What's new

- You can [enable the option](#) to receive [push notifications](#) when tasks are assigned to you.
- [Workflows](#) are integrated in Collibra for Mobile
 - You can [start workflows](#) from the interface.
 - You can [complete tasks](#).
 - You can [define which workflows to become available](#) in the app.
- [Add an introduction message](#) before you sign in to the app.
- Expand [mobile device management](#) capabilities.
- You can now [add](#), [edit](#) and [delete](#) your ratings.
- Search for business terms, reports, KPIs, policies, and rules in Collibra Data Intelligence Cloud.
- Use the [filters](#) defined in Collibra Data Intelligence Cloud to narrow your search results.
- See the list of your more recent searches to quickly retrieve previous search results.
- Within [asset details](#), tap on characteristics, relations, and tags to see related data.
- Add [comments](#) to assets, and then mention users to automatically send them notifications.

What is Collibra for Mobile?

Collibra for Mobile is a cross-platform application for iOS and for Android that gives you seamless access to the data in your Collibra Data Intelligence Cloud environment. From any mobile device, you can search for business terms, reports, KPIs, policies, and rules and get detailed information about governed assets on the go.

You don't have to wait to get back to your desktop to collaborate with other users, you can add [comments](#) to assets by mentioning them in an asset so they are automatically notified.

For more information, you can watch [this extensive demo](#) to explore the possibilities of Collibra for Mobile.

Installing Collibra for Mobile

This section describes how to install Collibra for Mobile on Android and iOS mobile devices.

Install Collibra for Mobile on iOS	4
Install Collibra for Mobile for Android	4
Mobile device management	5
Show an introduction message	6
Data storage in Collibra for Mobile	7

Install Collibra for Mobile on iOS

Collibra for Mobile for iOS is available for installation in the [Apple App Store](#). Search for "Collibra" or follow the link below:

<https://apps.apple.com/app/collibra-for-mobile/id1498743475>

Compatibility

- Collibra for Mobile for iOS is compatible with iOS 12 or newer.
- Collibra Data Intelligence Cloud 2020.11 or newer.

Updates

The app is automatically updated via the Apple App Store.

Install Collibra for Mobile for Android

You can install Collibra for Mobile for Android from the [Google Play](#). Search for "Collibra" or follow the link below:

<https://play.google.com/store/apps/details?id=com.collibra.otg.everywhere>

Compatibility

- Collibra for Mobile for Android is compatible with Android 7 or newer.
- Collibra Data Intelligence Cloud 2020.11 or newer.

Updates

The app is automatically updated via Google Play.

Mobile device management

If your organization uses mobile device management (MDM) to control the applications on your mobile devices, you can apply custom settings for Collibra for Mobile, for example, a pre-configured URL of the Collibra Data Intelligence Cloud environment.

Note Ensure that the MDM solution of your organization, for example, Mobile Iron, is compatible with these custom settings.

The following table describes the settings that you can configure.

Key	Description	Format	Default value
instanceUrl	The URL of the Collibra Data Intelligence Cloud environment.	String	Not applicable
initialMessage	A text message that is shown before users sign in to the app.	String	Not applicable
forceUseMFA	An option to enable securely saving the user credentials with biometric authentication, authentication code, or authentication pattern.	Boolean	False

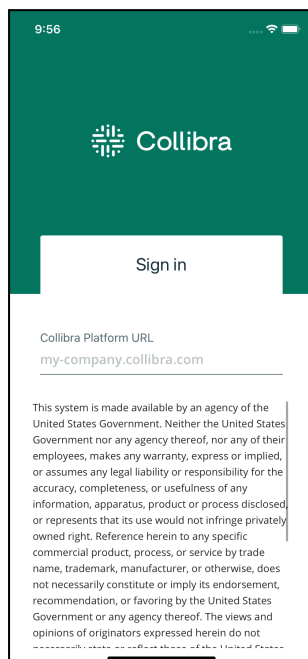

Key	Description	Format	Default value
browserScheme	<p>The browser on the mobile device that is used to sign in to the app:</p> <ul style="list-style-type: none"> • googlechrome(s) • firefox • microsoft-edge(-https) • opera • dolphin • brave <p>If the browser is not installed on the device, an error message appears.</p>	String	If not specified, the default browser of the mobile device is used to sign in to the app.
sessionTimeout	<p>The period of inactivity after which users are automatically signed out of Collibra for Mobile. This period is set in seconds. Without this setting, there is no timeout.</p>	Number	Not applicable

Show an introduction message

You can use your [mobile device management \(MDM\)](#) software to show an introduction message before the user signs in to Collibra for Mobile.

In your MDM software, add your introduction message as the value for the setting **initialMessage**.

Example

Data storage in Collibra for Mobile

Collibra for Mobile stores a small amount of data on your mobile device. Stored data is always encrypted and can only be read by Collibra for Mobile.

The following data is stored on your mobile device:

- The 10 most recently visited asset IDs.
- The last 10 search queries.
- The default filter.
- Your user credentials, if the **Secure user credentials** option is **enabled**.

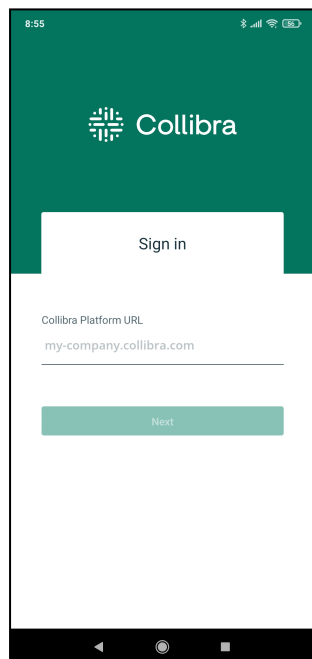

The encryption is applied via [Expo SecureStore](#) and uses encryption algorithms provided by your mobile operating system (iOS or Android).

