# Collibra for Mobile 1.6

**Important** We are announcing the End of Life (EOL) of Collibra for Mobile, effective **October 31, 2024**. This EOL announcement applies to all customers and all environments. No immediate action is needed from you at this time. We do ask that you plan accordingly to remove usage of Collibra for Mobile within your organization before October 31, 2024. For more information, go to the [Data Citizens Community](#). Please reach out to your Customer Success Team if you have any questions.

Collibra for Mobile is a cross-platform application that allows you to search for resources in Collibra Data Intelligence Cloud from your mobile device.

**Tip** Collibra for Mobile is available in the [Apple App Store](#) and the [Google Play Store](#).

## Features

### 1.6.1

- Collibra for Mobile no longer runs on rooted (Android) and jailbroken devices (iOS).

### 1.6.0

- You can now tap the community or the domain displayed in the breadcrumb trail at the top of an asset page to view the respective community or domain page.
- You can now share a community or a domain. To facilitate this feature,  is added to the community and domain pages.

## Fixes

### 1.6.5

- We have now improved the security of Collibra for Mobile.

## 1.6.4

- We have now improved the security of Collibra for Mobile.

## 1.6.3

- Collibra for Mobile no longer renders HTML content in the buttons in workflow forms.

## 1.6.2

- Collibra for Mobile now properly renders HTML content in the non-editable text fields in workflow forms (ticket #108803, 111697).

# Collibra for Mobile 1.5

Collibra for Mobile is a cross-platform application that allows you to search for resources in Collibra Data Intelligence Cloud from your mobile device.

**Tip** Collibra for Mobile is available in the [Apple App Store](#) and the [Google Play Store](#).

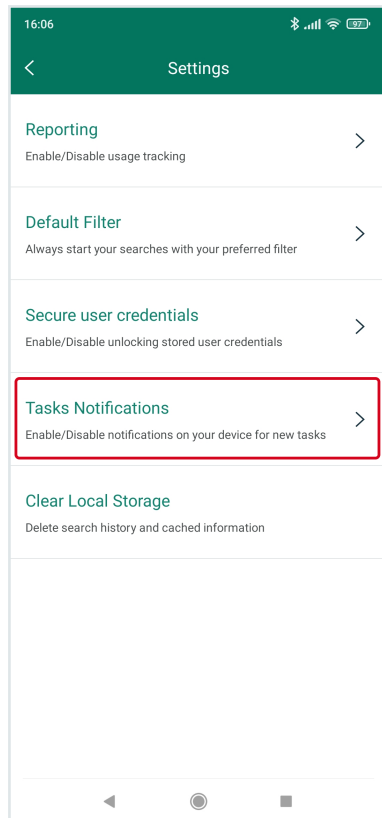

## Features

### 1.5.2

- iOS 11 is no longer supported for Collibra for Mobile 1.5.2 and newer.

### 1.5.0

- You can now receive push notifications when tasks are assigned to you. You have to enable this feature in the Collibra for Mobile settings.

# Enhancements

## 1.5.2

- The Expo SDK is upgraded to version 43 to fully support iOS 15.
- General performance and stability improvements.

# Fixes

## 1.5.5

- On Android, the keyboard no longer disappears when trying to add text in text fields. (ticket #87239)

## 1.5.4

- You can again start workflows in Collibra for Mobile.

## 1.5.3

- You can again sign in to Collibra for Mobile via single sign-on.

## 1.5.1

- Replying to a comment a second time, no longer results in an exception error.
- The option to secure the user credentials is now correctly saved, even after signing out.
- If you search for a value in a drop-down list in a workflow step and remove your search query, the drop-down list is again reset.
- Opening a shared link in a mobile browser, now correctly shows "Open in mobile" instead of "Open in desktop".
- When you click a shared link in Collibra for Mobile, the correct asset is now shown.
- Reopening a shared link in Collibra for Mobile no longer makes the app crash.

