ERP/CRM Integrator Release Notes

Revision: 30 Nov 2022

You can find the most up-to-date technical documentation on our documentation site at

<https://productresources.collibra.com/docs/erp-crm-integrator-rn/latest>

# Release Notes

This note outlines the changes, improvements and defects covered by the ERP/CRM Integrator 7.7.11 release.

# Installation Considerations

## Installation

Run the Setup program to install. An existing ERP/CRM Integrator install will be upgraded.

Please make a backup of the SafyrSettings.xlsx file before installing, if you have made any changes to the previous ERP/CRM Integrator delivered version. Make sure to merge the changes you have made into the new version.

## Preparing the Source System for Extraction

Source system	Preparation
SAP	Install the latest SAP Transport if upgrading from 7.6 or earlier
SAP BW	Install the latest SAP Transport if upgrading from 7.6 or earlier
SAP BW on HANA	Install the latest SAP Transport if upgrading from 7.6 or earlier
Others	No change

## Re-extraction from Source System needed

Source system	Extraction
SAP	Not required unless upgrading from 7.6 or earlier.
SAP BW	Not required unless upgrading from 7.6 or earlier
Salesforce	Required to take advantage of the latest API version
Others	No change

# ERP/CRM Integrator Repository

All existing repositories will need to be updated if upgrading from a release older than ERP/CRM Integrator 7.7.3. When first opening an existing repository, ERP/CRM Integrator will notify the user that an update to the structure is required. ERP/CRM Integrator will automatically update the database structure.

## Export Changes

New options for Multi-language texts for JSON and Collibra export formats

## Automation Changes

Small changes to accommodate Multi-language text options

# Release Details

## Improvements

- SIR-1882 – Collibra and JSON Multi-Language Exports
- SIR-1885 – Signing added to MicrosoftDynamicsAX.dll for improved Security
- SIR-1888 – Salesforce API V55 Support
- SIR-1890 – Extraction for SuccessFactors

## Defects

- SIR-1887 – Correct representation of Salesforce Field Labels
- SIR-1895 – Fix for Collibra export where a Field moves to a different Field Group between successive exports
- SIR-1899 – Salesforce Table names greater than 64 characters cause Extraction to fail