Signing in and signing out of Collibra for Mobile

Sign in

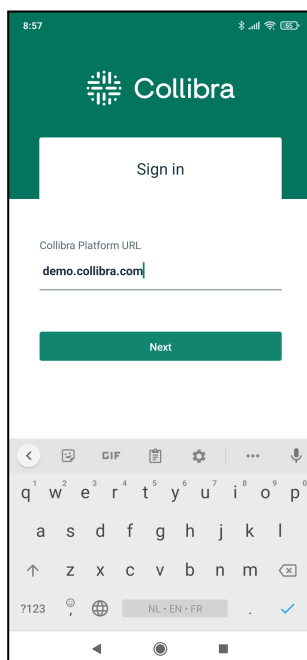

Step 1

Open Collibra for Mobile on your device.

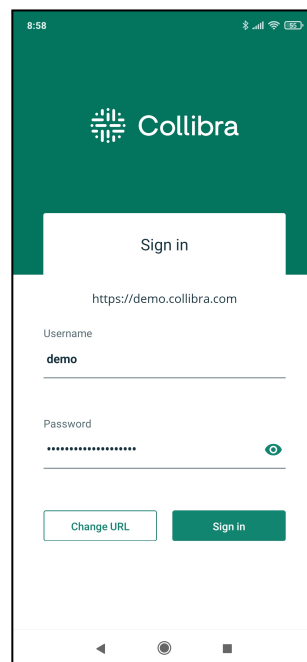

Step 2

In the **URL** field, enter the address of the Collibra Data Intelligence Cloud environment to which you want to connect, and then tap **Next**.

Step 3

Enter your Collibra credentials, and then tap **Sign in**.

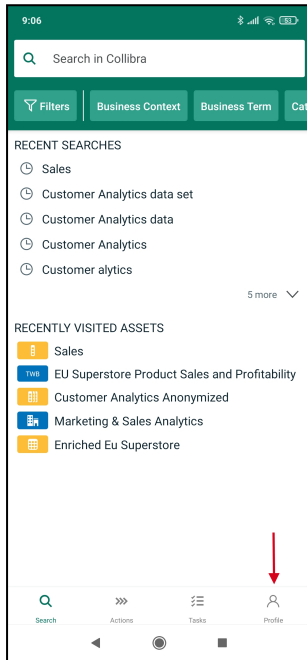

Note If authentication for your environment is set up with an SSO system, then enter your SSO credentials.

Sign out

Step 1

Tap on the  icon in the bottom navigation.

Step 2

Tap **Log out**.

» You return to the Collibra for Mobile [Sign in](#) page.

Collibra for Mobile user interface

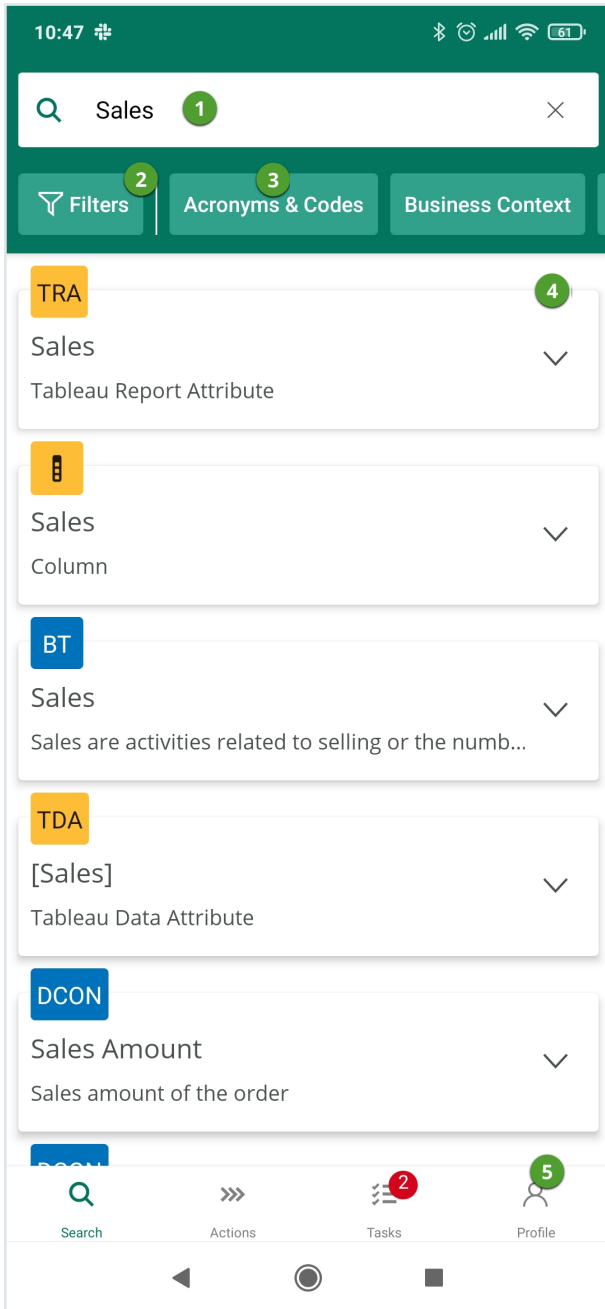

In this section, you will become familiar with the Collibra for Mobile user interface.

Search page	12
Asset details	13
Table asset details	15
Column asset details	17

Search page

The Collibra for Mobile search page contains the following elements.

Item	Description
1	The search field to enter your search query.
2	The default filters taken from your Colibra Data Intelligence Cloud environment.
3	The filters you can apply to your search results.
4	The search results showing the asset type, asset name and some basic information about the asset to help you find the correct asset.
5	The bottom navigation bar to open the search interface, start workflows, view your tasks and profile.

Asset details

The details of an asset appear on the **Overview**, **Responsibilities**, and **Comments** tabs.

