters parameter in the tokenizer settings contains double quotation marks, the References tab of the asset page does not show results.	2023.05	Under review
Not applicable	<p>The new licensing terms, Standard and Read-only, are being overwritten by the old terms, Author and Consumer, in some instances. This happens when language customizations have been made to the interface text.</p> <p>You can see how to reset the interface text in our documentation.</p>	2022.11	Not planned
Not applicable	From version 2022.11 onwards, Collibra takes the default language of your browser into account to select the interface text language of some sections. Collibra now also has translations of some interface text available out of the box. Consequently, you can no longer edit that interface text, nor translate it into unsupported languages. This includes the interface text of Usage Analytics, Data Marketplace and the Homepage. This means that the language of some user interface text may not always match the language settings in your user profile.	2022.11	Not planned
79928	Normally, you only see relations if you have view permissions for the head and the tail asset of the relation. If you do not have view permissions for an asset, you do not see the relations to that asset, for example, in views or on the asset page of the related assets. However, the History tab of asset pages mentions all relations, even if you do not have view permissions for the related asset.	2022.02	Not planned

Ticket	Known issue	Found in	Fixed in
Not applicable	<p>The Collibra Data Intelligence Cloud 5.7.2-13 release fixed performance issues with the Escalation Process workflow.</p> <p>To take advantage of the improvements, you must deploy the new version of the Escalation Process workflow in your Collibra 5.7.2-13 or newer.</p> <div data-bbox="424 555 1107 719" style="border: 1px solid #ccc; padding: 5px; margin: 10px 0;"> <p>Note If you are using a modified Escalation Process workflow, you must port your changes to the new workflow.</p> </div> <div data-bbox="424 748 1107 882" style="border: 1px solid #ccc; padding: 5px; margin: 10px 0;"> <p>Warning The new Escalation Process workflow is only valid for Collibra 5.7.2-13 or newer.</p> </div>	5.7.2-13	Not planned
Not applicable	<p>Workflows with different values for the processRef attribute of the <code>participant</code> tag and the id attribute of the <code>process</code> tag do not work in Collibra 5.6.0 or newer, despite having worked in older versions. These workflows have invalid BPMN files that cause a <code>java.lang.NullPointerException</code> error, visible in the Collibra Console logs.</p>	5.6	Not planned
30943, 36378	<p>Data source ingestion fails if a foreign key has the same name as a table.</p>	5.5	Not planned