Collibra for Mobile 1.0.x .....	13

## Collibra for Mobile 1.4.x

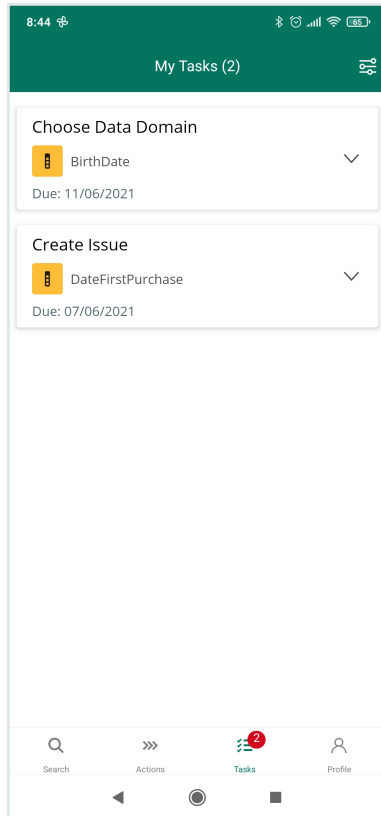

Collibra for Mobile is a cross-platform application that allows you to search for resources in Collibra Data Intelligence Cloud from your mobile device.

**Tip** Collibra for Mobile is available in the [Apple App Store](#) and the [Google Play Store](#).

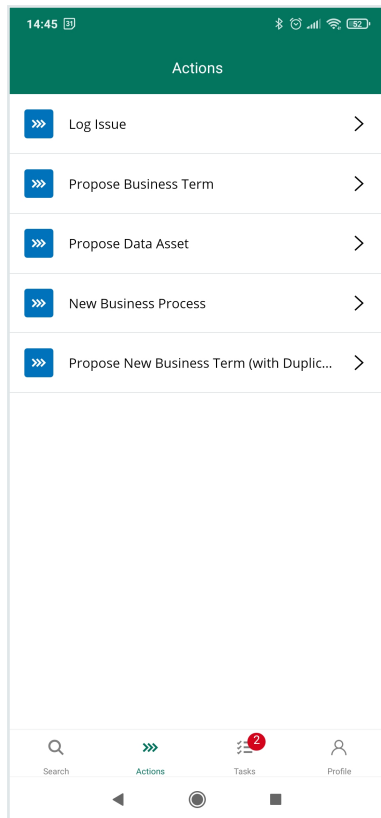

## Features

### 1.4.0

- Workflows and tasks are now integrated in Collibra for Mobile:
- You can now complete workflow tasks such as reviewing an asset or creating an issue.

- You can now start actions either from an asset page or from the general Actions page. You can define the list of actions in [Colibra Console](#). It may occur that very complex workflows won't work.

- You can define the workflows for the following situations in Collibra Console:

31.c Enable Workflows ✖	Allow the use of workflows inside the mobile application.
31.d Global workflows	The list of workflows that will be available in the app's main menu. Enter the UUID of the workflow.
31.e Asset workflow	The list of workflows that will be available on the asset page. Enter the UUID of the workflow.
31.f No search result workflows	The list of workflows that will be available if there are no results. Enter the UUID of the workflow.

- List of actions on an asset page.
- List of actions on the general Actions page of the app.
- List of actions in case there is no search result.

## Enhancements

### 1.4.3

- You can now look up and consult communities and domains in Colibra for Mobile.

## Fixes

### 1.4.3

- Colibra Data Intelligence Cloud 2021.05.2 no longer hides the Actions section in the navigation bar. (ticket #66953)
- The environment URL set via a mobile device management system is now correctly shown in Colibra for Mobile. (ticket #68641)
- The environment URL is now deleted from your iOS device if you remove Colibra for Mobile or if you clear the local storage of Colibra for Mobile.
- Asset names in camel case are now also in camel case in Colibra for Mobile.

### 1.4.2

- The app no longer crashes when you open an asset page that contains an image without size arguments.
- A session timeout no longer shows a server error page.
- The documentation of mobile device management parameters is updated. (ticket #68641)

### 1.4.1

- Workflow descriptions that contain HTML formatting are now correctly rendered.
- The app no longer crashes if you select a workflow that doesn't have a description.

## 1.4.0

- When you add or delete a comment, you now remain on the Comments tab instead of returning to the Overview tab of an asset page.
- Report images are again shown on an asset page.

# Collibra for Mobile 1.3.x

Collibra for Mobile is a cross-platform application that allows you to search for resources in Collibra Data Intelligence Cloud from your mobile device.