Searching with Collibra for Mobile

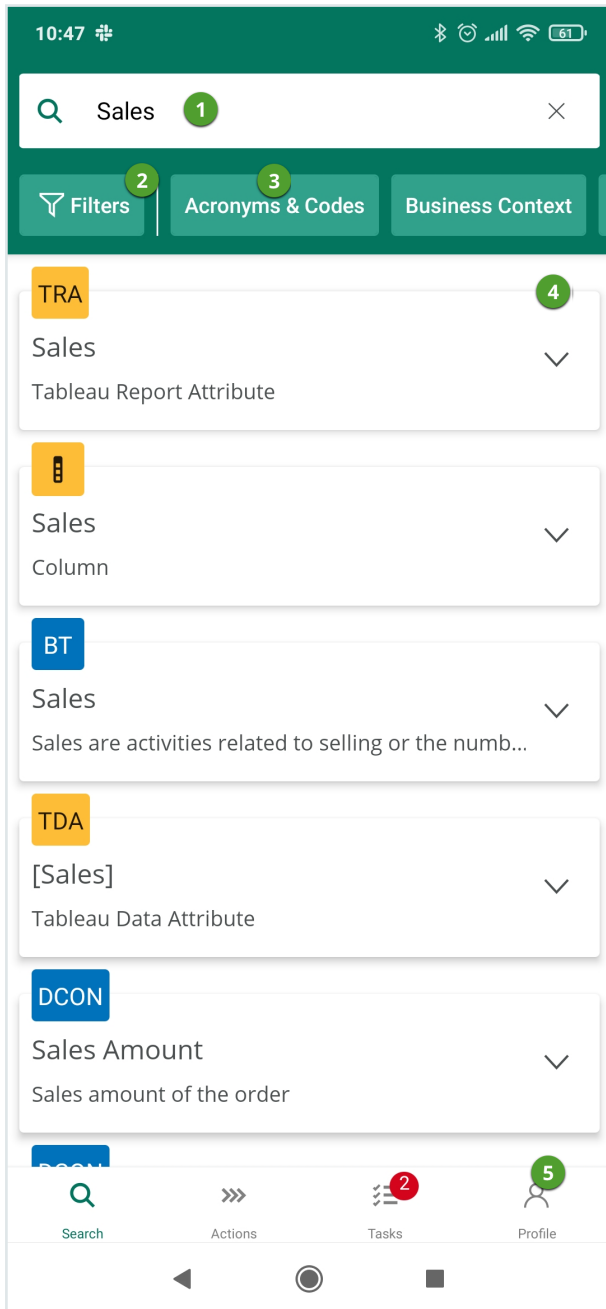

You can use Collibra for Mobile to quickly [search](#) for business terms, reports, KPIs, policies, and rules and more in your Collibra Data Intelligence Cloud environment.

Search for assets	22
Filter search results	24
Wildcards and symbols for searching	26

Search for assets

Enter the text you want to search for in the **Search** field. As you type, suggestions appear in the search results.

Tip

- You can use [wildcards](#) to aid your search.
- If you enter a unique asset ID or paste a shared asset link, the corresponding asset page opens immediately.

Recent search and recent assets

So you can pick up where you left off, the search results page saves your most recent searches and remembers the list of assets you recently viewed. Tap on a search term or asset to view the details.

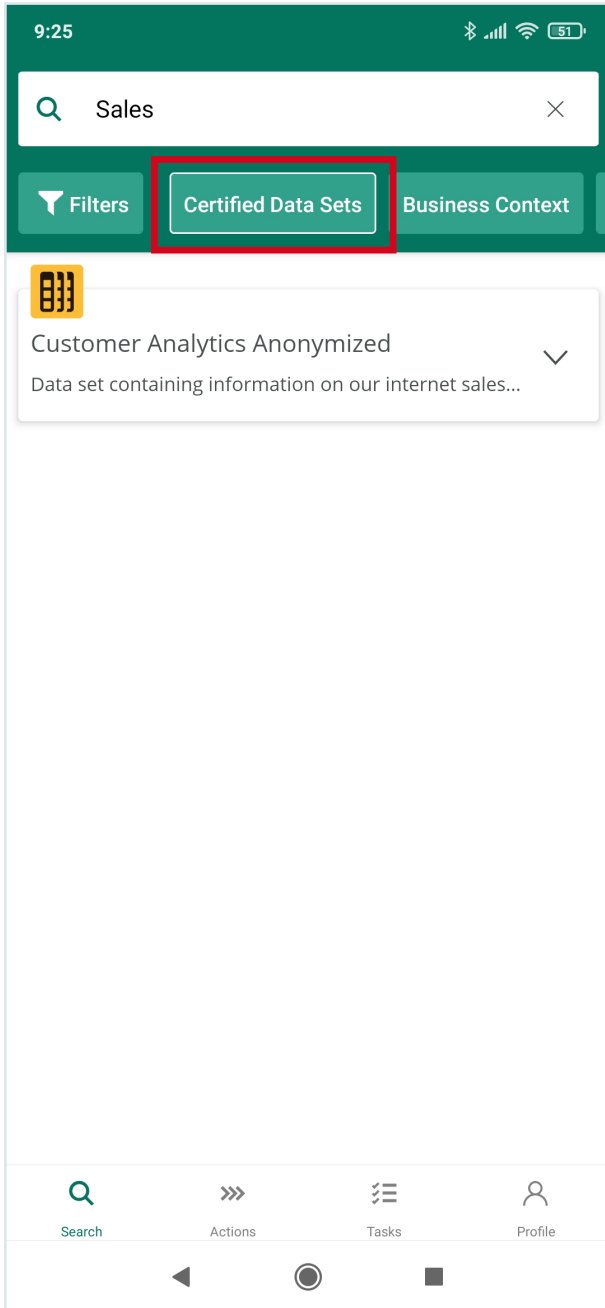

If you want to erase your recent search and asset history, [clear your local storage](#) to remove the items from the page.

Filter search results

When searching for data, the number of results can be huge and it can be difficult to find what you're looking for.

To find your data more easily, you can apply filters to the search results. The filters are taken from your Collibra Data Intelligence Cloud environment. Only the filters that you created and those that were shared with you are available to you.

Note To show more or fewer filters, you have to [add](#) or [delete](#) them in your Collibra environment.

Wildcards and symbols for searching

If you want to find a resource, but are not quite sure of its name, you can use the following wildcards:

Wildcard	Description
?	Replaces any single character. Example: by typing <i>?owie</i> , you can find Bowie, Rowie, Mowie, and so on.
*	Replaces any string of characters. Example: by typing <i>B*e</i> , you can find Bowie, Badge, Byte, and so on.

Working with assets

With Collibra for Mobile you can quickly look up data in Collibra Data Intelligence Cloud from any mobile device.

In this chapter

Working with comments

When you open an asset page, you can add, reply to or delete comments. You don't have to navigate to your Colibra Data Intelligence Cloud environment to do so.

Add a comment

1. [Search](#) for an asset.
2. Open the details of the asset.
3. Go to the **Comments** tab.
4. Type your comment.

Tip In your comments, you can use the @ symbol to mention a user so they automatically receive a notification.

5. Tap **Save**.

Reply to a comment

1. [Search](#) for an asset.
2. Open the details of the asset.
3. Go to the **Comments** tab.
4. Press and hold the comment to which you want to reply, and then tap .
5. Type your comment in the text field, and then tap .

Delete a comment

1. [Search](#) for an asset.
2. Open the details of the asset.
3. Go to the **Comments** tab.

4. Press and hold the comment you want to delete, and then tap .

Tip You can only delete your own comments.

5. Tap **Delete** to confirm.

Share an asset

If you want to share an asset with someone, you can retrieve the link to the asset and send it to another person. The link can be opened in any web browser or in Collibra for Mobile.

Steps

1. [Search](#) for an asset.
2. On the search results page, tap the asset you want to share.
3. In the header of the page, tap .
4. Select an app to send the link to the user with whom you want to share the asset. The apps via which you can share depend on your phone.

Ratings

Ratings enable users to subjectively rate the quality of an asset, using a five-star rating system, and write a free-text review of the asset in support of the rating provided.

Enabling ratings

Ratings are enabled by asset type. When ratings are enabled for a particular asset type, users can [rate](#) any asset of that asset type.

Permissions

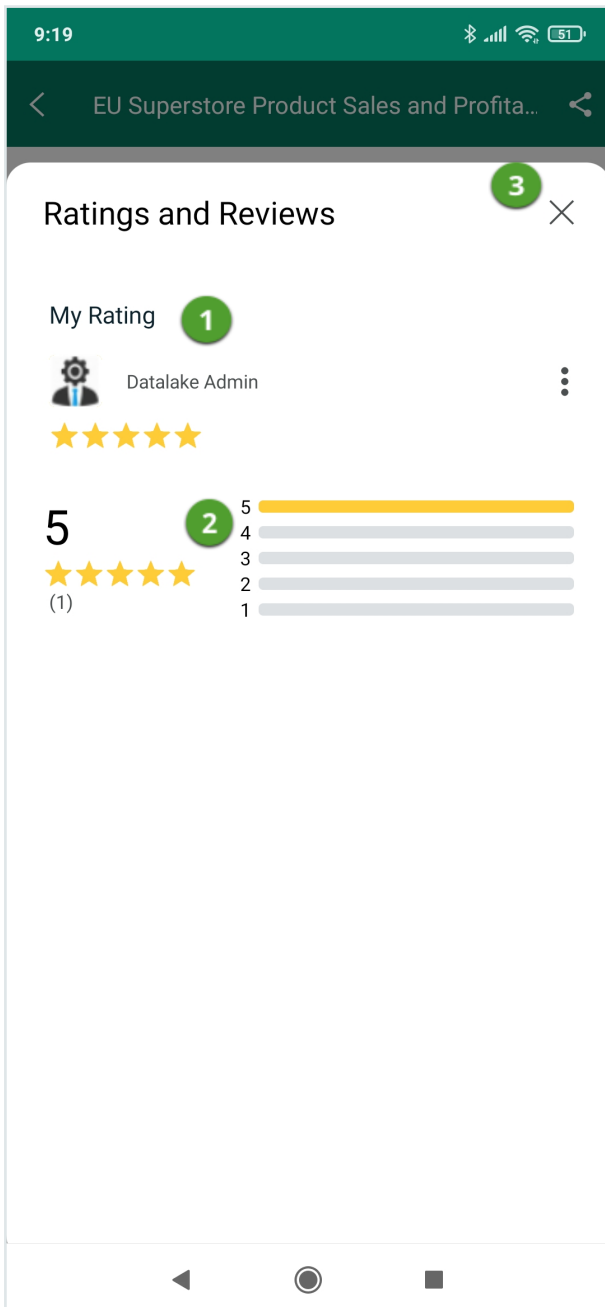

No particular license is needed to rate assets or to edit or delete your own ratings; you do, however, need certain resource permissions.

Permission	With this resource permission, you can...
Rating > Add	<ul style="list-style-type: none">• Rate any asset of an asset type for which the feature is enabled.• Edit or delete your own ratings.
Rating > Modify	<ul style="list-style-type: none">• Edit other users' ratings.
Rating > Remove	<ul style="list-style-type: none">• Delete other users' ratings.

View ratings

If ratings are enabled for an asset type, the overall rating of an asset is shown on the asset page of that asset type.

Tap the rating to open the details of the rating and to [add](#), [edit](#) or [delete](#) your rating.

No.	Description
1	Your rating and review.
2	The average of all user ratings for that asset and total number of ratings. A horizontal bar chart showing the distribution of ratings.
3	Close the ratings and review page.

Rate an asset

You can rate any asset of an asset type for which ratings have been enabled.