**Tip** Collibra for Mobile is available in the [Apple App Store](#) and the [Google Play Store](#).

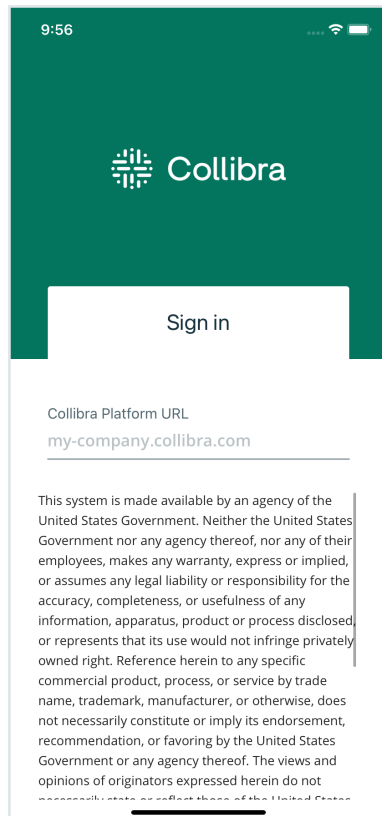

## Features

### 1.3.1

- You can now configure a session timeout for Collibra for Mobile, which will automatically sign out users from the app after a certain period of inactivity.

### 1.3.0

- When you sign in with a username and password, you can now use Touch ID and Face ID to sign in to Collibra for Mobile.
- You can now configure a default browser via your mobile device management software. The default browser is used to sign in to the app. If the browser that is specified as the default is not installed on your device, an error message is shown and you are unable to sign in to the app. (ticket #57109)
- You can now configure notification message that is shown before you sign in to the app, for example to notify the user that they are using governmental property.

## Enhancements

### 1.3.1

- Search queries are now only added to the list of recent searches if you open an asset from the results or expand one of the search results.

## Fixes

- When you configure the app settings in Collibra Console of your Collibra environment, the settings are now correctly applied in the app. You need Collibra 2021.01 or newer.

## Collibra for Mobile 1.2.x

Collibra for Mobile is a cross-platform application that allows you to search for resources in Collibra Data Intelligence Cloud from your mobile device.

**Tip** Collibra for Mobile is available in the [Apple App Store](#) and the [Google Play Store](#).

## Enhancements

- In your search query, you can now enter an asset type to filter by that asset type.
- Enter "Define <search term>" to search for the definition of the search term.

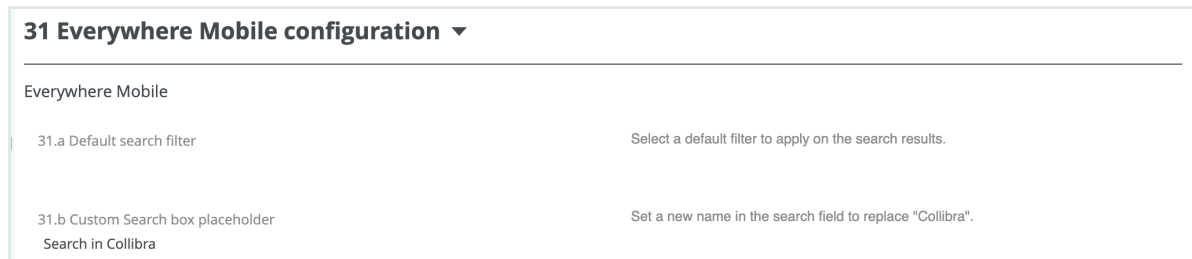

## Fixes

- You no longer have to tap the Next button twice to go to the next step in the sign-in procedure.
- The Ratings section is no longer available on asset pages if ratings are not enabled.
- The Edit and Delete buttons on the Ratings page of an asset are no longer partly covered by reviews.
- From the sign-in page, you can again switch to another Collibra environment.

# Colibra for Mobile 1.1.x

## Features

- The Colibra for Mobile settings can now be set via Colibra Console of your Colibra Data Intelligence Cloud environment.

The screenshot shows a configuration page titled "31 Everywhere Mobile configuration" with a dropdown arrow. Below the title is a section header "Everywhere Mobile". There are two configuration items:

Configuration Item	Description
31.a Default search filter	Select a default filter to apply on the search results.
31.b Custom Search box placeholder Search in Colibra	Set a new name in the search field to replace "Colibra".

- You can now see the ratings and reviews of an asset.
- You can now add, edit and delete your rating.

## Enhancements

- If an asset contains comments, you now see the number of comments in the tab.