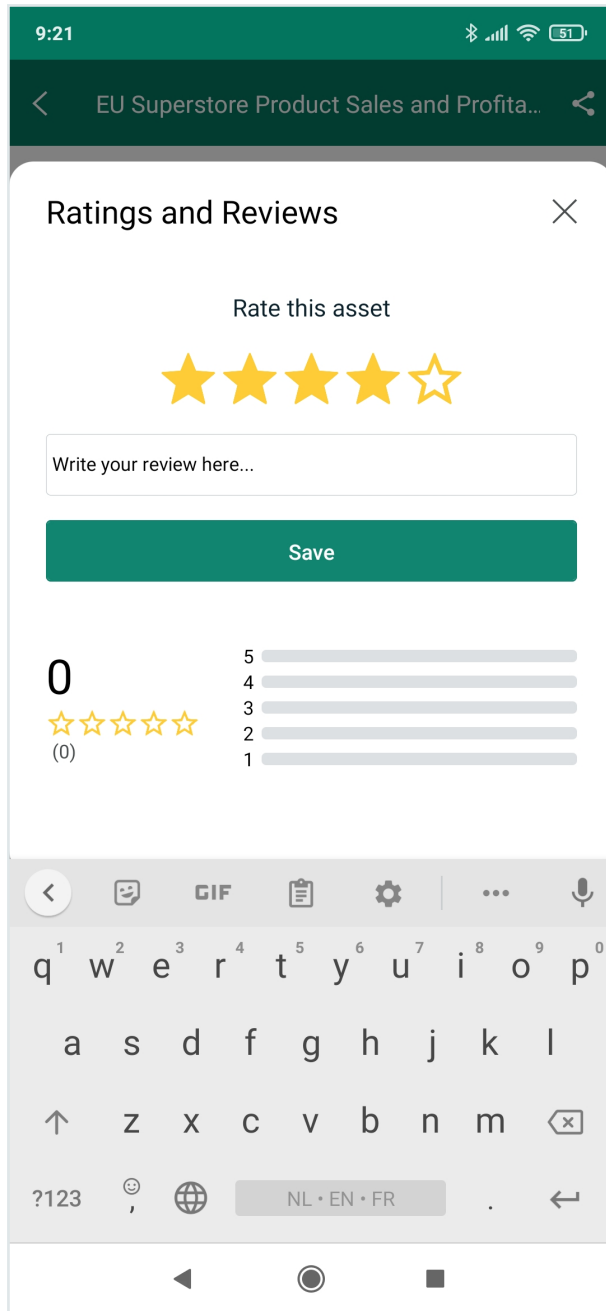

You can [edit](#) or [delete](#) your ratings at any time.

Steps

1. Open the asset page of the asset that you want to rate.
2. On the **OVERVIEW** tab, tap the **Ratings** section.
 - » The Ratings and Reviews page opens.
3. Tap the star that corresponds most closely to your opinion of the quality level of the asset.

The rating range is from one to five stars, with five representing the highest level of qual-

ity and one representing the lowest.

4. Optionally, enter a review of the asset in the text field.

Tip This collaborative feature is intended to help an organization improve the quality of its data and help users trust the quality of the data. As such, if you provide a rating of three stars or fewer, we strongly encourage you to provide a review to help the owner understand how the quality of the asset might be improved.

5. Click **Save**.
 - » The average user rating is recalculated.

Edit your ratings

You can edit or delete the ratings you've given if, for example, your opinion of the quality of an asset changes. It doesn't matter whether the rating has been given in Collibra Data Intelligence Cloud or in the Collibra for Mobile app.

Steps

1. Open the asset page of the asset for which you want to edit your rating.
2. On the **OVERVIEW** tab, tap the **Ratings** section.
 - » The Ratings and Reviews page opens.
3. At the right side of the rating that you want to edit, tap  and tap **Edit**.
4. Edit your rating and review.
5. Click **Save**
 - » The average user rating is recalculated.

Delete your ratings

If, for any reason, your opinion of the quality of an asset changes, you can [edit](#) or delete the ratings you've given, at any time.

Steps

1. Open the asset page of the asset for which you want to delete your rating.
2. On the **OVERVIEW** tab, tap the **Ratings** section.
 - » The Ratings and Reviews page opens.

3. At the right side of the rating that you want to delete, tap  and tap **Delete**.
4. Click **DELETE**, to confirm.
 - » The average user rating is recalculated.

Working with workflows

A workflow in Collibra Data Intelligence Cloud is an automated series of actions that produces a specified outcome. In the progression of a workflow, Collibra users may be required to complete tasks.

Workflows are essential for collaborating on assets and automating processes.

In Collibra for Mobile, you can start workflows and complete tasks that are assigned to you. Note that Collibra for Mobile retrieves all workflow information from the Collibra environment and that it as such respects roles, permissions, asset types, ... as defined in Collibra.

This section covers how to work with workflows and tasks.

Starting workflows	38
Working with tasks	41
Tasks with forms	44
Multi-step workflow	45

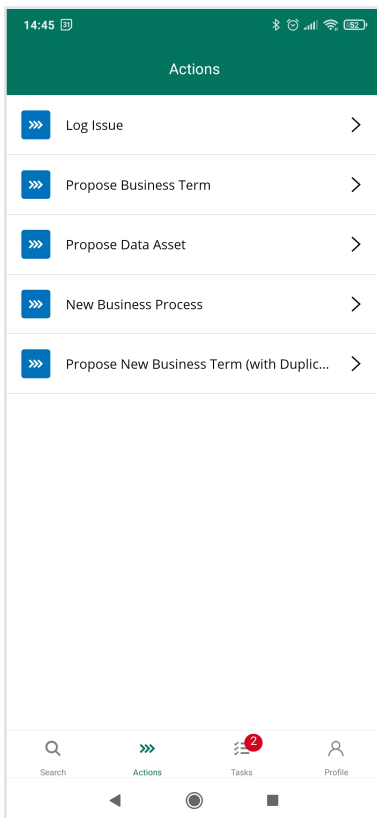

Starting workflows

In Collibra for Mobile, there are several ways to start a workflow.

Starting workflows from the navigation bar

The following image shows the designated **Actions** section in the navigation bar.

Note The list of workflows that are available in the **Actions** section is defined in [Collibra Console](#).

Tap a workflow to start it and fill out the necessary fields to complete the first step of the workflow.

Starting actions from an asset page

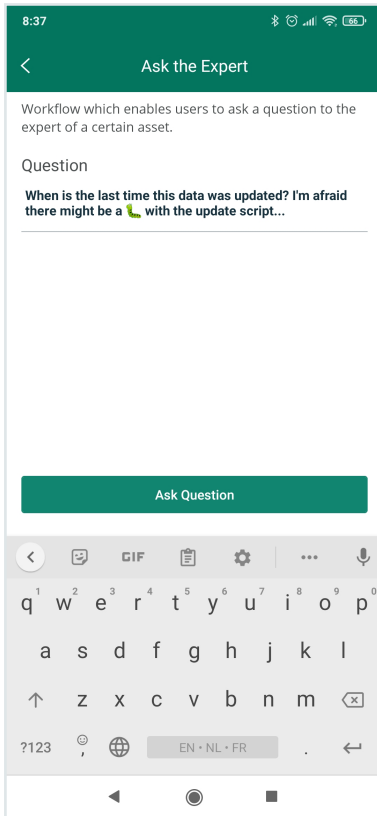

Each asset page has an **Actions** button to initiate workflows. When you tap this button, a menu expands from the bottom of the app.

Note The list of workflows that are available on an asset page is defined in [Collibra Console](#).

Chapter 9

Tap an action to select it. Fill out the necessary fields to proceed with the workflow.

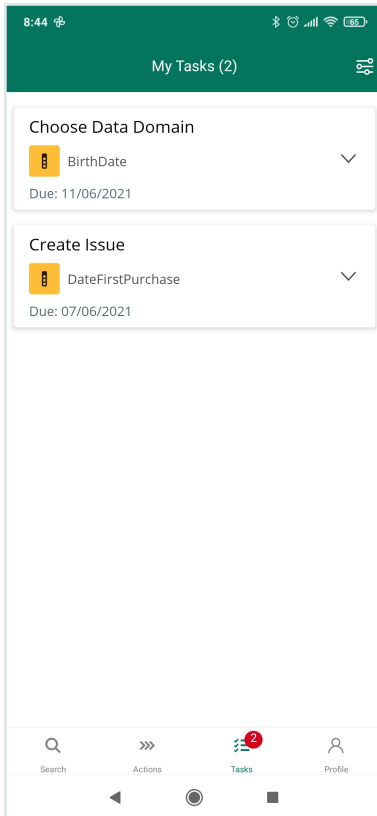

Working with tasks

In the progression of a workflow, Collibra you might be required to complete tasks. You can complete these tasks via Collibra Data Intelligence Cloud or Collibra for Mobile.

Tip You can receive [push notifications](#) when tasks are assigned to you.

All tasks that are assigned to you are shown in the Tasks section in the navigation bar. On the My Tasks page, you can use the  button to sort the tasks by due date or task type.

When you click a task, the details of the task are shown. The task details vary depending on the task type and workflow.

Pending tasks on an asset page

If you open an asset page with a pending task, the task icon (☰) is shown in the header of the task page. Tap the icon to open the task. If there are multiple pending tasks, the list of tasks appear. If there is only one task, the task opens immediately.

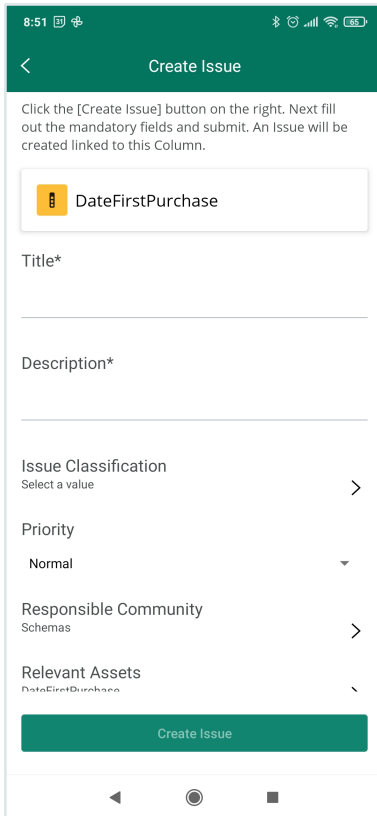

Task shown picture-in-picture

If you open a task via an asset page and you tap the back button (<), you return to the asset page and the task is shown picture-in-picture.

Tasks with forms

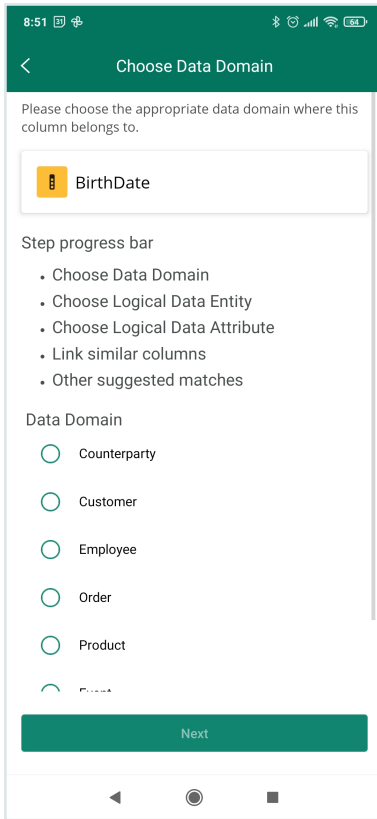

The following image shows a workflow form when you opened a task via the **Tasks** section in the navigation bar.

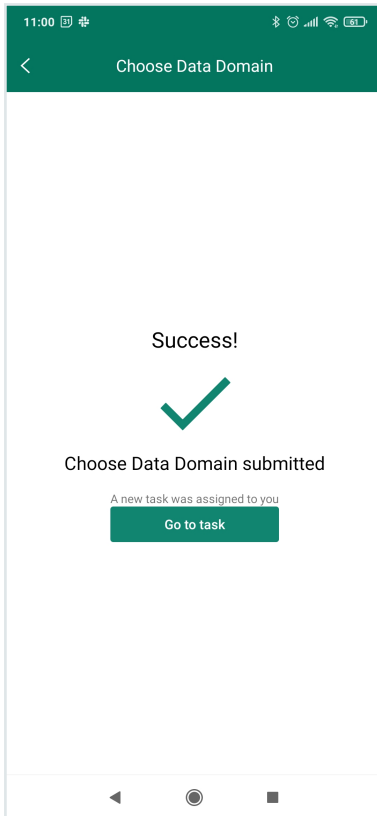

Values that you enter in the form are immediately stored in memory. You won't have to reenter any of the values if you navigate away and back to the task.