## Fixes

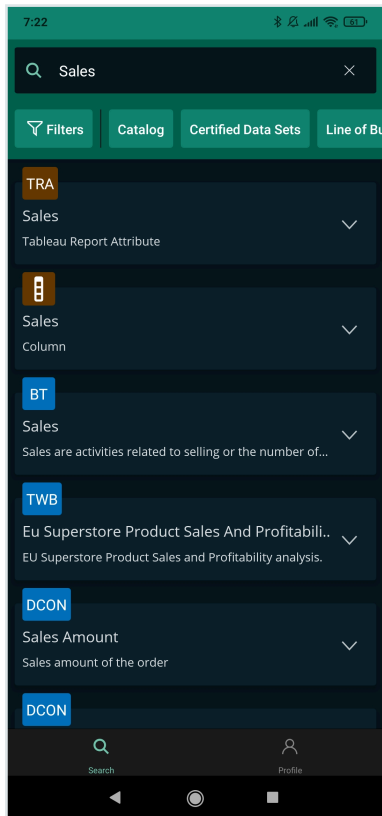

- If you connect to an unresponsive environment, you no longer remain on the loading screen but return to the environment URL screen instead.

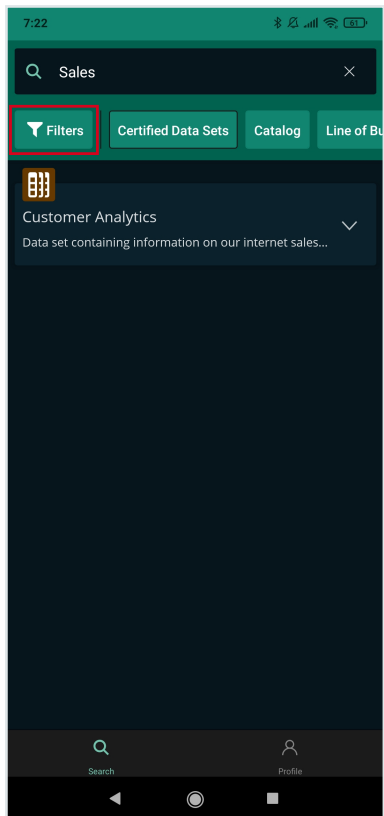

# Collibra for Mobile 1.0.x

## Features

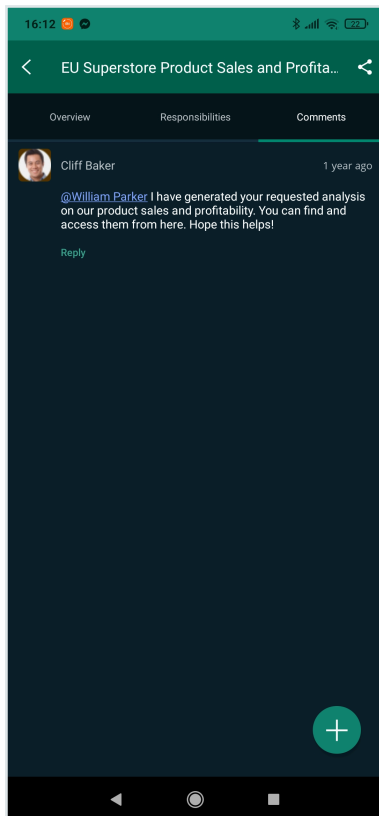

- You can now search for detailed information about governed assets in Collibra Data Intelligence Cloud from your mobile device.

- Further narrow your search results using the same filters defined in Collibra for Desktop.

- The speed of workflows completion was improved.
- You can now react and share comments and ratings with users from anywhere.

- Collibra for Mobile now supports Mobile Device Management support so you can pre-configure the domain URL, search placeholders and the default filters search.

## Enhancements

- Clicking a related asset page now opens the respective page.
- The comment field now appears when you reply to a comment.
- You can again mention a user by typing @ when you reply to a comment.
- On Android, clicking the Back button on the search results page now returns to the start page of the app instead of closing the app.

## Fixes

- You can now preview a Column asset page even if stitching was not successful or not all relations are created.

# About Collibra for Mobile

## Supported Collibra version

- Collibra Data Intelligence Cloud 2020.11 or newer

## Supported Apple iOS versions

- iOS 11 or newer

## Supported Android versions

- Android 7 or newer