Multi-step workflow

As shown in the following image, you are prompted to assign a domain type to an asset. The **Step progress bar** section identifies the various steps in the workflow.

When you successfully complete a task, a success message is shown. If the next task in the workflow is also assigned to you, you can immediately open the task. If you choose not to, the task appears in the task list, which shows the active workflow step.

Profile

The profile page contains all of the options you need to manage your Collibra for Mobile settings, access documentation and support resources, and completely log out of the app.

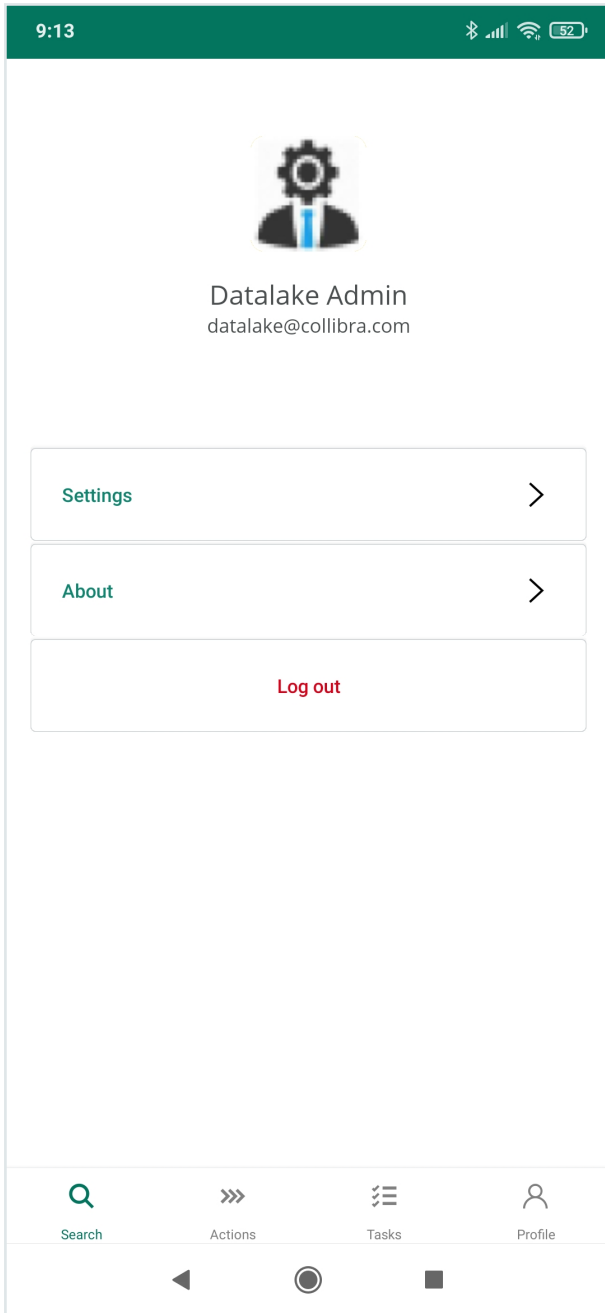

Open the Profile page	49
About	50
Settings	52

Open the Profile page

In the bottom navigation bar, tap on the **Profile**  icon.

» The profile page opens. Here, you can access [Settings](#), [About](#) and [Log out](#).

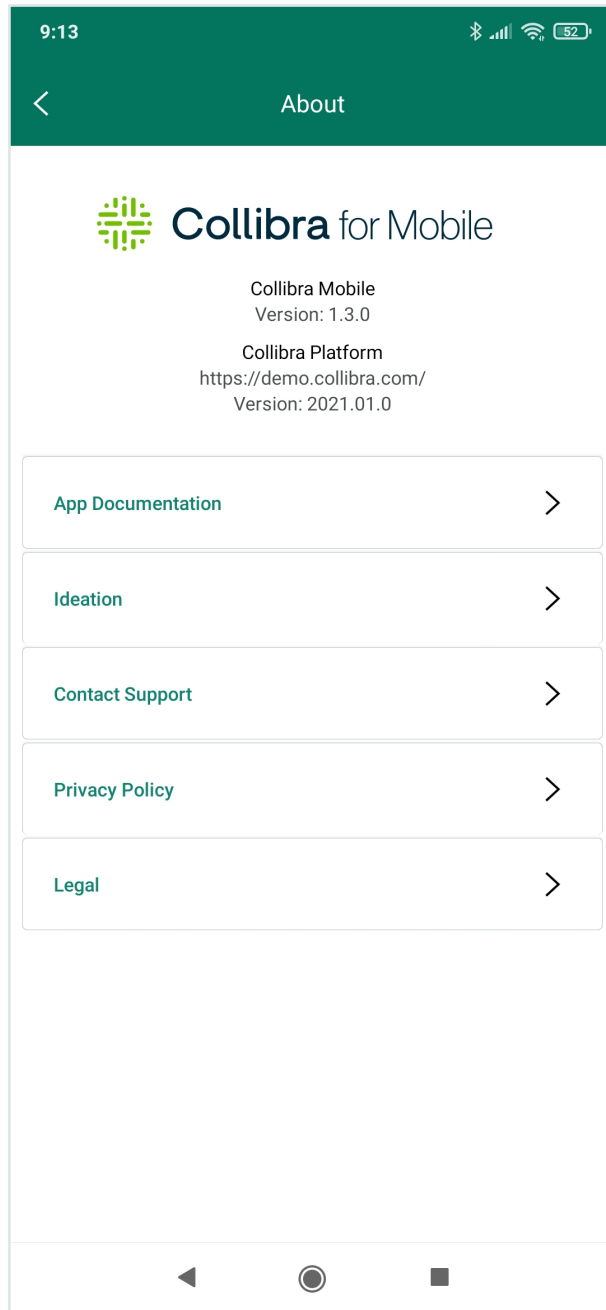

About

The About page shows basic details about your Collibra for Mobile installation and gives you access to additional documentation and support options.

Open the About page

1. Tap on the **Profile**  icon in the bottom navigation bar, and then tap **About**.

2. Tap on any of the following pages.

Setting	Description
App Documentation	Access the HTML and PDF user guides and documentation for Collibra for Mobile.
Ideation	Submit a feature request on the Collibra Ideation platform.
Contact Support	Submit a ticket to our Collibra Customer Support team.
Privacy Policy	Read the latest version of the Collibra privacy policy.
Legal	Read the Collibra legal disclaimer.

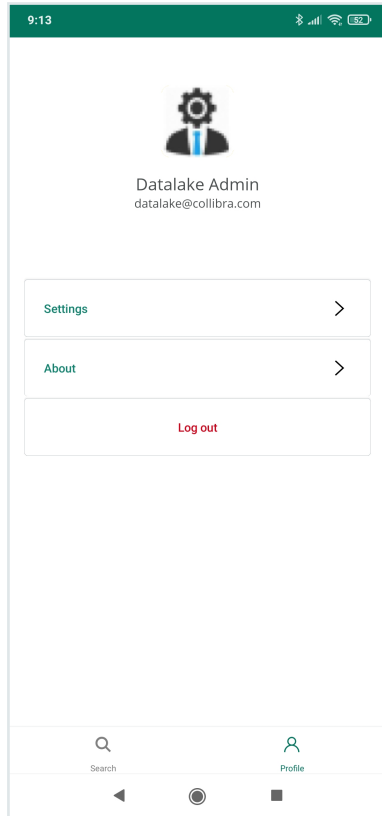

Settings

In the [Collibra for Mobile settings](#), you can edit options such as tracking and filters.

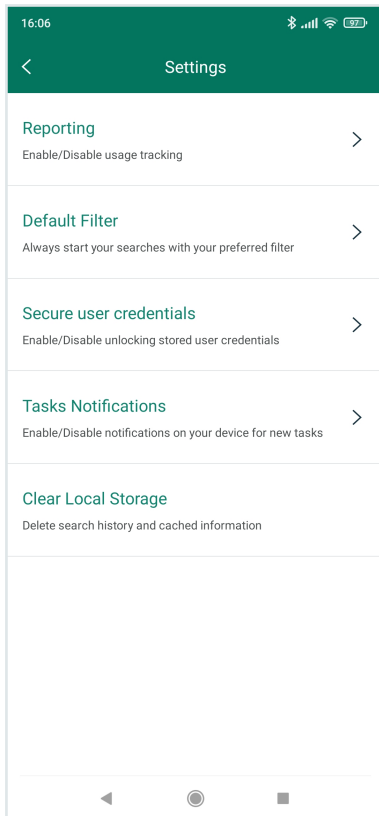

Via [Collibra Console](#) of the Collibra Data Intelligence Cloud environment, you can also edit settings. These settings will overrule the settings that are set in Collibra for Mobile.

Settings in Collibra for Mobile

1. Tap on the **Profile** icon (👤) in the bottom navigation bar, and then tap **Settings**.

2. Tap on any of the following options to open the page.

Setting	Description
Reporting	<p>The option to track and share product usage data with Collibra. If enabled, you cannot disable it in Collibra for Mobile.</p> <p>The data that is gathered by Collibra is anonymized.</p> <p>Also, if this option is enabled and the app crashes, a crash report is automatically sent to Collibra.</p>
Default filter	<p>The filter that is applied, by default, to your search results.</p> <p>A default filter that has been set via Collibra Console overrules the filter set in the app.</p>
Secure user credentials	<p>The option to store your credentials securely on your device.</p> <p>If enabled, Collibra for Mobile stores your user credentials encrypted on your device. You need to use biometric authentication or your device's authentication code or pattern to decrypt your credentials so that you can sign in to Collibra.</p>

Setting	Description
Task Notifications	The option to receive push notifications when tasks are assigned to you. If you enable this option, ensure that your mobile operating system does not block notifications for the Collibra for Mobile application.
Clear Local Storage	Deletes your search history and cached information from the app.

Settings in Collibra Console

1. Open Collibra Console of your Collibra environment.
2. In the tab pane, click the **Data Governance Center** service of your environment.
3. Click **Configuration**.
4. Click **Edit configuration**.
5. Scroll to the **Everywhere Mobile** configuration section.

31 Everywhere Mobile configuration ▾	
Everywhere Mobile	
31.a Default search filter	Select a default filter to apply on the search results.
31.b Custom Search box placeholder Search in Collibra	Set a new name in the search field to replace "Collibra".
31.c Enable Workflows ✘	Allow the use of workflows inside the mobile application.
31.d Global workflows	The list of workflows that will be available in the app's main menu. Enter the UUID of the workflow.
31.e Asset workflow	The list of workflows that will be available on the asset page. Enter the UUID of the workflow.
31.f No search result workflows	The list of workflows that will be available if there are no results. Enter the UUID of the workflow.

6. Edit the options:

Option	Description
Default search filter	<p>The filter that is applied, by default, to your search results. This must be the UUID of the filter.</p> <p>This filter overrides any search filter that is set in the app.</p> <p>To find the UUID, open the Collibra environment and click in the Search box. Click the name of a search filter. In the address bar you will see the UUID of the filter.</p>
Custom Search box placeholder	The text that is shown in the search box of Collibra for Mobile before a user enters search text.
Enable Workflows	<p>Option to enable workflows in Collibra for Mobile.</p> <p>This allows you to complete tasks or start a workflow in the app. The available workflows depend on the ones that you add to the Global workflows and Asset workflow configuration.</p>
Global workflows	<p>The list of workflows that is available in the app's main menu.</p> <p>Enter the UUIDs of the workflows. An example workflow could be "Create issue".</p>
Asset workflow	<p>The list of workflows that is available on an asset page in the app.</p> <p>Enter the UUIDs of the workflows. An example workflow could be "Ask the expert".</p>
No search result workflows	<p>The workflows that are available if there are no search results found.</p> <p>Enter the UUIDs of the workflows. An example workflow could be "Propose new business term".</p>

7. Click **Save all**.
